MOSES & SEGOINE,

88 Genesee St., Auburn, N. Y.

H. P. WESTCOTT'S ADJUSTABLE DASH CHURN

First Patented Aug., 1863. Improvements Patented April, 1865, and Nov., 1866.

This Churn is now regarded by all the Agriculturists and Dairymen of the country, who have had an opportunity to examine it, as the

BEST CHURN YET OFFERED TO THE PUBLIC.

Embracing, as it does, the principle of the old Dash Churn, adding thereto important improvements to secure the VERY BEST QUALITY, and the

Largest Quantity of Butter with the Least Labor.

The last improvement is in the shape of the barrel, also the substitution of a FLAT Steel Spring, (which is perfectly reliable,) to raise the Dasher; adjusting the Upper Dasher outside the Churn, shove the Lever, by means of a malleable slide, or clasp, and thumb screw. We make five sizes of these Churns, (holding from five to thirty gallons,) in the best manner, and of the very best quality of white oak.

RETAIL PRICE—No. 1, (30 gal.,) \$16. No. 2, (½ bbl.,) \$14. No. 3, (½ bbl.,) \$12. No. 4, (½ hbl.,) \$10. No. 5, (1-5 bbl.,) \$8.

H. P. WESTCOTT, Sup't
Seneca Falls Chnrn Manuf. Co., Seneca Falls, N. Y. R. E. Lusk, Gen. Ag't.

The Seneca Falls Churn Mannfacturing Co. is organized under the General Mannfacturing Law of the State of New York, with a Capital of \$100,000, have extensive facilities for mannfacturing Churns and the PATENTED FIXTURES. Can supply those purchasing Town, County and State Rights, with the Dashers, Springs, &c., at a moderate price, where the parties desire to manufacture their own Churns.

T. E. SMITH'S

EFTERIORS

WAREHOUSE.

GENEVA, N.Y.

1 6 A

This Establishment is the largest of its kind in Central New York. A large and complete assortment of all kinds of Furniture is constantly kept on hand. The following are some of its features:

First, Thoroughness. This quality is manifest not only as to the workmanship of the articles offered for sale, but also with regard to the completeness with which every branch of the business is represented. Every portion of every department receives strict attention; all kinds and all classes of furniture are always to be found; and the gaps made by the purchasers are immediately filled up by the score of workmen who are kept constantly employed. The work, too, is all done well, which is owing to the system observed in the labor of the different employees. Each department is worked by mechanics whose sole attention is given to their work only, and in pursuing such a course every branch of manufacture is done by those who thoroughly understand their business. In consequence of thus classifying the work, it is all done well, and purchasers can be assured that the articles they buy are reliable as regards good workmanship.

Secondly, one is struck by the taste displayed in the large stock of goods. In going through such a large establishment, and everywhere beholding articles not only well made, but tastefully made, the results of competent direction are manifest. This is owing to the excellent judgment and taste of the proprietor, Mr. T. E. SMITH. Under his supervision, articles which are carved or ornamented in other ways, show artistic and beautiful designs. Strength is combined with beauty, and neatness with elaborateness. In the different styles of furniture, from the lightest to the most massive, and in the changes which often occur, attention to beauty and grace is never lost.

As to variety, there is scarcely a style of furniture that cannot be found at this establishment. In bed-room sets, parlor furniture, and small articles of various kinds, persons of all tastes can be suited. The most fertile invention is displayed in originating new patterns and unique designs.—Mirrors of all shapes and sizes; desks, with new and ingenious contrivances; and picture frames carved in numberless patterns, all claim attention. A visit is required through the rooms to give one an idea of the variety displayed.

This establishment has the name, and justly, of being the largest Furniture; Warehouse in this part of the State. It receives frequent encomiums from the Press of other places, and indeed all who thoroughly comprehend its advantages, not only patronize it themselves, but also advise their friends to. And in giving this advice we heartily join them.

INTRODUCTION.

In presenting the initial number of the "Gezetteer and Directory of Seneca County" to the public, the publisher desires to return his sincere thanks to all who have so kindly assisted in obtaining the valuable information which it contains, and without whose aid it would have been impossible to have collected, in the brief space of time in which it is essential that all such works should be complet-Especially are our thanks due to the several editors of the Seneca Falls Reveille, Seneca Co. Courier, Seneca Observer, Ovid Bee and Seneca Evening Journal, for the uniform kindness which has been evinced in calling public attention to the author's efforts; and to them and the following gentlemen, viz: D. B. Lum and J. M. Simson, of Seneca Falls; Dr. Congdon, Silas Kinne, John D. Bliss, and Isaac Runyan, of Ovid; Dr. Samuel R. Welles, Thos. Fatzinger, Sidney Warner and John B. Murray, of Waterloo; and John D. Coe, of Romulus; for essential aid in furnishing material for the work. We have also drawn largely from "French's Gazetteeer of the State of New York." Many other citizens of the County have kindly volunteered their aid, to all of whom we return sincere thanks.

When it is known that time, equal to nearly two years' labor, if done by one man, has been devoted to the canvass, and the great difficulty many times experienced by the agents in collecting the necessary information, it is believed our patrons will willingly ex-

cuse any seemingly short-comings in the completeness of the work.

The advertisers represent many of the leading business men and firms of the County, and we most cheerfully commend them all to the patronage of those under whose observation these pages may come.

So complete a canvass of this County for a Business Directory, and the additions of farmers' names, together with the number of acres owned or leased by each, and their post office addresses, has never been attempted by any other publisher.

That errors may have occurred in so great a number of names and dates as are here given, is probable, and that names have been omitted that should have been inserted is quite certain. We can only say that we have exercised more than ordinary diligence and care in this difficult and complicated feature of book-making. To such as feel agrieved in consequence of error or omission, we beg pardon, and ask the indulgence of the reader in marking such as had been observed in the subsequent reading of the proofs, and which are noted in the *Errata*, following the Introduction.

The Map of the County, was engraved with great care by Messrs. "Weed, Parsons & Co.," of Albany, and, it is believed, will prove a valuable acquisition to the work.

With thanks to friends generally, we leave our work to secure the favor which earnest endeavor ever wins from a discriminating business public.

HAMILTON CHILD.

ERRATA.

9

ERRATA.

ADDITIONS AND CORRECTIONS.

GAZETTEER.

Fayette.—On page 30, the following should be added:
"Among the early settlers were Capt. Michael Vreeland, who located near the present village of Canoga, in 1795, where he built the first saw mill erected in that place, in 1812; and Banajah Boardman, who settled near by, in 1795, and built the first griet mill, in 1799, at Canoga Springa, and run the first still in town. The first marriage in this section of the town, was that of William B. Hall and Miss Rebecca Boardman, about the year 1795. Rev. Phineas Clark, a Baptist, was one of the first settled ministers in this town. The first church was built of hewn logs, and occupied the present site of the Jerusalem church, near the center of the town. It was erected by the early German actiers in 1808. The first atore in Canoga was kept by Samuel Wallace, in 1815. He is still living, in Waterloo."

Lod1.—There seems to be some difference in opinion as to who was the first settler in this town. Mr. G. M. Spence, of Lodi Center, claims (and we believe his claim is generally respected.) that his grandfather,——Spence, came into town in 1788, from Philadelphia, Pa., and settled on the farm now in poseession of his grandson. If this be so, it would make him the first settler of whom we have any record.

Romulus.—On page 38, "Kehdaia is a post office in the north-west corner of the town," was omitted.

Seneca Falls.—On page 46, in an account of the "Phœnix Mills," we should have said they run "26 sets of woolen machinery," instead of "24 sets," as printed; and since that writing, Mr. J. G. Mackintosh, has retired from the secretaryship; that office is now dispensed with.

On page 50, we say of Cowing & Co's works, that the annual value of manufactured products amount to \$125,000, and that 60 tone of coal are consumed. We are evidently in error in both statements. The value of manufactured products must be much larger than stated, and they probably use 600 instead of 60 tons of coal.

On same page, we should have said of Rumsey & Co., that "This company was organized in Jan. 1864."

Tyre.—On page 51, "Magee's Corners is a post office in the sonth-west part of the town," was omitted.

Waterloo.—On page 52, in speaking of the "Seneca Canal," we should have said "Cayuga and Seneca Caual," and the population of Waterloo village, (north and south, now under one incorporation,) is about 4,500, instead of 3,500 as stated.
On page 55, and wherever it occurs in speaking of the early name of what is now South Waterloo, "Schoyes," should have been spelled "Scauyes," meaning "Small

Rapida.''

On page 56, for "Babbit Tubb's house," read "Joel B. Tubb's house." On same page, near the bottom, for "William" street read "Williams" street.
On page 59, "John Johnson," should read "John Johnston."

Seneca County Agricultural Society.—On page 67, the final results of the Fair of 1867 was omitted for want of figures, which we have since obtained from the Treasurer, Mr. John D. Coe, as follows: \$1,748.65 Receipts and cash on hand, 1,484.36 Payments. \$264,29* Balance in Treasurer's hands,

PUBLISHER'S NOTICES.

W. H. Hood, Manufacturer and nices, &c., to order, in the best possible Desler in Boots and Shoes, at 92 Fall st., manner. His long experience will reconstitute and in this section of the State. He employs they are all made from kiln dried lumber. nnne but the most experienced of work-men, and his Cutter does his part of the work in a peculiar and scientific manner, ensuring a perfect and easy fit. His system adapts itself to any shaped foot. We have tried the system and can from personal experience recommend all those who from tender feet are made to dread the breaking in of new boots, to try Mr. Hood's system, and our word for it, they will ever after patronize him, if possible. Mr. Hood is also an extensive dealer in leather and findings, and can make it an object to the shoemakers of Seneea County to make their purchases direct of him. He is also agent for the celebrated "Singer Family Sewing Machine. See cards, pages 6 and 196.

The Ovid Bee was started many years since at Ovid. Mr. Fairehild, the publisher is a veteran "Knight of the quill," and we helieve conducts his paper to the entire satisfaction of his patrons. We hope he receives the liberal support he deserves. His office is supplied with material for executing neatly all kinds of job printing, from a eard to a mammoth poster. See card, page 220.

Stevens & Sheffer, Auctioneers and GeneralMerchants, Bridge st., Seneca Falls, publish a card on page 18. Mr. Stevens has been an auctioneer from the days of his hoyhood, and as such has been very suc-cessful. He wishes it distinctly understood cessful. He wishes it distinctly understood that when attending sales they always start the bids themselves, thus becoming competitors in the purchase of all goods.—They buy anything and everything of value, and their store is a wondrous curiosity shop, where those who call may find new goods and old goods in every variety, style and quality, at astonichly low prices. Call and see them when you visit Seneca Falls.

Hayden & Letchworth, at No. 9 East Genesee st., Auburn, manufacturers and wholesale dealers in Hames, Saddlery and Carriage Hardware, Harness and Carriage Trimmings of all kinds, are one of the largest manufacturing and mercantile firms of that city. Their facilities for supplying dealers with everything in their line at satisfactory rates, are unsurpassed in the State. Seneca County carriage makers and harness makers will most asuredly find it for their permanent interest to make their purchases of this honse; their well known integrity and promptness in filling orders, recom-mends this firm to all honorable buyers. We would advise our readers who are in-We would advise our readers who are in-terested, if they have not already done so, to make the acquaintance of the firm the first opportunity convenient. We are sure they will in aftertime thank us for the ad-vice. See their card, page 200.

W. R. Powell, Manufacturer of Sash, Bliuds and Doors, at Senega Falls, is also prepared to manufacture Mouldings, Cor-

He also deals in French and American Fancy and Stained Glass. See eard, page 19

The "Seneca Evening Jour nal, published monthly at Farmer Village, by Jacob Bergen, was started in Feb., last. It is a creditable looking sheet, well arranged and edited, and doubtless supplies a want long felt by the inhabitants of that enterprising village. Mr. Bergen is prepared to attend promptly to all orders in the line of Job printing. See eard, page 220.

F. C. Brehm, Proprietor of the "Germania Vineyard" at Waterloo, publishes a eard on page 186. Mr. Brehm is becoming quite au extensive grower of grapes and manufacturer of Native Wines and Brandess. He also propagates and deals in Grape Vines, of which he is supplied with all the choice varieties. He has received a all the choice varieties. He has received a large number of premiums at the State Fairs, and the Society's large Silver Medal at Saratoga in 1866, for best Wines and at Saratoga in 1866, for best Wines and Brandies, and the following flattering report from the Judges of that year on Wines and Brandies:

'Diana Wine, Vintage 1865, F. C. Brehm, aterloo. First class, American Hock Waterloo. First class, American Wine, but immature for want of age

Diana Wine, Vintage 1864, F. C. Brehm, First class, American Hock Wine. Brandy made from Diana Wine, Vintage 1865. Brandy of excellent quality.

Brandy made from Isahella Grapes, Vint-

age 1865. Brandy of like excellent quality, distinguished for its very delicate flavor. For the great merit of first producing swine of most excellent quality made from the Diana Grape, and also for producing the most excellent specimens of Brandy, made from Isabella and Diana Grapes, the Committee unanimously recommend that F. C. Brehm, of Waterloo, be awarded the Soci-

ety's large Silver Medal.

Hon. LEWIS F. ALLEN,

JOHN A. KING,

MARSHALL P. WILDER, " MARSHALL 1... Dr. ALEX, THOMPSON, Judges."

We can assure our readers that no purer Wines or Brandies can be procured else-where at a much higher cost. They are very valuable for their medicinal qualities. Cirenlars of prices and qualities will be sup-plied by Mr. Brehm on application.

C. D. Clawson, Physician and Surgeon, at Canoga, is fortunate in having a large ride, the result, no donbt, of his skill in mastering disease. The Doctor does not in mastering disease. The Doctor does not confine himself to Homeopathic or Allopathic medicines exclusively, but in all cases ness such remedies as in his judgment will cure the disease in the shortest provible the system. possible time without injuring the system. See card, page 206.

HUSSEY & CO.,

AUBURN, N. Y.,

STILL CONTINUE TO MANUFACTURE THE

HUSSEY PATENT

Combined Reaper and Mower,

And with the many improvements added to it from time to time, as careful experience has suggested, they now offer it to farmers as the

Best Grain, Grass and Clover Harvester in Use.

It is Light, Strong, Durable and Handy; has no Side Draft

And has the least Direct Draft of any Machine in use, cutting the same width of swath. It mows in any kind of Grass and on any kind of ground, fully equal to the best, and as a Reaper,

HAS NO EQUAL! Our Machines are Very Simple in Construction, Light, Strong and Durable,

And we warrant them to do good work as Mowers, in any kind of Grass, wet, damp, or dry, and warrant them to do better work on rough and uneven ground, than any other Machine in use, and warrant them

To be the Best Grain and Clover Seed Harvester in the World.

We warrant them, both in Mowing or Reaping, to be perfectly free from Side-Draft, and warrant them to have

Less Direct Draft

Than any other Machine built, cutting the same width of swath. We warrant them also, when in order, to either Mow or Reap well with the slowest possible motion you can give them with a team, and warrant them to have strength sufficient to be drove to cut twenty acres per day. The Hussey Combined Reaper and Mower is no experiment, but an old

The Hussey Combined Reaper and Mower is no experiment, but an old and well-tried stand-by of many years' standing of many of our best practical Farmers, and wherever known is acknowledged to be the best Combined Mower and Reaper, in every respect, in the world. It Mows, it Reaps, it Rakes, and does it all with less machinery, less liability of getting out of order, and less liability of breaking down than any other Machine built, and for these reasons it is just what every practical farmer needs.

built, and for these reasons it is just what every practical farmer needs.

So please call at our Manufactory on Mechanic street, first door south of the old Beardsley, (now Selover's) Mills, and examine the many superior advantages our machines possess over all others, before buying some other kind, and you will be convinced that what we say is no humbug.

They can supply all orders received for rough or planed lumber, sash, doors, flooring, ceiling, fencings, &c., at the most reasonable prices. They also keep all sizes of coal, at the lowest prices. Purchase of them if you want good bargains.

T. Wilkinson & Co., File cutters at Seneca Falls, have heen engaged at the business here about nine years, during tweets, Seneca fall which time they have secured a libers ishare of custom. As a guarantee that they are first class workmen, we might mention that they re-cut illes for the New York Central Railroad shop, and for C. C. Brabey & Sons, Phenix foundry, Sweet Barnes & Co., and others of Syracuse. Millers and mannatheaturers generally, will find them prompt and excellent workmeu, See card, page 17.

Hussey & Co., manufacturers of "The Hussey's Combined Reaper and Mower," at Auhurn, publish a card on page 16.—
These machines are too well known all over the United States to need a recommendation from us, as to its excellencies. We may add, however, that several important improvements have been recently added, until its builders now think it the most perfect machine yet invented. Farmers can learn more in regard to these excellent mowers and reapers by calling on the manufacturers at their works, where they will be bappy to give all desired information.

Benninghoof House, Conrad Pratz, proprietor, cor. Bridge and Bayard streets, Seneca Falls. This house (fornerly the Franklin House,) has undergone important repairs, and will soon be further improved. Mr. Pratz has been long and favorably known as a laudlord in Seneca Conaty. His hospitable and genial mancers have won for him many friends. We predict for him and the "Benninghoof House" long and continued prosperity.—See card, page 19.

seneca falls, --- N. Y.

SENECA COUNTY.

THIS COUNTY was formed from Cayuga, March 24, 1804. A portion of Tompkins was taken off in 1817, and a part of Wayne in 1823. Its location is west of the center of the State, 156 miles centrally distant from the Capital at Albany, and it contains an area of 420 square miles. It lies between Lakes Seneca and Cayuga, occupying most of the land between those beautiful bodies of waters, nearly a fourth of the surface being occupied by a high ridge extending into it from Tompkins County. The summit of the south part of this ridge rises 700 to 800 feet above Seneca Lake, and is 1,100 to 1,250 feet above tide. Toward the north the land slopes gradually and beautifully to the lake level, forming one of the most charming sections of Central New York. The ridge above alluded to is bordered in some places by steep declivities, and in others by gradual slopes, and in the south part generally terminates in bold, high bluffs, on the lake shores. At the foot of Seneca Lake these bluffs average about 20 feet, but toward the south they rise to an elevation of 100 to 150 feet. At the foot of Cayuga Lake the shore is low and shelving, but in Romulus a bluff shore begins, which, gradually increasing, on the south border of the County, reaches a height of 150 to 200 feet. From the summits of the bluffs to the central summits of the ridge, the land rises in smooth, gradual slopes, broken occasionally by abrupt declivities of terrace-like formations. From Ovid toward the north, the land has an abrupt descent of about 200 feet, and thence, gradually, to the shores of Seneca River. The section immediately north of Seneca Lake Outlet, and west of Cayuga Lake Outlet, is level, and some of it quite marshy. A number of alluvial ridges, composed mainly of gravel, occupy the north-west corner, extending in a north and south direction, and varying from 30 to 50 feet in height. Their declivities are generally very abrupt toward the north, east and west, but are more gradual toward the south.

The geological formation of Seneca County is very simple. rocks overlie each other in parallel layers, dipping slightly toward The lowest out-cropping rocks belong to the Onondaga Salt Group, including both red shales and gypsum. They appear along the Seneca River, where the gypsum is quarried to considerable extent. Next above appear the heavy, compact masses of the corniferous limestone, occupying a belt of country two to three miles wide, south of Seneca River. The intermediate waterlime and Onondaga lime-stone strata are developed in this County only in very thin layers, which are scarcely noticeable. The corniferous limestone furnishes superior building stone, and is extensively quarried for that purpose. Next in order come the Marcellus and Hamilton Shales, occupying a broad belt through the County, and extending nearly to the summits of the ridges; the Tully Limestone. a layer only a few feet thick, deriving its value from the quantity and quality of the lime manufactured from it, and the Genesee Slate, a dark, shaly rock, crowning the southern hill summits. rocks throughout the County are covered with a deep deposit of drift, consisting of clay, sand, gravel, and hard-pan, which crops out only along the shores of the lakes, the narrow ravines of the streams, and the steep declivities of the ridges. In the north-west corner of the County, this drift formation lies in ridges, with narrow intervening valleys, and their position and character indicate that the entire region, at some remote period, has been subject to the powerful action of large streams of running water, moving in a southerly It is surmised that during an immediately preceding geological period, the waters of Lake Ontario, then much above its present level, flowed through the valleys of Seneca and Cayuga Lakes, and discharged into the Susquehanna.

The principal stream is the Seneca River, which is the outlet of the lake of that name. About 16 miles of its length lie between the two lakes, and in that distance its fall amounts to 60 feet. falls are principally at Waterloo and Seneca Falls, and afford an excellent water-power at each of those places, where their advantages are improved in mills and manufactories, the most extensive of which are at the latter place. From Cayuga Lake, Seneca River flows north-east, through a marshy region, and forms a portion of the east boundary of the County. Clyde River, a tributary of the Seneca, runs through a portion of the marshy section in the north-The other streams are small brooks and creeks, which east corner. in rainy seasons become rapid torrents, rushing down through deep gulfs worn in the shaly rocks. Many of these are interrupted in their course by romantic waterfalls, which cannot fail to awaken enthusiastic admiration.

Seneca Lake, whose eastern border forms the greater part of the western border of the County, is 35 miles in length, and from one to

four miles broad, 216 feet above Lake Ontario, and 447 feet above tide. It occupies a deep valley between the hills, and varies in depth from 300 to 630 feet. Its waters are never frozen over, but remain open to navigation throughout the entire year. The shores, as a general thing, are bold, and from their summits the land slopes gracefully upward to a height of from 200 to 700 feet above its surface. Cayuga Lake occupies a parallel valley on the east border of the County, is 38 miles long, and one to three and a half miles wide. It is 60 feet below Seneca, and its greatest depth is 346 feet. Near the foot, the lake is very shallow, and a large tract immediately adjoining and lying along the course of the stream which forms its outlet, is swampy, being the southern termination of the noted Montezuma Marshes. Further south, the shores are higher and the country is of the same general character as that lying along Seneca Lake.

The soil is mainly of excellent quality, the sandy and gravelly loam of the drift deposits being admirably adapted either to grazing or the raising of grain. The lower portions of the ridges being enriched by the disintegration of the rocks above, the soil is found to be very fertile and productive. The lowlands bordering on Seneca River, are clayey, and in many places intermixed with disintegrated gypsum and limestone. North of the river, extensive marl deposits of great agricultural value have been found. sandy region north of the foot of Seneca Lake was once considered almost worthless, but latterly the farmers in that section have found themselves able, by a proper system of cultivation and the judicious use of fertilizers, to make it productive at comparatively trifling expense. The marshy regions west of Cayuga Lake are covered with thick deposits of marl and muck, and measures have been taken to secure drainage, which, if completely successful, will open up some of the richest and most productive lands in the State.

The County is a half-shire, the County-seats being located respectively at Ovid and Waterloo. Ovid was constituted the County-seat upon the erection of the County in 1804, and the Court House was built in 1806. While yet a part of Onondaga County, in 1790, the courts were held in a barn belonging to Andrew Dunlap. In 1817, upon the erection of Tompkins County, the County-seat was removed to Waterloo; but in 1822 the County was divided into two jury districts, and the courts have since been held alternately at Ovid and Waterloo. The Court House at Ovid is a substantial brick structure with a handsome park in front. The County Clerk's office is in an adjoining building, also of brick. The combined Court House and Jail, at Waterloo, is also a brick building, pleasantly situated near the railroad, and fronting the public square in the west part of the village. The first County officers were: Cornelius Humphrey, Judge; Silas Halsey, Clerk; William Smith, Sheriff; and Jared Sandford, Surrogate.

The County Poor House is located on a farm of 126½ acres, on the town, line between Seneca Falls and Fayette, four miles southeast of Waterloo. The buildings are ample, and the management is creditable to the County. The first cost of the land and buildings erected thereon was \$12,750, and the present estimated value is \$19,000. The total expense for the year 1866, as shown by the annual report of the Superintendents to the Board of Supervisors, was \$14,947.38. The products of the farm for the year ending October 31, 1866, amounted to \$2,058, and the products sold from Poor House and farm, to \$584.75. The value of stock and implements at the same date was \$1,280.50. A school was taught during the entire year, and the whole number of children taught, over five and under sixteen years of age, was forty. The cost of maintaining paupers, over and above their earnings, was \$2.18 per week for each person.

Four weekly newspapers are now published in the County, and also one monthly. The following is a brief history of the Seneca County Press:

The Seneca Observer, published at Waterloo, by Edward W. Sentell, was started as the Waterloo Observer in 1824, by Charles Sentell, father of the present publisher, and was soon after issued as The Observer and Union. It subsequently received its present name, and was successively published by Charles Sentell, Smith & Co., M. C. Hugh, and Pew & Marsh. In 1846 it was published by Sentell & Pew, who continued it till 1853, when Charles Sentell again became sole publisher, and this continued till 1866, when it passed into the hands of the present publisher.

The Seneca County Courier, published by Pew & Holton, at Seneca Falls, was commenced in 1837 by Isaac Fuller & Co. It was successively published by Fuller & Bloomer, Mills & Bloomer, Mills & Davis, John J. Davis, N. J. Milliken, Milliken & Fuller, Milliken & Mumford, Foster & Judd, Fuller & Judd, and Isaac Fuller. In 1865 it passed into the hands of the present publishers.

The Seneca Falls Reveille, published by Henry Stowell, was started in January, 1855, by Wilcoxen, Sherman & Baker, as The American Reveille. In 1856 it was purchased by G. Wilcoxen, and by him continued till 1859, when it passed into the hands of Holley & Stowell, and in 1860 was purchased by the present publisher, by whom its name was changed.

The Ovid Bee was started in 1838 by David Fairchild & Son. In 1839 it passed into the hands of Corydon Fairchild, who still continues its publisher.

The Seneca Evening Journal was commenced by J. Bergen, at Farmer Village, in February, 1867, and is published monthly.

The Seneca Patriot, the first paper published in the County, was started at Ovid by Geo. Lewis, in 1815. In 1816 it was changed to The Ovid Gazette, and upon the removal of the County-seat, in 1817, it was removed to Waterloo and changed to The Waterloo Gazette, after which it was continued several years by the original proprietor.

The Seneca Farmer was started in Waterloo, in 1822, by Wm. Child, and in 1832 was removed to Seneca Falls and united with The Seneca Falls Journal.

The Waterloo Republican was issued a short time in 1822.

The Wreath and Ladies' Literary Repository was issued from the Observer office in 1831.

The Seneca Republican was established at Ovid in 1827 by Michael Hayes. In 1830 it was changed to The Ovid Gazette and Seneca County Register, and was issued a short time by John Duffy.

The Seneca Falls Journal was commenced in 1829 by O. B. Clark. In 1831 it passed into the hands of Wm. N. Brown, and in 1832 was united with the Seneca Farmer, and changed to The Seneca Farmer and Seneca Falls Advertiser, and was issued by Wm. Child till 1835.

The Western Times was published at Waterloo in 1830 by Ebenezer P. Mason.

The Ovid Emporium was established in 1832 by Bishop Orenshier.

The Seneca Falls Democrat was commenced in 1839 by Josiah
T. Miller, and was continued 10 years.

The Seneca Democrat, semi-weekly, was issued a short time from the same office.

The Seneca Falls Register was commenced in 1835 by J. K. Brown, and continued two years.

The Memorial was commenced at Seneca Falls in 1840 by An-

sel Bascom, and was continued till 1846.

The Water Bucket was published at Seneca Falls by an association of Washingtonians, in 1841.

The Free-Soil Union was commenced at Seneca Falls in August 1848, by N. J. Milliken, and continued about one year.

The Lily was commenced at Seneca Falls in 1849 by Mrs. Amelia Bloomer, and was continued till 1854, when it was removed

to Ohio.

The Seneca County Sentinel was started at Ovid about the year 1860 by A. S. Williams, who afterward sold to T. R. Lounsbury, and it was afterward published by —— Thompson, —— Jewett, Baldwin & Riley, and John Riley. It was then removed to Farmer Village and published by O. M. Wilson & Son. It was afterward removed to Trumansburg, Tompkins County, where it is still published.

The Seneca Sachem, a local monthly journal, devoted to industrial interests, was commenced at Seneca Falls in January, 1863,

by F. M. Baker, and was continued for several months.

The public works of the County are the New York Central Rail Road, which runs through Seneca Falls and Waterloo, and the Seneca Canal, which extends along the Seneca River, through the Above the falls at Waterloo, the Canal is formed by slack-water navigation on the river. A branch line of telegraph extends from Seneca Falls, through the County, to Ithaca, Tompkins County. The lands in Seneca County were first brought to the notice of the whites through the expedition of Sullivan's army, which passed along the banks of Seneca Lake in 1779. Portions of the County had then been cleared and were under cultivation, and the Indians had a tradition that this entire region was once occupied by a race given to the pursuit of agriculture, but which disappeared years ago. However that may be, numbers of the soldiers of Sullivan's command were attracted by the exceeding beauty and fertility of the land, and, after peace was concluded, settled in various parts of the County. The first settler was Job Smith, who located at Seneca Falls, in 1787, the second being Andrew Dunlap, who settled at Ovid, in 1789. Both came by way of the Chemung River. Lawrence Van Cleef was the third settler in the new County, at Seneca Falls. He was one of the 100 men despatched by Sullivan, under Col. G. Sansevort, directly east from the head of Seneca Lake, to lay waste the lands of the Cayugas, Oneidas and Onondagas, that had previously escaped the ravages of the in-

vading foe. Van Cleef came in by way of Oneida Lake and Seneca After 1790, settlement went on rapidly, and the fertile lands were speedily occupied and brought under tillage. In 1791, the State Road, popularly known as the Geneva Road, was constructed from Whitestown to Geneva, and soon became the grand highway of immigration. The County was formed from the most westerly portions of the Military Tract, and many of the settlers were soldiers who had there drawn their portion of public land. The land is admirably adapted to agriculture, which constitutes the leading pursuit, wheat and barley being the principal products. though other grains are cultivated to considerable extent. facturing is extensively carried on at Seneca Falls and Waterloo. two enterprising villages. During the recent war, Seneca bore her proportionate share with her sister counties in the great sacrifice which that contest involved. Of means she contributed with liberality, and her sons were found on every battlefield of the Union, firm in their defence of the sovereignty of constitutional So does she, like adjacent counties, have a claim on the public gratitude now, in the after-time, when the blessings of peace are so widely felt and so thoroughly appreciated.

GAZETTEER OF TOWNS.

COVERT was formed from Ovid, April 7, 1817, and Lodi was taken off in 1826. It lies on the west shore of Cayuga Lake. occupying the south-east corner of the County. The surface consists of upland, descending from the western border, and terminating in a steep bluff on the shore of the lake. This bluff rises 100 to 200 feet above the water, and the summit of the slope is about 400 feet higher. Trumansburg Creek, and a number of smaller streams flowing into Cayuga Lake, furnish the water advantages of These streams have worn ravines in slate and shales, varying in depth from 20 to 40 feet, and having nearly precipitous sides. During the summer months they generally are nearly dry, but during the rainy seasons they become fierce torrents, raging along their narrow channels, and bounding over steep precipices, to The soil consists of a mingle with the calm waters of the lake. gravelly and clayey loam, the whole surface being arable, except on the steep declivities of the lake bluffs,

The value of school property in this town in 1866 was \$7,340; the amount expended for common schools, \$3,507.56; the amount of public money apportioned, \$1,118.57; the aggregate of teachers'

wages, \$3,034.79, and the average daily attendance 321.

Farmer Village, (p. v.) in the north part, contains three churches, two hotels, a foundry, machine shop, and a printing office. A large steam saw mill was burned down in the early part of August, 1867. The village has formerly had a common school, which is now being organized into an union free school, with an academic department, which will be capable of accommodating 200 pupils. Farmer Village is three miles southwest of Kidder's Ferry, a landing on Cayuga Lake, and is a beautiful and thriving place. Covert, (p. v.) in the south-east part, Hall's Corners, (p. o.) near the center, and Kelly's Corners, (p. o.) in the north-west, are hamlets. Port Deposit, (Trumansburg Landing p. o.,) is a steamboat landing near the south-east corner.

Philip Tremaine, who located at Goodwin's Point sometime previous to 1793, was the first settler, but was speedily followed by Nathaniel, Reuben and Bassler King, who came from Dutchess County in 1793, and Jonathan Woodworth, with his sons Nehemiah, Charles and Oliver, and daughter Deborah, from Norwich, Conn., Miner and Joseph Thomas, in 1794. Turtellas King came to the town in 1795. The first religious service was held at the house of Mr. King, by Elder Thomas. The first church (Baptist) was organized in 1805, and was the first church formed in the County.

FAYETTE was formed from Romulus, as "Washington," March 14, 1800, and its name was changed April 6, 1808. Junius was taken off in 1803. It is located on the south bank of Seneca River, and extends from Cayuga to Seneca Lake. Its surface is rolling, and inclines toward the north. From Seneca lake the land slopes beautifully upward, furnishing some of the most delightful building sites in the County. Along Cayuga Lake the shores are lower, and in some places quite marshy. The highest point in the town is about 200 feet above Seneca Lake. The streams are mostly small brooks, flowing with rapid currents; at a few places they furnish a limited water-power. The corniferous limestone abounds in some parts, and is quarried both for lime and building purposes. The soil is a rich, deep loam, formed of sand, clay and gravel. Near Canoga village is an immense spring, in a basin 14 feet in diameter, from which flows sufficient water to form a valuable power. The spring also emits nitrogen gas.

The value of school property in Fayette in 1866 was \$11,310; the amount expended for common schools, \$4,543.58; the amount apportioned, \$1,411.36; \$3,788.26 was paid to teachers, and the average daily attendance was 382.

Canoga, (p. v.) in the north-east part, on Cayuga Lake, contains two churches, (Presbyterian and Methodist,) a grist-mill and two saw-mills. The name is derived from that of the spring before spoken of, which is an Indian word, signifying "sweet water." South Waterloo, a suburb of Waterloo, on the south bank of the Seneca River, contains a church, some manufactories, and about 600 inhabitants. Bearytown, (Fayette p. o.,) on the line of Varick, is partly in this town. It contains three churches, (Dutch, Lutheran and Methodist,) two hotels, a steam saw-mill, and a number of shops and stores. West Fayette, in the south-west corner, and Rose Hill in the west part, are post offices.

The first settlement was made by James Bennett, from Penn., who located on the shore of Cayuga Lake in 1789. Samuel Bear settled at "Schoyes," now South Waterloo, in 1795. Wm. Watkins kept the first inn, at South Waterloo, and Samuel Bear built the first grist-mill and saw-mill, at the same place. Red Jacket,

the celebrated Seneca Chief and orator, was born near Canoga Spring. There are eight churches in the town.

JUNIUS was formed from "Washington," now Fayette, February 12, 1803. Wolcott, (Wayne Co.,) was taken off in 1807; Galen, (Wayne Co.,) in 1812, and Seneca Falls, Tyre, and Waterloo in 1829. It is the north-west corner town of the County, and contains numerous small, isolated gravel and clay ridges, 30 to 75 feet in height, which extend in a general north and south direction. The numerous small streams which drain the town, flow north into Clyde River. A limited amount of swampy land is found among the narrow valleys in the east part, but aside from this, the soil is a good quality of gravelly loam.

Dublin, (Junius p. o.) north-west of the center, contains a church and 25 dwellings. West Junius is a post office near the south-

west corner, and Thornton's Corners is a hamlet.

The first settlements were made by Thomas Bedell and Jesse, Samuel, and David Southwick, about 1795. Among the early settlers were also families named Chapman, Brownwell, Fisk, Moore, French, Maynard, Thorn and Hart, mostly from New England. The first death was that of Mrs. Submit Southwick, in 1802. Joseph Moody kept the first store, at Dublin. He was Irish, and hence the name of the village. The first church, (Congregational,) was formed in 1811, and, three years after, it was changed to a Presbyterian. There are also two Methodist Episcopal churches in town.

The value of school property in this town in 1866 was \$2,830; amount expended for common schools, \$1,708.10; State funds apportioned, \$594.41; amount paid to teachers, \$1,548.58; average

daily attendance, 180.

LODI was formed from Covert, January 27, 1826. upon the east shore of Seneca Lake, and is the south-west corner town of the County. The surface is mostly inclined toward the west and north, only a small portion lying east of the summit. The bluff which borders on Seneca Lake is 150 to 250 feet above the surface of the water, while the highest points of the central ridge are 500 feet higher, being about 1,200 feet above tide. The principal streams are Mill Creek, which flows north-west through the center, and Sheldrake Creek, in the north-west corner. mer separates the highlands into two distinct ridges, with abrupt declivities, and along its course are several fine cascades. Lodi Falls presents one of the most romantic scenes to be found anywhere in the State, and deserves to be more widely known and generally visited. Here the creek has a precipitate fall of more than 125 feet over the bluff near the lake shore, and the water has worn a deep and tortuous channel into the shale rock a mile back from the face of the bluff. The scenery is of the wildest and most The walls of solid rock below the falls, rise to romantic character.

a height of over 200 feet, presenting a spectacle at once grand and impressive. The soil in this town is mainly a gravelly loam mixed with disintegrated slate and shale.

The school property in this town in 1866 was valued at \$4,745; amount expended for common schools, \$2,315.14; public money apportioned, \$772.21; amount of teachers' wages, \$1,937.16; average deily attendance 2007.

average daily attendance, 207.

Lodi, (p. v.) in the north part, contains a gristmill, two churches, and about 300 inhabitants. Townsendville, (p. v.) in the southeast part, has a church and 20 dwellings. Lodi Center (p. o.) is a hamlet, and Lodi Landing is on Seneca Lake, at the mouth of Mill Creek.

The first settlement was made by Geo. Faussett, from Penn., who settled in the south-west part in 1789, but did not bring his family to the then wilderness till the following year. In 1790, Jas. Jackson, also from Penn., settled in the north-west part, and Silas Halsey, from L. I., located at Lodi in 1792. The next year his sons and sons-in-law, and their families, in all comprising 18 persons, came on and joined the pioneers. A daughter of Geo. Faussett was the first child born. Peter Smith kept the first inn, and Silas Halsey built the first gristmill, in 1792. There are five churches in town.

OVID was formed March 5, 1794. Hector, (Schuyler Co.,) was taken off in 1802, and Covert in 1817. It lies south of the center of the County, and extends from Cayuga to Seneca Lake. Its surface consists of an arable ridge, 600 feet above Seneca Lake, and about 1,100 feet above tide, descending from a point a little west of the center, toward either lake. The bluffs on the lake are nearly perpendicular, and are 20 to 50 feet high. A great number of small streams flow into both lakes, the principal ones being Sheldrake, Osborn, Groves and Barnum Creeks on the east, and Sixteen Falls Creek on the west. These creeks have worn deep ravines in the shales, and their course is frequently interrupted by cascades, though in summer they are nearly dry. The soil consists of clay and gravel, mixed with sand and disintegrated rock.

Ovid, (p. v.) near the north line, is an incorporated village of about 720 inhabitants. It contains a neat and substantial Court House and County Clerk's office, four churches, an axe factory, and a fine steam mill for grinding flour, grain and feed, sawing lumber, planing, matching, etc., which has recently been completed and put in operation. The Town Fair Grounds are a short distance southwest of the village. It was formerly the seat of Ovid Academy, the name of which was changed in 1855 to the Seneca Collegiate Institute. It subsequently passed into the hands of the East Genesee Conference, and became what is now widely known as the East Genesee Conference Seminary. This is a flourishing institution,

with a faculty comprised of a Principal and five teachers. Seminary building is of brick, four stories high, 150 feet long, and capable of accommodating over 200 pupils. It has one of the finest locations of any institution of learning in the country, being situated on an elevated point of ground, commanding one of the most magnificent and extensive views anywhere to be found. cupola of the building the eye may sweep over nine different counties of the State, viz: Schuyler, Yates, Ontario, Wayne, Onondaga, Cayuga, Tompkins, Steuben and Seneca. Within this vast area lie lakes Seneca and Cayuga, embowered in delightful groves and lined with smiling farms, while the vast breadth and variety of the scene gives rise to peculiar delight in the beholder. The unfinished building designed for the New York State Agricultural College, with the farm purchased for that purpose, is located a short distance west of the village, on the north line of the town. The institution was incorporated in 1853, and the buildings were soon after The farm purchased to enable the project to be carcommenced. ried out, comprised about 600 acres, delightfully situated, and embracing some excellent land. It was designed to put up a main building with 90 feet front by 132 deep, having a wing on each side 84½x60, with transverse wings 58x128. The south wing was completed, when the project failed for want of funds. The property has now passed into the hands of the commissioners of the Willard Insane Asylum, which is being built a little farther west, near the shore of Seneca Lake. This is designed to be one of the most complete institutions for treatment and cure of the insane in this country, and under the energetic supervision of Dr. Congdon, President of the Board of Commissioners, the buildings are being rapidly pushed forward to completion. We cannot more fully set forth the object and purpose of the Willard Insane Asylum, than by publishing the following correspondence between Dr. Franklin B. Hough, Secretary for the preparation of the Statistical Manual used by the Constitutional Convention, and Dr. Congdon:-

"Office for Preparation of Statistical Manual, Albany, May 1st, 1867.

"SIR:—We wish to procure a brief statement concerning the Willard Asylum for the Insane—the objects, location, what is done, and what is in progress.

"As our time is very brief, I hope to hear from you soon, and if possible by return mail. We want this information for the Manual.

"Yours truly,

B. F. HOUGH,

Sec'y Convention."

"Dr. Congdon.

"Office of the Commission for the Willard Asylum) for Chronic Insane, Ovid, May 6, 1867.

"DR. FRANKLIN B. HOUGH:-

"Dear Sir:—In answer to your questions in regard to the "Willard Asylum for the Chronic Insane," I reply—

"First, The general statute now makes it the duty of all County Officers, on taking charge of insane poor, to send them to the State Lunatic Asylum at Utica, or make such other provision as they may deem necessary.

"The overcrowded state of the Asylum at Utica renders it necessary, if these patients do not recover in a few months, that they be sent back to the County Houses from whence they came. Under this system, the County Houses of the State, according to the official report of the late Dr. Willard to the Legislature of 1865, contain 1500 insane persons, many of whom are in the most loathsome condition, without a single provision to mitigate the sufferings consequent upon their unfortunate mental condition.

"Second, It is a well settled fact that a much larger per centage of the chronic insane are orderly and inclined to labor, than of recent cases; hence, larger numbers of the former may be congregated together than of the latter; many of them needing little or no treatment, simply something to do—mechanical or farm labor under proper surveillance.

"Third, The statute of 1865 organizing the Willard Asylum for the Chronic Insane, directs that these rejected cases, or cases of over one year's standing, shall be sent to the Willard Asylum at Ovid, and, so far as practical, that those now in the County Poor Houses shall also be removed to the same place. Thus it will be seen that the object of the 'Willard Asylum for the Chronic Insane' is to break up the system above described, of consigning these unfortunates to the loathsome cells of our County Poor Houses, and to send them

ple provisions for employment for those who are inclined to labor, hence rendering the Asylum, as far as possible, self-supporting. "Fourth, The 'Willard Asylum for the Chronic Insane' is located on the east shore of the Seneca Lake, and embraces the farm known as the State Agricultural Farm, which contains about 500 acres of

where they can have the benefit of a curative institution, with am-

good land, well watered and abounding in beautiful scenery.

"The hospital building now in course of construction is located on a bluff, 60 feet above the level of the lake, and 300 feet from the shore, with beautiful ravines on either side, thickly wooded with oaks and pines. Two first-class steamboats make four landings each week day during the year, at the dock in front of the hospital, on their respective trips from Geneva to Watkins and return, and from Watkins to Geneva and return.

•

"Of the 340 lineal feet by 40 feet width of the hospital building now in course of construction, 170 is nearly ready for receiving the roof, and the balance is rapidly progressing and will likewise be ready for the roof in the course of three or four weeks.

"The foundation and basement story of a center building, 60 by 70 feet, designed for Superintendent departments and offices &c., are completed. The excavation is made, and a portion of the foundation walls laid for the rear building, designed for chapel, workshop, culinary purposes, engine house, &c.

"Three appropriations have been made by the Legislature:-

		-	•
lst,	1865		\$ 75,000
2d,	1866		50,000
3ď,	1867		. 100,000

Whole amount,.....\$225,000

"There has been expended in the purchase of the farm, including the agricultural college building,.....\$37,000

For work and material for hospital building, 88,000 125,000

"The balance, \$100,000, it is estimated, will inclose the work begun and furnish the material for its completion.

"The college building will accommodate 200 quiet patients, but cannot be used for violent cases. Patients will be put into it as soon as some portion of the hospital building can be put in condition to receive violent cases, thus enabling a proper classification.

"Very truly yours, L. CONGDON, President Com."

Ovid Landing is just over the town line, in Romulus. Sheldrake Point, (Sheldrake p. o.) a steamboat landing on Cayuga Lake, contains one church, a steam saw mill, boat-yard and 160 inhabitants. Ovid Center contains about 20 houses. Kidder's Ferry, (p. o.) near the south-east corner, and Scott's Corners, near the center, are hamlets. A fine sulphur spring exists in the south-west part of the town.

The town of Ovid contains many splendid farms, conspicuous among which is that of the Coleman Bros., on Cayuga Lake, known as "Lake View Farms." These farms, which comprise about 400 acres, are three miles north-east of Farmer Village, between Kidder's Ferry and Sheldrake Point, and command a fine view of Cayuga Lake, reaching through about 30 miles of its length. The Coleman Bros. are extensively engaged in breeding blood horses, principally of the Hambletonian, American Star and Bashaw stock. They are breeding some of the most valuable trotting stock in the country, having now two stallions, which are half brothers of the celebrated Dexter, and a number of brood mares, rich in Messenger blood. Their stock is said to be the best west

of Orange County.* They have now a stud of thirty blood horses,

and are rapidly increasing and improving their stock.

The value of school property in this town in 1866 was \$7,725; the amount expended for common schools, \$3,075.02; amount of public money apportioned, \$1,134.14; amount paid to teachers, \$2,443.48; average daily attendance 267.

The first settlement was made in May, 1789, by Andrew Dunlap, from Penn., who located on lot No. 8, in the north-west part of the town. The early settlers, who were mostly from Pennsylvania and New Jersey, followed the line of march of Sullivan's army, and located in the west part of the town. Among them were Wm. Dunlap and Joseph Wilson, from Penn., Peter Smith, from New Jersey, and Henry Wharton, in 1789; Elijah Kinne, from Dutchess County, and John Seeley, from Saratoga County, in 1792; Nicholas and Richard Huff, Peter Hughes, Abraham De Mott and his son James, in 1793; Abraham Covert and his son Abraham A., from New Jersey, in 1790; and William and Robert Dunlap and Teunis Covert, in 1794. In the snmmer of 1795, Jonas C. Baldwin settled on lot 11, where he remained till 1801, when he sold and removed to Lysander, Onondaga Co., and laid the foundation of Baldwinsville, in that County. of Andrew Dunlap, was the first child born, February 2, 1793, and the first death was that of George, a brother of Andrew Dunlap, Sept. 24, 1791. A triple marriage, in 1793, was the first in The parties were Joseph Wilson and Anna Wyckoff, Abraham A. Covert and Catherine Covert, and Enoch Stewart and Jane Covert. They were obliged to cross Seneca Lake in order to find. a justice authorized to perform the ceremony. They walked to the lake, crossed in a small boat, and on the opposite side found a justice named Parker, who married them. Of that primitive wedding party, one, Abraham A. Covert, still lingers among the living, while the others have long since passed to the unseen world. Benjamin Munger taught the first school, in 1795, John McGrath kept the first store, in 1797, and the first inn, in 1800. B. Boardman built the first mill, in 1793. The first settled preacher was John Lindley, who settled in town in 1800, but the first religious service was held at the house of Abraham Covert, in 1794. first town meeting was held at his house April 1, 1794. The town then embraced both Lodi and Covert. The following record of that Town Meeting is taken from a copy in possession of Mr. John B. Bliss of Ovid. The ancient document bears evidence that the schoolmaster had not been abroad through that section.

"At a Town Meeting held in the Town of Ovid in the County of Onondaga on Tuesday the first day of April 1794 For Chusing

^{*}See letter of Mr. Elderkin to "Wilkes' Spirit of the Times."

Town Officers the Freeholders and Inhabitants of said Town being

meet proceeded to their choise as Follows Viz:

"Silas Halsey, Supervisor, Joshua Wickhoff Town Clerk, Elijah Kinne, Abraham Covert and George Fassett, Assessors, Abraham Seburn, Collector, Elijah Kinne and Andrew Dunlap Overseers of the Poor, James Jackson, John Livingston & John Selah, Commissioners of Highways, Abraham Seburn, Constable, Elijah Kinne, Abraham Covert & George Fassett Overseers of Highways, Henry Scivinton, Daniel Everts, Elijah Kinne, John Selah, James Jackson, & Samuel Chriswell, Fence Viewers, Thomas Covert Pound Master.

"Also voted that Hogs run free Commoners for the year Insu-

ing. "Also voted that every fence be $4\frac{1}{2}$ feet high to be accounted

"The above Town Meeting held the first day of April in presence of me

SILAS HALSEY, Justice of the Peace."

Of the town officers then elected, Andrew Dunlap survived till 1851, when he died at the advanced age of 91. His death took place within a few rods of the spot where he built his first log cabin, and on the same farm where he had passed 63 years of his Of those who attended that Town Meeting, Abraham A. Covert still survives, being in his 96th year. He was a voter at the first general election, and has never failed to deposit his ballot on every similar occasion but one, when he was confined to his house by sickness. The first military organization in the town was effected by electing Elijah Kinne, Captain; Andrew Dunlap, Lieutenant, and Joseph Wilson, Ensign.

On lot 29, within half a mile of the south line of the town, and exactly on the dividing ridge between the two lakes, once existed a mound, or fortification, of irregular, elliptical form, inclosing about three acres, and surrounded by an embankment of earth, which, in 1801, was about three feet high, with a base of five to eight feet wide. George BoDine, the proprietor, removed here in 1802, and built a house within the inclosed space, where he has since lived till within a few years. The work bore evidence of great antiquity, the timber inside being of the same size and appa-Upon the bank and in rent age of that of the surrounding forest. the ditch, large oak trees-the growth of centuries-were standing. In the embankment were several openings, a few feet in width, which were probably used as entrances. In making an excavation for a cellar, on the east side, six skeletons were found at a depth of about two feet. This was in 1857, and several had been found previously, and though the softer parts of the bones had disap-

peared, the teeth and a few of the larger bones yet remained. side the embankment, pieces of a coarse species of pottery, orna-DeWitt Clinton visited the mental pipes, etc., are still found. place in 1810, and his theory was, that this was one of a series of similar defenses found occupying the most commanding positions in Western New York, and in the valleys of the Ohio and Mississippi, erected by a race more civilized than the Indians, preceding Their origin and end, if such the later occupation of the country. a race existed, are alike a mystery; their annals defy human research, and their history, which would contribute much to science, must forever remain a sealed book. The Indians were unable to give any account of this fortification; its age reached far back of their oldest traditions.

ROMULUS was formed March 5, 1794. Fayette was taken off in 1800. It lies south of the center of the County, and extends from Cayuga to Seneca Lake. The surface is rolling or moderately hilly, and has a general inclination toward the north. The high bluff from Ovid extends into the south border of the town, where it drops abruptly down about 200 feet. The land slopes from the center toward the east and west, and the streams are mostly small, flowing in deep channels, as is the case in most parts of the County. The surface is generally smooth and nearly all arable, the soil consisting of a gravelly and clayey loam.

Romulus (p. v.) on the line of Varick, contains a church, steam saw mill, female seminary and about 40 dwellings. Hyatt's Corners, in the south-east, contains 20 dwellings; Romulus Center is a post-office, Whitney's Landing is a station on Cayuga Lake, Cooley's and Freleigh's Points and Ovid Landing are stations on Seneca

Lake.

David Wisner made the first settlement, in 1789. On the high-way leading from Ovid to Romulus, in the town of Romulus, stands an ancient, weather-stained house, known as "Gidding's Old Stand," which was one of the first frame taverns erected in the County, and was for a long time a popular resort for people from far and near.

The school property in this town in 1866 was valued at \$4.700; \$2,779.90 was expended for common schools, the amount apportioned being \$1,061.91; \$2,246.28 was paid to teachers, and the

average daily attendance was 270.

SENECA FALLS was formed from Junius, March 26, 1829, and is located on the west shore of Cayuga Lake, north of the center of the County. The surface is nearly level, and lies 30 to 50 feet above the level of the lake, which here has a low, shelving shore. The north portion is swampy. Seneca River flows through the center of the town, in a north-easterly direction, dividing it into two distinct parts. The river flows over a succession of ledges into a deep chasm which appears to have been worn by the water.

tensive gypsum quarries have been opened south and west of the village. The soil is a stiff, hard clay in the south and east, a sandy loam in the north-west, and a vegetable muck in the north-east.

The value of school property in this town in 1866 was \$8,550; the amount expended for common schools, \$5,204.95; amount apportioned, \$1,809.24; amount paid to teachers, \$4,044.70 and average daily attendance 506.

Seneca Falls, (p. v.) on the Seneca River, near the center of the town, is an important village of 5,307 inhabitants, according to the census of 1865, and is a station on the N. Y. C. R. R. and the Sene-The materials for the present sketch of its history have been drawn mainly from a history of Seneca Falls, written by Mr. Henry Stowell, about the year 1862. This town was the first made by white settlers in the extensive wilderness reaching from Whitestown, (Utica,) to the Niagara, and was called by the Indians, Sha-se-onse, "running or swift water," from the rapidity with which the river current runs. Job Smith, who came from Ulster County in 1787, was the first settler, and located on the Flats, just below the subsequent site of Col. Mynderse's upper Red Mill, being the first one to settle on what was then known as the "Military Tract." Smith appears to have been of a roving, unsettled character, and, withal, not over-scrupulous regarding the principles of honesty and fair dealing. Indeed, it is said that he was a fugitive from the law, and had purposely hid among the Indians to escape the hand of justice. He came via the Mohawk and Seneca Rivers, subsisting on corn, pounded in an old-fashioned mortar, together with wild game from the forest and salmon from the river, both of which were then abundant. A traveler, who, with a party, passing up the river in 1788-9, was by him assisted over the Falls, represented him as living alone, owning a yoke of oxen, and carrying on a small traffic with the Indians. In transporting the party around the Falls, he used a cart, the wheels of which were sawed entire from logs. Smith did not remain long at the Falls, but soon moved to the locality of Waterloo, where he married a Miss Gorham, and afterward returned to his old site. ther did he remain long this time, but soon decamped, and was not seen again in that vicinity till 1813, when compelled to attend court as a witness in several important land suits then pending. In 1779, Gen. Sullivan's army, coming up the Susquehanna, passed down the eastern shore of Seneca Lake, through this County, carrying destruction to the Indian villages, and dismay to the hearts of the unfortunate and unhappy red men. On the return from the Genesee Country, when the army had reached the present site of Geneva, Major Gansevort was detached, with 100 men, to march through the country of the Cayugas, Onondagas and Oneidas, direct to Albany. After parting with Gen. Sullivan, Major Gansevort

encamped the first night at Seneca Falls, near the north bank of the river, and was particularly impressed with the fertility of the soil, the vast water power, and the beautiful scenery. In the detachment commanded by Major Gansevort was Lawrence Van Cleef, a veteran of the Revolution, who, in the spring of 1789, returned to the Falls, located on the Flats, near Job Smith, where he built a double log house, the first built there, and became the first per-After building his house, he planted corn upon manent settler. the Flats, but was so annoyed by the Indians as to render his efforts to cultivate the soil at that time difficult and almost abortive. He was finally successful in bringing about amicable relations with his troublesome neighbors, and from that time continued to prosper. In the fall of '89, Van Cleef brought his family from Albany, and, during the following year, in company with Job Smith, procured a team and truck, making the latter themselves. The truck was innocent of iron, but served a good purpose in transporting the rapidly increasing number of emigrants to the west, around the Falls. Subsequently they constructed rude craft on Seneca Lake, and Van Cleef became famous for his skill in piloting boats over the rapids, continuing that business till interfered with by the building of the Mr. Van Cleef was a plain, hardy man, generous and kindly of disposition, and is spoken of with respect and esteem by those now living who remember him. His death occurred in 1830, and he was buried on the spot where he built his camp fire in 1779. Mrs. Jane Goodwin, his daughter, was born Nov., 29, 1790, being the first white child born in Seneca Falls. She was the mother of Edward and Chas. D. Mynderse. Mrs. Joseph Harpst was also a daughter of Mr. Van Cleef. He kept the first tavern, in the double log house before referred to, and also put up the first frame building in the place, into which he moved his family in 1794. It was located on Fall street, on the present site of the "Mirror Block." A Mr. Parkus, from Connecticut, came with his family about this time, and occupied the log house left by Van Cleef, continuing the His was the second family in the new town. There were several families in 1795, but they were destitute of religious and educational privileges, and also of medical aid in time of sickness. Previous to that year Dr. Holbrook visited the place, but did not locate, and the first permanent physician was Dr. Long, who settled there in 1806-7. The first death was that of Job Smith's wife, which occurred in 1793.

In 1794, Robert Troop, Nicholas Gouverneur, Stephen N. Bayard, and Elkanah Watson, purchased at the State sale, 100 acres of land on the north side of the river, at the Falls, including the greater part of the water power on that side, for \$2100. In 1795 they sold one-fifth of their purchase to Col. Wilhelmas Mynderse, including the water power in the sale. Mynderse became then an active

In 1825 a flouring mill was put up by Messrs. Abram and Samuel Payne, which gave an added impetus to business, and directed the attention of others to the improvement of the idle and immense water-power. J. M. Coleman commenced the first brick building, on the north side of the river, in 1826, and occupied it as a dwelling and harness shop till 1860, when it was purchased by Messrs. Henry Seymour and John Cuddeback, torn down and supplanted by the present substantial block. In 1827 Joseph Failing built the Clinton House, which was purchased by Thomas Carr in 1856, and having been much enlarged and improved, is now known as the Hoag House. The Franklin House, south side of the river, was built in 1828, and opened in 1829. In the same year, Sackett's Block was built, on Bridge street, which, at that time, was the finest block in the village, and was the principal center of its mercantile business. The first newspaper published at Seneca Falls was called The Seneca Falls Journal, and was established in August, 1829, by O. B. Clark, who continued to publish it till 1831, when he removed to Cold Water, Michigan. In a letter afterward written, he says: "The village of Seneca Falls, in 1828, I think contained but one brick building, and if I recollect right, did not exceed three hundred inhabitants. The south side of the river was occupied for farming purposes, and the buildings were an old log house and a frame barn."

An Act to incorporate the village, passed the Legislature, April 22, 1831, and on the first Monday of the following May, Ansel Bascom was chosen President of the Corporation. A new charter was granted by the Legislature, April 24, 1837, under the provisions of which the officers to be elected were a President, six Trustees, (three from each ward,) two Assessors, one Police Constable, and two Street Commissioners. At the first election held under the new charter, on the fourth Monday in May, John L. Bigelow was elected President; D. B. Lum, Police Constable; Ebenezer Ingalls, Whiting Race and Asa Starkweather, Trustees for the First Ward; F. B. Latham, Carlton W. Seely and Jeremy Bement, Trustees for the Second Ward; Isaac Smith, Assessor; and Geo. B. Daniels and Theodore Chapin, Street Commissioners.

In May, 1832, a subscription was started in order to raise funds for the building of an academy, Col. Mynderse having donated a lot for that purpose. The first meeting of the stockholders found recorded, was held in the tavern of D. Watkins, July 12, 1833. Jenathan Metcalf was selected for Chairman, and Charles L. Hoskins, Secretary. The Trustees reported that they had received the deed of the lot from Col. Mynderse, and had contracted for the construction of the building, at a cost of \$1,665.32; that the building had been finished to the extent of the contract, to their satisfaction,

except the cupola; that the Trustees had expended \$1,666.32, and there were unpaid subscriptions remaining to the amount of \$508.80. Application was afterward made to the Regents of the University, for incorporation, under the title of the "Seneca Falls Academy," but the petition was refused on the ground that the institution was not sufficiently endowed. Canton M. Crittenden, the first Principal, commenced teaching in 1833, and in 1837 the Academy was incorporated by special act of the Legislature, entitling it to participation in the Literary Fund as soon as the Regents were satisfied that it had complied with the requirements under which they had authority to incorporate the same.

Previous to the year 1839, the manufacturing interests of Seneca Falls, aside from the trade in leather, flour and paper, had been of comparatively trifling importance, but in that year Thomas I. Paine and Noah Caldwell commenced the manufacture of pumps, and it was then predicted that business would receive a new and lasting impetus. And such proved to be the fact, and though Messrs. Paine & Caldwell met with many discouragements, and were finally compelled to abandon the business, they sowed the seed from which their more fortunate successors are reaping a bountiful harvest.

The Seneca Woolen Mills were built in 1844, and the Company opened business in the same year. They manufactured extensively till 1854, when, by special act of the Legislature, the Company went into liquidation, and the "Phœnix Company" was organized. A portion of the time during the war, the mill run on army and navy goods, doing a heavy business. In March last the Company was re-organized under the name of the "Phœnix Mills," and they are now manufacturing first class fancy cassimeres and beavers. This Company has three mills, styled No. 1, 2 and 3, and run 24 sets of woolen machinery of the most approved kind. The main building is of stone 50x130, and five stories high, while the storehouses, office, machine shop etc., are all of brick, built in the most substantial manner, and covered with slate roofs, in order to be as near fire-proof as possible. The present officers are Albert Jewett, President; LeRoy C. Partridge, Treasurer; J. G. Mackintosh, Secretary. The Company is endowed with a capital stock of \$1, 000,000, and employs 600 operatives. Stock to the value of \$750, 000 is annually consumed, while the value of manufactured products is \$1,250,000. \$15,000 per month is expended for labor. In the year 1848, Horace C. Silsby, in connection with Birdsall

In the year 1848, Horace C. Silsby, in connection with Birdsall Holley and Washburn Race, commenced to build the "Island Works," on Dey's Island, at the foot of Fall street. Mr. Silsby became a resident of the place in 1836, and in company with William Wheeler and William C. Silsby, began the manufacture of axes and edge tools, in a building which they erected on the corner of Fall street, nearly opposite the Fork Factory. In the fall of 1837,

Mr. Silsby purchased the dry goods store of S. M. Giddings, and pursued the business till 1840, when he bought the hardware store of C. D. Mynderse, and, in connection with various parties, continued in the hardware trade up to 1857. In 1847, Mr. Silsby formed a co-partnership with Abel Downs, John W. Wheeler and Washburn Race, for the manufacture of pumps, stove plates and regula-A year following, Edward Mynderse became a partner in the concern, and, Mr. Wheeler having retired, two companies were formed, that of Downs, Mynderse & Co., for the manufacture of pumps of all kinds, both wood and iron, and W. Race & Co., for the manufacture of stove plates and regulators. Mr. Silsby was a member of both firms, by whom their respective branches of business were conducted till 1851, when S. S. Gould succeeded Messrs. The "Island Works" Silsby & Mynderse in the pump business. at this time were firmly established and doing a flourishing business. In 1856 the establishment was enlarged, Washburn Race and Birdsall Holley retiring, and Edward Mynderse and John Shoemaker becoming partners. Since that time several changes in the firm have taken place, and the business is now conducted by Mr. Silsby, who, in energy and business talent, has few equals. He is sole manufacturer of the celebrated Rotary Steam Fire Engine, a machine whose extraordinary power and durability have never failed to establish their superiority when brought into fair competition with other engines.

"The governing features of the machine manufactured by Mr. Silsby, are Holley's Patent Elliptical Rotary Pump and Engine, and M. R. Clapp's Patent Circulating Tube Boiler. For the former, Letters Patent were granted to Birdsall Holley, Feb. 6th, 1855. This engine and pump consists of two elliptical cams, or pistons, working into each other within an air-tight case. These cams contain four chambers, upon which the steam or water acts alternately in such a manner as to secure great power, with a low steam pressure, and a constant and steady supply of water. While one chamber (for example) has just discharged, another is discharging, a third is ready to discharge, and a fourth is filling; thus, by a perfect system of supply and discharge, entirely obviating the dead points existing in piston engines and pumps, while passing the

centre, or while the plunger is going down.

"The boiler was patented June 12th, 1860, by M. R. Clapp, and consists of a novel arrangement of water tubes, one within the other, arranged so as to secure rapid generation of steam, and prevent, by constant circulation, the formation of scale or sediment on the boiler, and do away with all tendency to foam or prime in working dirty or salt water. These boilers are believed to be the only ones applied to Steam Fire Engines in the United States, capable of using salt water, in which respect, we learn, they have been thoroughly

tested by actual service, in several instances, at Providence, R. I., and Galveston, Texas. Both of the above patents are now exclusively owned by Mr. Silsby.

"The main points of advantage claimed for the rotary over the

piston Steam Fire Engines, are as follows:

"1st. Low pressure of steam. The manufacturer claims that the rotary will do the same work with 40 to 60 lbs. pressure, against 125 to 160 of the piston engine.

"2d. Steadiness of operation. A glass of water has been placed on the wheel while the machine was running to its fullest capacity,

without spilling a drop.

"3d. Simplicity of construction, absence of all valves and con-

necting rods, no centres to pass, nor rubber valves to rot out.

"4th. Uniform pressure on the leading hose, avoiding the jerking motion usual in piston machines. It is claimed that with these engines a pressure of 150 lbs. to the square inch can be put upon hose that cannot stand the blows of a piston at 100 lbs. pressure.

"The builders claim that a Steam Fire Engine using less than one-half the amount of steam required to operate the piston, will do the same work, last longer, and cost less for repairs. It is a fact, proved by experience, but perhaps not generally understood, that in all large cities the cost of hose is more than double the cost of engines and repairs, and hence the machine which does the same or a greater amount of service, with less wear and tear of hose, is the one to use. Thos. B. Lyons, Chief Engineer of the Fire Department in Mobile, writes to Mr. Silsby, that his Department has in use two Rotary Engines manufactured by H. C. Silsby, and five Piston Engines of different make, and that while the Rotaries do more service without bursting, the Piston Engine damages hose to the amount of \$25 or \$30 at each fire where they go into service."

Aside from the manufacture of steam fire engines, Mr. Silsby also deals in patent nozzles, fire hats and belts, badges, hose and couplings, signal lamps, and all fire apparatus. Eleven buildings are occupied, viz: one machine shop 50x60, two stories; one machine shop 126x36, two stories; one machine shop, 40x56, three stories; one blacksmith shop 20x60, one blacksmith shop 80x50, an iron foundry 50x80, a brass foundry 16x20, a boiler shop 36x40, paint and finishing shop 80x22, persmith shop 20x30, storehouse 25x35, coal-house 30x32, and office 20x40. 140 mechanics are employed, whose payrolls amount to \$110,000 per annum. \$120,000 worth of stock is annually consumed, and steam fire engines to the value of \$225,000 are manufactured, beside which the item of rotary pumps, hose-carriages and hose-couplings amount to \$85,000 a year. These steam fire engines are in use in the principal cities of the United States, and are deservedly popular.

In 1840 Abel Downs commenced the manufacture of pumps in the wing of the "Old Cotton Factory," which was destroyed by fire in 1853. He erected a small furnace over the river, and at that time employed but five men. After continuing in the business about two years, he returned to the mercantile business, at the same time purchasing an interest in the hardware trade. he returned to the pump busines, and in company with John W. Wheeler and Smith Briggs, under the firm name of Wheeler, Briggs & Co., purchased the "Old Stone Shop," into which their machinery was moved, and a steam engine introduced to drive the machine-This was the first instance in which steam was applied to manufacturing purposes in the place, and in that establishment was made the first iron pump manufactured in Seneca Falls. In 1846. Washburn Race, having received a patent for his improved stove regulator, entered the firm, as subsequently did Messrs. Silsby and Thompson, obtaining an interest in the Regulator. Previously the pump firm was styled Wheeler & Downs, and the regulator firm Wheeler, Downs & Race. After the purchase the regulator firm became W. Race & Co., and the pump firm Wheeler & Downs. H. C. Silsby and E. Mynderse afterward became interested in the pump business, when the firm was Downs, Mynderse & Co., Mr. Wheeler retiring. The business was continued by this firm till 1851, when Seabury S. Gould purchased Mynderse' interest, and the firm became Downs, Silsby & Gould. Mr. Silsby retired in the fall of the same year, when the firm of Downs and Co. was formed, which has since undergone various changes, and is now the Downs & Co. Manufacturing Company, which is engaged in the manufacture of suction and force pumps, garden engines, Burrall's Patent Corn Sheller, thimble skeins, pipe boxes, jackscrews, sad irons, amalgam bells, and other articles of hardware. buildings are occupied, and employment given to 175 men, whose The value of raw material pay-rolls amount to \$1,500 per week. annually consumed is \$200,000, the manufactured products amounting to \$250,000. In 1840 John P. Cowing became a resident of the place, and, in company with Henry Seymour, commenced the manufacture of pumps in the "Old Clock Factory." In 1843 they removed into the "Red Shop," and in 1847 dissolved partnership, Mr. Seymour carrying on the business till 1854. In 1847 Mr. Cowing and Henry W. Seymour commenced the pump business in the old Cultivator Shop. In April 1849 their furnace burned down, was immediately rebuilt, and again burned in December of the same year. John A. Rumsey became a partner in 1849, and they bought the old Clock Factory. In January 1851 their furnace, together with the old Cultivator Shop, was again destroyed by fire, and, in the great fire of 1853, most of their buildings were again destroyed, with a great amount of valuable machinery. They then commenced the erection of the splendid buildings which they now occupy. In 1859 Mr. Seymour retired from the firm, as Mr. Rumsey has also done since. Cowing & Co. manufacture hand fire engines, pumps, hydraulic rams, and other machines and apparatus pertaining to hydraulics. No other firm in the village has had to contend with so many misfortunes as have fallen to the lot of Cowing & Co., but they have triumphed over all reverses, and are now enjoying a large and profitable business. Nine buildings are occupied in carrying on the various branches of their business. From 60 to 110 men are employed as the variations of circumstances may require; \$45,000 a year is paid out for labor, and \$85,000 for materials. The annual value of manufactures amounts to \$135,000. 1000 tons of pig iron, 60 tons of coal, and 150 tons of sand are annually used.

Among the later firms is that of Rumsey & Co., manufacturers of iron and brass lift and force pumps, garden and fire engines, steel amalgam bells, hydraulic rams, etc., etc. This company was organized in ——,* with a capital of \$100,000, and are now doing an immense business. 100 to 125 men are employed, whose weekly wages amount to \$1,200. 1,200 tons of pig iron, 600 tons of coal, and 300 tons of sand are yearly consumed, while 50,000 pumps, at

a value of \$300,000, are turned out.

The Seneca Falls Churn Manufacturing Company was organized in April, 1866, with a capital of \$100,000, and are engaged in manufacturing Westcott's Patent Adjustable Dash Churn, which was first patented in August, 1863, the improvements being patented in April, 1865, and November, 1866. The manufactory is 45 by 100 feet, three stories, with a drying house underneath. The lumber, etc., used in constructing these churns amounts to \$45,000 per year, while 20,000 churns of all sizes, valued at \$200,000, are annually made. \$14,000 is paid out yearly for labor, while the fees of agents amount to a much greater sum.

Besides the establishments already mentioned, there is an extensive malt house, a steam bending factory, and several flouring mills, which do a large business. There are two newspaper offices, six churches, two banks, and four or five hotels. The schools are being remodeled on the graded plan, and will hereafter be conducted under that excellent system. Of recent historical events Seneca Falls makes no boast, although the "dress reform" movement was commenced here in 1849 by Mrs. Amelia Bloomer, who afterward removed to Ohio. Mrs. Bloomer seems to have exemplified the old scriptural adage, "A prophet is not without honor, save in his own country," and her, no doubt, well-meant efforts to revolutionize the prevailing customs of ladies' dress, seem to have been received with quite as little favor among her sex in that place as

^{*}See Errata, Seneca Falls.

elsewhere. The Seneca Falls Union Agricultural Society was organized in August, 1859, held its first Fair in 1860, and was incorporated in 1861. The Town Fair Grounds are finely situated about one mile south of the village.

TYRE was formed from Junius, March 26, 1829, and is the north-east corner town of the County. The east half is swampy, being the southern termination of the Montezuma Marshes. The west half is occupied by peculiar drift ridges, similar to those found in Junius, and already described. These ridges are 30 to 50 feet high, and generally have very steep declivities on all sides except One of the longest of these, in the west part of the town, extends nearly two-thirds of the distance from the south line to the north. Its summit is nearly level, and the road located on it has the appearance of being built on an artificial embankment. The soil is clay and muck in the east, and gravelly loam in the west.

Tyre City, (Tyre p. o.,) near the center, contains two churches

and 20 dwellings. Cruso is a post office on the north line.

The first settlement was made by Ezekial Crane, from New Jersey, who came in 1794. Asher Halsey, from New Jersey, came in 1798. Among other early settlers were Stephen Crane, Peter and Ezra Degarun, Robt. Gould, Thos. Susson, Lewis Winans, and Thos. Rosevelt. Daniel Crane was the first child born. marriage was that of James Cook and Betsy Woodworth, and the first death that of Ezekial Crane, the first settler. Nancy Osman taught the first school, in 1804; Stephen Crane kept the first inn, in 1809; Nicholas Traver built the first sawmill, in 1807, and Noah Davis the first gristmill in 1817. The first church, (Baptist,) was formed in 1805, Elder Don Ralph being the first preacher. There are now four churches in the town.

The value of school property in this town in 1866 was \$4,600; the amount expended for common schools \$2,574.45; public money apportioned, \$513; amount paid for wages of teachers, \$1,454.54;

average daily attendance, 176.

VARICK was formed from Romulus, February, 6, 1830. It also extends across the belt of country between the two lakes, near the center of the County. Its surface inclines slightly toward the north, and the slopes of the ridges are so gradual that nearly all parts are capable of cultivation. The streams are small and unimportant, and near the center is a cranberry swamp of about 800 acres, from which great quantities of that fruit are annually gathered.

In 1866 the school property was valued at \$574; the amount expended was \$2,821.98; the amount apportioned \$972.50; sum

paid to teachers \$2,368.89; average daily attendance 223.

Bearytown (Fayette p. o.,) is on the line of Fayette, and is spoken of in connection with that town. Romulus (p. v.) lies on the south border. East Varick (p. o.) is a landing on Cayuga Lake. McDuffee Town is a hamlet in the south-east corner, and Varick is a post office.

James McKnight made the first settlement, in 1789. The first child born was a son of James McKnight, in 1791. There are

three churches in town.

WATERLOO was formed from Junius, March 26, 1829. It lies on the north bank of Seneca River, north-west of the center of the County, and its surface consists of almost an unbroken flat. An extensive marsh occupies the north-east corner, and another stretches east and west through the town, south of the center. Through this central swamp flow the waters of Black Brook, which are impregnated with earthy and vegetable matter, and possess the peculiar quality to clear the inside of steam boilers of the incrustations of sulphate and carbonate of lime caused by using hard water. The bed of Seneca River, along the south boundary, is nearly level with the general surface. The soil consists of muck and clay in the north and east, gravel along the north border, and sandy loam in the central and western parts.

Waterloo, (p. v.) on the Seneca River, near the south border of the town, was incorporated April 9, 1824, and is a station on the New York Central (Auburn) Road, and on the Seneca Canal. It has a population of about 3,500, and is one of the most important villages in the County. The Seneca River, which has here a fall of 24½ feet, furnishes an excellent water power which is well improved. It is a half-shire of the County, and contains a Court House and Jail, built of brick, and a County Clerk's office, a neat brick structure.

The principal manufactory is that of the "Waterloo Woolen Manufacturing Co.," which was organized in 1836 with a capital stock of \$50,000. It was owing chiefly to the persevering energies of John Sinclair, Richard P. Hunt and Jesse Clark, that the farmers and citizens were originally induced to invest their capital in the enterprise, thereby providing a home market for the wool clipped in this and adjoining counties. During this and the early part of the following year, their first building was substantially erected of stone. It is 45 feet front by 100 deep, and has five On the east side of this building is an addition of fifty feet, two stories high. During the fall of 1837, the factory commenced running on broadcloths and cassimeres. At this time John Sinclair was President of the Company, Richard P. Hunt was Secretary, and Geo. Hutton was Superintendent. In 1846 Mr. Hutton died and was succeeded by Calvin W. Cooke, who has held the position of Superintendent since. He has been constantly engaged in the manufacture of woolen goods for more than fifty years, and

his judgment in regard to matters connected with the art and mysteries of manufacturing is considered second to none. After Mr. Sinclair's death, Jesse Clark was made President. Mr. Clark died and was succeeded by Elijah Kinne. Mr. Kinne died in 1850, when Thomas Fatzinger, Esq., was elected to that office, which he has since filled with entire satisfaction to the Company. Sidney Warner succeeded to the Secretaryship in 1856. As book-keeper he had previously been engaged in the office since the opening of the works.

For many years after the factory commenced operations, it was no uncommon occurrence to see fifty teams at a time standing around the grounds of the Company, waiting for their turn to be People would come from Monroe, Genesee, Ontario, Wayne, Yates, Cayuga and other counties, with wool, for which they would receive cash or goods in return. After a few years it became apparent that the capacity of the works was too small for the rapidly increasing business. Consequently, in 1844, a new building was erected of stone, a few rods east of the first. building is 150 by 45 feet, and four stories in heighth. Still further east is a dye and dry-house and assorting room, 200 feet long. These buildings were all erected at an expense of about \$150,000. Besides the factories, the Company have two large store-houses, one of them being the old flouring mill, at an early day so well known by customers for many miles around. For about twelve years the establishment was conducted as a cloth mill, when gradually the Company turned their attention to the manufacture of shawls. is now nearly twenty years since they have been exclusively engaged in their manufacture, and we believe it is generally understood by those engaged in the trade that this is the pioneer plaid or blanket shawl mill of America.

Twenty years or more ago, the reputation of American shawls was rather below par; they had earlier been woven by hand, or made by sewing pieces together. At this time the Waterloo Mills had made considerable progress in their manufacture, and had far exceeded any other manufacture in this country, in fineness of material and brilliancy of colors. As an illustration of the popular idea with the American people that everything imported from foreign countries must necessarily be superior to home manufacture, it may be related that during the first years of the manufacture of shawls at Waterloo, it was customary for the heavy merchants engaged in the jobbing trade in some of the larger cities to order cases of shawls just before the expected arrival of the principal ocean steamers. Within a short time, large placards in the windows and advertisements in the daily papers, informed the public of "a fresh importation of splendid shawls per steamer—." They were im-

ported from Waterloo, and sold for a high price. In after years, and since the reputation of our American shawls have been established, it has been unnecessary to resort to such means to gain the public Perhaps one great reason of the uninterrupted success confidence. of this Company, lies in the fact that very little change is ever made in its management; the present Secretary having been constantly engaged at the office; only two Superintendents during the thirty years the works have been in operation; and, we are told, that three generations each of several families have been counted among the operatives, the first generation having begun young men many years ago, and the succeeding ones have followed in their turn. The original capital stock has been increased to \$150,000, which, on February 1st, 1867, was owned by 83 stockholders, most of whom were living in the County or in the immediate vicinity. It is now and has ever been a strictly County institution, owned and operated by citizens of Seneca County.

Water power is used, the clear and crystal-like water flowing from Seneca Lake being peculiarly fitted for cleansing purposes, besides affording ample power for driving all their machinery. Steam is employed for heating the buildings, drying the wool after being dyed, and lubricating the machinery; this is employed instead of oil, which cannot be used. About 300 operatives are constantly employed, who work up some 400,000 pounds of fine wool annually, producing 60,000 to 70,000 long shawls, (two single shawls are counted as one,) of various patterns and styles, valued at about \$350,000, more or less, according to the market. For this purpose twenty sets of cards and their necessary machine

ry are employed.

If the reader will follow us through the mills on this our first visit, we will endeavor to give a faint idea of the modus operandi of manufacturing shawls. We will begin in the assorting room where the wool is first opened and the various grades placed by themselves. In this building we saw a huge bale of wool, weighing nearly a ton, for which we were informed the company's agents paid three dollars per pound in Buenos Ayres. The price seemed extravagant, but when we learned that it was purchased with the currency of the country, which was worth only five cents to the dellar, the first impression that the company must suffer a loss was From the assorting room, we go to the cleansing dispelled. room, where it is most thoroughly washed; from here it is taken to the bleachery, if for white, or to the dye-tubs, if to be colored. Great care is exercised in this branch, and many of the most brilliant colors are employed. After dyeing, the wool is taken to the dry-house, where it is hung on racks and subjected to a steady and strong heat generated by steam. perfectly dry it is taken to the picker, and from thence to the

cards; after which it goes to the spinner's hands, from whence it passes to the warping frames, from which it is taken ready for the weaver. None but broad looms are used. The weaving, because of the variety of colors and patterns to be used in the same shawl, requires much more skill and attention than ordinary weaving, in consequence of which one person can attend but one loom. From the weave rooms the shawls are taken to the fringe twisting Here twenty machines are constantly at work; the invention is an ingenious one, and the work is perfect. The manufacture of the shawls are now completed, and from here they are carried to the scouring room, where the pieces (twelve shawls each,) are passed through sets of heavy rollers and sewed together, when they are made to revolve for several hours between the rollers and through a strong soap suds, when they are rinsed and again go to the dry house, after which they are cut apart and pressed, when they are labelled "Waterloo Mills," and placed in the store room to be packed for market. They are principally shipped to Boston, New York and Philadelphia, from whence they find their way to all parts of the country.

It is such establishments as these which add greatly to the growth and prosperity of the country. Waterloo owes much of its present importance and prosperity to the establishment of these mills in the village. In conclusion we would say that the company are at all times in the market for the purchase of wool, for which they will

pay cash or goods as may be desired.

Beside the shawl factory, there is a small woolen mill for custom work, three distilleries, (not now in operation,) five saw mills, a number of flouring mills, malt houses, foundries and machine shops, oil mills and several other manufacturing establishments. The place also contains a bank, seven churches, the Waterloo Union School, a flourishing institution, and many handsome residences. large nursery, embracing about 50 acres, lies within the corporation limits, and there are one or two extensive vineyards in the im-The river seldom freezes over above the mediate vicinity. Falls, and is therefore open to navigation during the entire year. The village constitutes an important depot of lumber from the south-west counties, and of coal from the Blossburg and Susque-South Waterloo, formerly known as "Schoyes," is hanna mines. on the opposite side of the river, in the town of Fayette.

In attempting an historical sketch of Waterloo, we have found but little accessible material from which to compile anything of interest relative to its early settlement. It is known, however, the first settler was John Greene, from R. I., in 1789, and that among the early settlers were Jabez Gorham, from Ballston, Saratoga Co., who located on the present site of the village, and Salmon Disbrow, from the same county, who came about the same time. The first white

child born was John Smith, in 1808; the first marriage was that of Job Smith and Miriam Gorham, in 1799, and the first deaths were those of John Gregory and James Hull, Revolutionary soldiers. They both drew lots in the town of Waterloo, settled thereon, and both died about the year 1808. The first school was kept by Isaac Gorham in 1810; Jabez Gorham kept the first inn, about the year 1795; Charles Swift the first store, in 1815, and James (or Samuel) Bear the first mill, in 1794. Mr. Williams, an early settler, says: "I came here in Dec., 1821, with a stock of dry goods, groceries, etc., and settled in the eastern part of Main street, near the old Waterloo Mill, then a great custom and merchant flouring mill, now a factory warehouse. West, and on the opposite side of the street, on the bank of the present mill race, was Chas. Swift & Co's store, now remodelled into a Campbellite house of worship. Twenty rods west, on the north side of Main street, Elisha Hill had a store in what is, now Babbit Tubb's house. recollect his sign read, 'I drink, I smoke, I chaw.'"

There were then two stores at what is now the corner of Main and Virginia streets; one kept by Richard P. Hunt, and another by John Rice. A jeweler's shop was also kept at "The Corners," by one Fairchild. On what is now the corner of Main and Locust streets, was a dry goods store, and a little west a drug and book

store.

Mr. Williams continues:-"The above recital names all the places of buying and selling, at that day, in Waterloo, except a shoemaker's, joiner's, and blacksmith's shop. In "Schoyes," now South Waterloo, John Watkins had a dry goods store, and a flour and grist mill. There was also at the south end of the bridge, an old grist mill built by S. Bear, one of the first settlers. Martin Kendig had a fulling mill near the bridge, and there was a scythe factory a few rods east, on the race. There were also two saw mills and the Waterloo Flour Mill on the same race, one of the saw mills standing in Mr.S. Williams' garden. The other saw mill has been rebuilt, and is now extensively engaged in sawing ship plank. There were in operation, near the bridge, a saw mill and tannery. In 1821 there were not more than a dozen houses on William street, (then called 'Back street.') Main street was generally occupied by small wooden buildings. On this street were four taverns, the Eagle Hotel, Madison House, and two others since destroyed The Madison House and Court House were the largest and best-built edifices in town. Waterloo at that time (1821,) had a population of about 500 souls, among whom were several lawyers, two justices of the peace, and three physicians. "Both farmers and villagers," says Mr. Williams, "were poor, and lived in great simplicity. The spinning wheel and loom supplied the farmer all his broadcloth, which was fulled and dyed at the fulling

The winter meeting of the society, for the election of officers, and to award premiums on grain, grass seed and roots, is annually held on the third Thursday of January.

The Annual Fair is held at such times and places as the Board of Managers agree upon. The premiums awarded at the Annual Fair is paid by the Treasurer on the third Saturday after the close of the Fair, near where the Fair was held.

Rabits of a Man of Business.

A sacred regard to the principles of justice forms the basis of every transaction, and regulates the conduct of the upright man of cusiness.

He is strict in keeping his engagements. Does nothing carelessly or in a hurry.

Employs no one to do what he can easily do himself.

Keeps everything in its proper place.

Leaves nothing undone that ought to be done, and which circumstances permit him to do.

Keeps his designs and business from the view of others.

Is prompt and decisive with his customers, and does not overtrade his capital.

Prefers short credits to long ones, and cash to credit at all times, either in buying or selling; and small profits in credit cases, with little risk to the chance of better gains with more hazard.

He is clear and explicit in all his bargains.

Leaves nothing of consequence to memory which he can and ought to commit to writing.

Keeps copies of all his important letters which he sends away, and has every letter, invoice, &c., relating to his husiness, titled, classed, and put away.

Never suffers his desk to be confused by many papers lying upon it.

Is always at the head of his business,

well knowing that if he leaves it it will leave him,

Holds it as a maxim that he whose credit is suspected is not one to be trusted.

Is constantly examining his books, and sees through his whole affairs as far as care and attention will enable him.

Balances regularly at stated times, and then makes out and transmits all his accounts current to his customers, both at home and abroad.

Avoids as much as possible all sorts of accommodation in money matters and lawsuits where there is the least hazard.

He is economical in his expenditures, always living within his income.

Keeps a memorandum book in his pocket, in which he notes every particular relative to appointments, addresses, and petty cash matters.

Is cautious how he becomes surety for any person; and is generous when urged by motives of humanity.

Let a man act strictly to these habits; when once begun they will be easy to continue—ever remembering that he hath no profits by his pains whom Providence doth not prosper—and success will attend his efforts.

Take pleasure in your business, and it will become your recreation.

Hope for the best, think for the worst, and hear whatever happens.

*See Errata of County.

THE STATES,

THEIR SETTLEMENT, ADMITTANCE TO THE UNION, POPULATION, SUFFRAGE LAWS, ETC.

ALABAMA was settled near Mobile, in 1702, by the French; was formed into a Territory by act of Congress, approved March 3, 1817, from the eastern portion of the Territory of Mississippi; framed a Constitution August 2, 1819, and was admitted into the Union December 14 of the same year. Area 50,722 square miles, or 32,462,080 acres.—Population in 1860, 964,201, of whom 435,080 were slaves. It is the chief cotton growing State of the Union. White male citizens who have resided one year in the State and three months in the county, are entitled to vote. An election for a Convention was held December 24, 1860, and a majority of over 50,000 votes cast for secession; the Convention met January 7, 1861, and on the 11th passed the ordinance of secession, by a vote of 61 to 39, which was followed on the 21st by the resignation of its members of Congress.

ARKANSAS was settled at Arkansas Post in 1685, by the French, and was part of the Louisiana purchase ceded by France to the United States, April 30, 1803. It was formed into a Territory by act of Congress, March 2, 1819, from the southern part of the Territory of Missouri; its western boundary was settled May 26, 1824, and its southern, May 19, Having adopted a Constitution, a memorial was presented in Congress, March 1, 1836, and an act for its admission into the Union passed June 15 of the same year. Area 52,198 square miles, or 33,406, es. In 1860 its population was 435,450, of whom 111,115 were It is an agricultural State, its staples being corn and cotton— 720 acres. Citizenship and residence in the State for six months, qualify voters in the county and district where they reside. January 16, 1861, its Legislature ordered a State Convention, which assembled, and on May 6, voted to secede, 69 to 1. January 4, 1864, a Convention assembled in Little Rock, which adopted a new Constitution, the principle feature of which consisted in a clause abolishing slavery. The Convention adjourned This body also inaugurated a Provisional Government. The Constitution was submitted to the people, and 12,177 votes cast for it, to 226 against it. The State was re-organized under the plan contained in the Amnesty Proclamation of President Lincoln, in pursuance of which an election was held March 14, 1864. The vote required under the Proclamation was 5,405. About 16,000 votes were cast.

CALIFORNIA was settled at Diego in 1768, by Spaniards, and was part of the territory ceded to the United States by Mexico, by the treaty concluded at Guadaloupe Hidalgo, February 22, 1848. After several ineffectual attempts to organize it as a Territory or admit it as a State, a law was passed by Congress for the latter purpose, which was approved September 9, 1850. Area 188,981 square miles, or 120,947,784 acres. Population in 1860, 305,439. It is the most productive gold mining region on the continent, and also abounds in many other minerals.—White male citizens of the United States, and those of Mexico who may choose to comply with the provisions of the treaty of Queretaro, of May 30, 1848, who have resided in the State six months and in the county or district thirty days, are entitled to vote.

CONNECTICUT was settled at Windsor, in 1633, by English Puritans from Massachusetts, and continued under the jurisdiction of that Province until April 23, 1662, when a separate charter was granted, which continued in force until a Constitution was formed, September 15, 1818. It was one of the original thirteen States, and ratified the United States Constitution, January 9, 1788. Area 4,674 square miles, or 2,991,360 acres. Population in 1860, 460,147. It is one of the most densely populated and principal manufacturing States in the Union. Residence for six months, or military duty for a year, or payment of State tax, or a free-hold of the yearly value of seven dollars, gives the right to vote.

DELAWARE was settled at Wilmington, early in 1638, by Swedes and Finns; was granted to William Penn, in 1682, and continued under the government of Pennsylvania until the adoption of a Constitution, September 20, 1776; a new one was formed June 12, 1792. It was one of the original thirteen States, and ratified the United States Constitution, December 7, 1787. Area 2,120 square miles, or 1,356,800 acres.—Population, in 1860, 112,216, of whom 1,798 were slaves. It is a grain and fruit growing State, with some extensive manufactories. Residence in the State one year, and ten days in the election district, with payment of a State or county tax assessed ten days prior to an election, gives the right to vote, except that citizens between twenty-one and twenty-two years of age need not have paid the tax.

FLORIDA was settled at St. Augustine, in 1565, by Spaniards; was formed from part of the territory ceded by Spain to the United States by treaty of February 22, 1819; an act to authorize the President to establish a temporary government was passed March 3, 1819; articles of surrender of East Florida were framed July 10, and of West Florida, July 17, 1821, and it was then taken possession of by General Jackson as Governor. An act for the establishment of a Territorial Government was passed March 30, 1822, and by act of March 3, 1823, East and West Florida were constituted one Territory. Acts to establish its boundary line between Georgia and Alabama were passed May 4, 1826, and March 2, 1831. After several ineffectual attempts to organize it into two Territories, or into a State and Territory, an act for its admission into the Union was passed March 3, 1845. Area 59,268 square miles, or 37,930,520 acres. Population, in 1860, 140,425, of whom 61,745 were slaves. It is an agricultural State, tropical in its climate and products. Every free white male citizen, who has resided in the State two years and in the county six months, and has been enrolled in the militia (unless exempt by law,) is qualified to vote; but no soldier, seaman

or marine can vote unless qualified before enlistment. Its Legislature called a Convention, December 1, 1860, which met January 3, 1831, and passed a secession ordinance on the 10th by a vote of 62 to 7.

GEORGIA was settled at Savannah, in 1733, by the English under General Oglethorpe. It was chartered June 9, 1732; formed a Constitution February 5, 1777; a second in 1785 and a third May 30, 1798.— It was one of the original thirteen States, and ratified the United States Constitution January 2, 1788. Area 58,000 square miles, or 37,120,000 acres. Population, in 1860, 1,057,286, of whom 462,198 were slaves. It is a large cotton and rice growing State. Citizens of the State, six months resident of the county where voting, who have paid taxes the year preceding the election, are entitled to vote. November 18, 1860, its Legislature ordered an election for a State Convention, which assembled and passed a secession ordinance January 19, 1861, by a vote of 208 to 89, and on the 23d of the same month its members of Congress resigned.

ILLINOIS was settled at Kaskaskia, in 1683, by the French, and formed part of the northwestern territory ceded by Virginia to the United States. An act for dividing the Indiana Territory and organizing the Territory of Illinois, was passed by Congress, February 3, 1809; and an act to enable it to form a State Constitution, Government, &c., was passed April 18, 1818; a Constitution was framed August 26, and it was admitted into the Union December 23 of the same year. Area 54,405 square miles, or 64,819,200 acres. Population, in 1860, 1,711,951. It is the chief "prairie" State, and the largest grain growing and second largest cattle raising State in the Union. All white male inhabitants, who have resided in the State one year and election district sixty days, can votein the district where actually residing.

INDIANA was settled at Vincennes, in 1690, by the French, and formed part of the northwestern territory ceded by Virginia to the United States. It was organized into a Territory May 7, 1800, from which the Territory of Michigan was set off in 1805, and Illinois in 1809. An act was passed to empower it to form a State Constitution, Government, &c., April 19, 1816, and it was admitted into the Union December 11 of the same year. Area 33,809 square miles, or 21,637,760 acres. Population, in 1860, 1,350,428. It is an agricultural State, chiefly devoted to grain growing and cattle raising. A residence of one year in the State entitles males of 21 years of age to vote in the county of their residence.

TOWA was first settled at Burlington by emigrants from the Northern and Eastern States. It was part of the region purchased from France; was set off from the Territory of Wisconsin and organized as a separate Territory June 12, 1838; an act for its admission as a State was passed and approved March 3, 1845, to which the assent of its inhabitants was to be given to be announced by Proclamation of the President, and on December 28, 1846, another act for its admission was passed. Area 50,914 square miles or 32,584,960 acres. Population, in 1860, 674,913. It is an agricultural State, resembling Illinois, and contains important lead mines. White male citizens of the United States, having resided in the State six months and county twenty days, are cutitled to vote.

KANSAS was formed out of the original Louisiana purchase, and organized into a Territory by act of Congress, May—, 1854, and after several ineffectual attempts was finally admitted into the Union in January, 1861. Area 78,418 square miles, or 50,187,520 acres. Population, in 1860, 107,206. It is an agricultural State, with a soil of rich and deep black loam, except the central portion, which is partly a desert. The western portion is a fine grazing country, well wooded. It also abounds in minerals.

KENTUCKY was settled in 1775, by Virginians; formed into a Territory by act of the Virginia Legislature, December 18, 1789, and admitted into the Union June 1, 1792, by virtue of an act of Congress passed February 4, 1791. Area 37,680 square miles, or 24,115,200 acres.— Population in 1860, 1,155,684, of whom 225,483 were slaves. It is an agricultural State, raising more flax and hemp than any other. Loyalty, a residence of two years in the State and one in the county are the requirements to vote. "Any citizen of this State who shall enter the service of the so-called Confederate States, in either a civil or military capacity; or into the service of the so-called Provisional Government of Kentucky, in either a civil or military capacity; or having heretofore entered such service of either the Confederate States or Provisional Government, shall continue in such service after this act takes effect, (March 11, 1862,) or shall take up or continue in arms against the military forces of the United States or State of Kentucky, or shall give voluntary aid and assistance to those in arms against said forces, shall be deemed to have expatriated himself, and shall no longer be a citizen, except by permission of the Legislature by a general or special statute."

LOUISIANA was settled at Iberville, in 1699, by the French, and comprised a part of the territory ceded by France to the United States, by treaty of April 30, 1803, which purchase was erected into two Territories by act of Congress March 26, 1804, one called the Territory of Orleans, the other the District of Louisiana, afterwards changed to that of Missouri. -Congress, March 2, 1806, authorized the inhabitants of Orleans Territory to form a State Constitution and Government when their population should amount to 60,000; a Constitution was adopted January 22, 1812, and the State admitted into the Union April 8 of the same year, under the name of Louisiana. Area 41,255 square miles, or 26,403,200 Population in 1860, 708,002, of whom 331,726 were slaves. It is the chief sugar producing State of the Union. Two years' residence in the State and one in the parish are the qualifications of voters. December 10, 1860, the Legislature ordered a State Convention to be held, which assembled and passed an ordinance of secession January 26, 1861, by a vote of 113 to 17. The people voted on the question, and on March 28 the following was announced as the result: For, 20,448; against, 17,296; a majority of 3,152. The Convention ratified the 'Confederate' Constitution March 11, 1861, by a vote of 107 to 7, and refused to submit it to the people by 94 to 10. On the 11th day of January, 1864, Maj. Gen. Banks issued a Proclamation for an election of State officers and delegates to a Constitutional Convention, for the purpose of affecting a reconstruction of the State Government under the plan suggested in the Amnesty Proclamation of President Lincoln. The election was held on the 22d day of February, 1864. The officers thus elected were installed March 4. The total vote cast was 10,725. The vote requisite under the Proclamation was The Convention amended the Constitution so as to aholish slavery. The new Constitution was adopted by the people by a vote of 6,836 for, to 1.566 against.

MAINE was settled at York, in 1623, by the English, and was formerly under the jurisdiction of Massachusetts. October 29, 1819, the inhabitants of the District of Maine framed a Constitution; applied for admission December 8, 1819. Congress passed an act March 3, 1820, and it was admitted as a State March 15, of the same year. Area 31,766 square miles, or 20,330,240 acres. Population, in 1860, 628,279. It is largely engaged in the lumber trade and ship building. Citizens of the United States, except paupers and persons under guardianship, who have resided in the State for three months next preceding the election, are entitled to vote.

MARYLAND was settled at St. Mary, in 1634, by Irish Roman Catholics, having been chartered June 20, 1632. It was one of the original thirteen States; formed a Constitution August 14, 1776, and ratified the Constitution of the United States April 28, 1788. Area 11,124 square miles, or 7,119,260 acres. Population in 1860, 687,049, of whom 87,189 were slaves. It is mainly an agricultural State, producing grain and tobacco. A residence of one year in the State, and six months in the county, gives the right to vote to every white male citizen who takes the oath of allegiance prescribed in the Constitution. January 28, 1864, a bill passed the Legislature submitting to the people the question of a Convention to revise the Constitution of the State. The popular vote on the question was as follows: For Convention, 32,203; against, 18,337. The Convention assembled and adopted a Constitution abolishing slavery, which was submitted to and adopted by the people; and in accordance with its provisions, on the 29th of October, 1864, the Governor issued his Proclamation declaring the slaves in that State free from the 1st day of November.

MASSACHUSETTS was settled at Plymouth, November 3, 1620, by English Puritans, and Charters were granted March 4, 1629, January 13, 1630, August 20, 1726, and October 7, 1731. It was one of the original 13 States; adopted a Constitution March 2, 1780, which was amended November 3, 1820, and ratified the Constitution of the United States February 6, 1788. Area 7,800 square miles, or 4,992,000 acres. Population in 1860, 1,231,066. It is a largely commercial, the chief manufacturing and most densely populated State in the Union. A residence of one year in the State, and payment of State or county tax, gives the right to vote to male citizens of 21 years and upward, except paupers and persons under guardianship.

MICHIGAN was settled at Detroit in 1670, by the French, and was part of the territory ceded to the United States by Virginia. It was set off from the territory of Indiana, and erected into a separate Territory January 11, 1805; an act to attach to it all the territory of the United States west of the Mississippi river, and north of the State of Missouri, was passed June 28, 1834. Wisconsin was organized from it April 30, 1836. In June of the same year an act was passed to provide for the admission of the State of Michigan into the Union, and a Constitution having been adopted, it was admitted January 26, 1837. Area 56,243 square miles, or 35,995,552 acres. Population in 1860, 749,113. It is a grain growing and cattle rearing State, with rich and extensive mines of copper and iron in the Northern Peninsula. A residence in the State of six months preceding the election, entitles white male citizens to vote.

MINNESOTA was settled about 1846, chiefly by emigrants from the Northern and Western States. It was organized as a Territory by act of Congress approved March 3, 1849, and admitted into the Union February 26, 1857. Area 95,274 square miles, or 60,975,536 acres. Population in 1860, 172,123 whites, and about 25,000 Indians, many of the tribes being of a warlike character. It is an agricultural State, chiefly devoted to Northern grains. The right to vote is extended to male persons of 21 years of age, of the following classes, if they have resided in the United States one year, the State four months, and the election district ten days: White citizens of the United States, and those of foreign birth who have declared their intention to become citizens; persons of mixed white and Indian blood who have adopted the customs of civilization, and those of pure Indian blood who have been pronounced capable by any district court of the State.

MISSISSIPPI was settled at Natchez, in 1716, by the French, and was formed out of part of the territory ceded to the United States by South Carolina in 1787, and Georgia in 1802. It was organized as a Territory by act of Congress, April 7, 1789, and enlarged on the north March 27, 1804, and on the south May 14, 1812. After several unsuccessful attempts to enter the Union, Congress finally passed an act March 1, 1817, enabling the people of the western part of the Territory to form a State Constitution and Government, which being complied with August 15, it was admitted December 10 of the same year. Area 47,156 square miles, or 30,179,840 acres. Population in 1860, 791,305, of whom 436,631 were slaves. It is the second cotton growing State of the Union. Citizens who have resided one year in the State, and four months in the county, and having performed military duty or paid taxes, are entitled to vote. A Convention met January 7, 1861, and on the 9th passed an ordinance of secession by a vote of 84 to 15.

MISSOURI was settled at Genevieve in 1763, by the French, and was part of the territory ceded by France by treaty of April 30, 1803. It was created under the name of the District of Louisiana, by an act approved March 26, 1804, and placed under the direction of the officers of the Indiana Territory, and was organized into a separate Territory June 4, 1812, its name being changed to that of Missouri; and was divided March 2, 1819, the Territory of Arkansas being then created. An act authorizing it to form a State Constitution and Government was passed March 6, 1820, and it was admitted into the Union December 14, 1821. Area 67,380 square miles, or 43,123,200 acres. Population in 1860, 1,182,012, of whom 114,931 were slaves. An act of gradual emancipation was passed July 1, 1863, by a vote of 51 to 30. On the 6th of January, 1865, a Constitutional Convention assembled in St. Louis, and on the 8th of April adopted a new Constitution, declaring the State free, prohibiting compensation for slaves, and adopting many other radical changes. On the 6th of June the Constitution was adopted by the people by a vote of 43,670 to 41,808, and pursuant to a Proclamation issued on the 1st of July, the Constitution went into effect July 4, 1865. It is an agricultural and mining State. Citizens of the United States who have resided in the State one year, and county three months, are entitled to vote. By an act passed by the Legislature of 1863, voting by ballot was adopted, and the viva voce system abolished.

NEVADA was organized as a Territory March 2, 1861. Its name signifies snowy, and is derived from the Spanish word nieve (snow.) It comprises 81,539 square miles, or 52,184,960 acres, lying mostly within the Great Basin of the Pacific coast. Congress, at its session in 1864, passed an act which was approved March 21, to enable the people of the Territory to form a Constitution and State Government, in pursuance of which a Government was organized and the Territory admitted as a State by Proclamation of the President, October 31, 1864. At the time of its organization the Territory possessed a population of 6,857 white settlers. The development of her inineral resources was rapid and almost without parallel, and attracted a constant stream of immigration to the Territory, As the population has not been subject to the fluctuations from which other Territories have suffered, the growth of Nevada has been rapid and steady. At the general convention election of 1863, 10,934 votes were cast. During 1864 great accessions to the population were made. It is probably the richest State in the Union in respect to mineral resources. No region in the world is richer in argentiferous leads. It also contains an immense basin of salt, five miles square. Quartz mills are a very important feature in mining operations. The State is barren for agricultural purposes, and is remarkably healthy.

NEW HAMPSHIRE was settled at Dover, in 1623, by English Puritans, and continued under the jurisdiction of Massachusetts until September 18, 1679, when a separate charter was granted. It was one of the original thirteen States, and ratified the United States Constitution June 21, 1788; its State Constitution was framed January 5, 1776, and amended in 1784 and 1792. Area 9,280 square miles, or 5,939,200 acres. Population in 1860, 326,073. It is a grazing and manufacturing State. All male citizens, except paupers, are allowed to vote.

NEW JERSEY was settled at Bergen, in 1624, by the Dutch and Danes; was conquered by the Dutch in 1655, and submitted to the English In 1664, being held thereafter under the same grants as New York, until it was surrendered to the Crown in 1702. It was one of the original thirteen States, adopted a State Constitution July 2, 1776, and ratified the United States Constitution December 18, 1787. Area 8,320 square miles, or 5, 324,800 acres. Population in 1860, 672,035. It is a grain and fruit growing region, its orchard and market products being relatively greater than those of any other State. A residence of one year in the State gives the right to vote, except to paupers, &c.

NEW YORK was settled at Manhattan, in 1614, by the Dutch; was ceded to the English by grants to the Duke of York, March 20, April 26, and June 24, 1664; was retaken by the Dutch in 1673, and surrendered again by them to the English, February 9, 1674. It was one of the original thirteen States; ratified the United States Constitution July 26, 1788; framed a Constitution April 20, 1777, which was amended October 27, 1801, and November 10, 1821; a new one was adopted November 3, 1846. Area 47,000 square miles, or 30,080,000 acres. Population in 1865, 3,831,777. It is the most populous, wealthy and commercial of the States. White male citizens of the United States, who have resided in the State one year, in the county four months, and election district thirty days, are entitled to vote; and all men of color who have resided in the State three years, and own and pay taxes on a freehold assessed at \$250.

NOR TH CAROLINA was settled at Albemarle, in 1650, by the English, and was chartered March 20, 1663. It was one of the original thirteen States, and ratified the United States Constitution, November 21, 1789; its State Constitution was adopted December 18, 1776, and amended in 1835. Area 50,704 square miles, or 32,450,560 acres. Population in 1860, 992,622, of whom 331,059 were slaves. It is an agricultural State, with some mines and extensive pine forests. Every freeman of 21 years of age, having resided one year in any county in the State, may vote for a member of the House of Commons, but must own fifty acres of land to vote for a Senator. A State Convention passed an ordinance of secession May 21, 1861. An election for delegates to a State Convention took place September 21, 1865. The Convention assembled October 2. On the 2d of October it passed an ordinance forever prohibiting slavery. The Legislature ratified the Constitutional amendment December 1. An election was held on the first Thursday of November, for Governor, Members of Congress and the Legislature.

OHIO was settled at Marietta, in 1788, by emigrants from Virginia and New England; was ceded by Virginia to the United States October 20, 1783; accepted by the latter March 1, 1784, and admitted into the Union April 30, 1802. Area 39,964 square miles, or 25,576,960 acres. Population in 1860, 2,339,511. It is the most populous and wealthy of the agricultural States, devoted principally to wool growing, grain and live stock. A male of 21 years of age, who has resided in the State one year, and has paid or been charged with a State or county tax, is eligible to vote.

OREGON, although it had previously been seen by various navigators, was first taken possession of by Capt. Robert Gray, who entered the mouth of its principal river May 7, 1792, naming it after his vessel, the Columbia, of Boston. Exploring expeditions soon followed, and fur companies sent their trappers and traders into the region. In 1811 a trading post was established at the mouth of the Columbia river by the American Fur Company, who named it Astoria. For some time a Provisional Territorial Government existed, but the boundary remained unsettled until the treaty with Great Britain in 1846, when the 49th parallel was adopted. It was formally organized as a Territory August 14, 1848; was divided March 2, 1853, on the 46th parallel, the northern portion being called Washington and the southern Oregon. November 9, 1857, a State Constitution was adopted, under which it was admitted February 14, 1859, about one-third of it on the east being added to Washington Territory, its northern boundary following the Columbia river until its intersection with latitude 46° north. Area 102,606 square miles, or 65,667,840 acres. Population in 1860, 52,465. It is an agricultural State, possessed of a fertile soil, extensive pastures, genial climate, and is well wooded. Gold and other precious metals are found in considerable abundance.

PENNSYLVANIA was settled at Philadelphia, in 1681, by English Quakers, and was chartered February 28 of the same year. It was one of the original thirteen States, ratifying the United States Constitution December 12, 1787; adopted a State Constitution September 28, 1776, and amended it September 2, 1790. Area 46,000 square miles, or 29,440,000 acres. Population in 1860, 2,906,115. It is the second State in wealth and population, and the principal coal and iron mining region in the

Union. Residence in the State one year, and ten days in the election district, with payment of a State or county tax assessed ten days prior to an election, gives the right to vote; except that citizens between 21 and 22 years of age need not have paid the tax.

RHODE ISLAND was settled at Providence in 1636, by the English from Massachusetts, under Roger Williams. It was under the jurisdiction of Massachusetts until July 8, 1662, when a separate charter was granted, which continued in force until the formation of a Constitution in September, 1842. It was one of the original thirteen States, ratifying the United States Constitution May 29, 1790. Area 1,306 square miles, or 835,840 acres. Population in 1860, 174,620. It is largely engaged in manufactures. A freehold possession of \$13; or, if in reversion, renting for \$7, together with a residence of one year in the State and six months in the town; or, if no freehold, then a residence of two years in the State and six months in the town, and payment of \$1 tax or military service instead, are the qualifications of voters.

SOUTH CAROLINA was settled at Port Royal, in 1670, by the English, and continued under the charter of Carolina, or North Carolina, until they were separated in 1729. It was one of the original thirteen States, ratifying the United States Constitution May 23, 1798; it framed a State Constitution March 26, 1776, which was amended March 19, 1778, and June 3, 1790. Area 29,385 square miles, or 18,806,400 acres. Population in 1860, 703,708, of whom 402,406 were slaves, an excess of 101,270 over It is the principal rice-growing State. Whites, who have resided in the State two years and district six months, and have a freehold of fifty acres of land, or have paid a State tax, are entitled to vote. December 17, 1860, a Convention assembled in Columbia, adjourned to Charleston, and on the 24th unanimously adopted an ordinance of secession, which was followed the next day by a Declaration of Causes claimed to be sufficient to justify the act. An election for delegates to a State Convention was held September 4, 1865. The Convention assembled September 13, and adjourned on the 28th. It repealed the ordinance of secession, abolished slavery, equalized the representation of the Senate and taxation throughout the State, giving the election of Governor and Presidential electors to the people, ordered voting in the Legislature by viva voce, endorsed the Administration unanimously, and directed a commission to submit a code to the Legislature for the protection of the colored population. The Legislature ratified the Constitutional Amendment November 13, 1865.

TENNESSEE was settled at Fort Donelson, in 1756, by emigrants from Virginia and North Carolina; was ceded to the United States by North Carolina December, 1789, conveyed by the Senators of that State February 25, 1790, and accepted by act of Congress April 2 of the same year; it adopted a Constitution Feb. 6, 1796, and was admitted into the Union the 1st of June following. Area 45,600 square miles, or 29,184,000 acres. Population in 1860, 1,109,601, of whom 275,179 were slaves. It is a mining and agricultural State, and is largely productive of live stock. Citizens of the United States who have resided six months in the county are entitled to vote. A military league was formed between the Governor, Isham G. Harris, and the rebel States, May 7, 1861, ratified the same day by the Senate by a vote of 14 to 6, and a Declaration of Independence submitted to the people, the election to be held June 8, the result of which

was declared by the Governor, June 24, to be 104,913 for, and 47,238 against. This movement not being acceptable to the people of East Tennessee, which had declared against separation by a vote of 32,923 to 14,780, they, in a Convention held at Greenville, June 18–21, repudiated it. Andrew Johnson, Provisional Governor of the State, called a State Convention to be held in Nashville the second Monday in January. Delegates were elected, the Convention met, declared slavery forever abolished, prohibited compensation to owners of slaves, and abrogated the secession ordinances. These amendments of the Constitution were submitted to the people 22d of February, 1865, with the following result: For ratification, 22,197; rejection, 63. The United States Constitutional Amendment was ratified April 5, 1865.

TEXAS was first settled at Bexar, in 1694, by Spaniards; formed a part of Mexico until 1836, when she revolted from that Republic and instituted a separate Government, under which she existed until admitted into the Union by a joint, resolution approved March 1st, 1845, imposing certain conditions, which were accepted, and a Constitution formed July 4 of the same year, and another joint resolution adopted by Congress, consummating the annexation, was approved December 29, 1845. Area 237,504 square miles, or 152,002,500 acres. Population in 1860, 604,215, of whom 182,566 were slaves. It is an agricultural region, principally devoted to grain, cotton and tropical fruits. Free white male citizens of 21 years of age, who have resided in the State one year and district six months are entitled to vote. A Convention assembled at Galveston January 28,1861, and on February 1 passed an ordinance of secession, by a vote of 166 to 7, to be submitted to the people February 23, and on March 4 they declared the State out of the Union, and Gov. Houston issued a Proclamation to that effect.

VERMONT was settled in 1724, by Englishmen from Connecticut chiefly under grants from New Hampshire; was formed from a part of the territory of New York, by act of its Legislature March 6, 1769; framed a Constitution December 25, 1777, and was admitted into the Union March 4, 1791, by virtue of an act of Congress passed February 18 of the same year. Area 10,212 square miles, or 6,535,680 Acres. Population in 1860, 315,098. It is a grazing region, producing more wool, live stock, maple sugar, butter, cheese and hay, in proportion to its population, than any other State. Any citizen of the United States who has resided in the State one year, and will take the oath of allegiance, is entitled to vote.

VIRGINIA was settled at Jamestown, in 1607, by the English, and was chartered April 10, 1606, May 23, 1609, and March 12, 1612. It was one of the original thirteen States, ratifying the United States Constitution June 25, 1788; it framed a State Constitution July 5, 1776, which was amended January 15, 1830. The State was divided in 1863. Present area 37,352 square miles. Population in 1860, 1,314,532, of whom 481,410 were slaves. It is a large corn producing, and the chief tobacco growing State. Every white male citizen of the age of 21 years, who has been a resident of the State for one year, and of the county, city or town where he offers to vote for six months next preceding an election, and has paid all taxes assessed to him, after the adoption of the Constitution, under the laws of the Commonwealth after the re-organization of the county, city or town where he offers to vote, is qualified to vote for members of the

General Assembly and all officers elective by the people. A Convention sitting in Richmond on the 17th of April, 1861, passed an ordinance of secession, by a vote of 88 to 55, which was submitted to the people at an election held May 23, the result of which was announced June 25 to be 128,824 for, and 32,134 against. The State Government was re-organized by a Convention which met at Wheeling, May 11, 1861. Upon the division of the State in 1863, the seat of Government was removed to Alexandria. A State Constitutional Convention, March 10, 1864, adopted a section abolishing slavery.

WEST VIRGINIA.—On the passage of the ordinance of secession by the Virginia Convention, a Convention of the western and other loyal counties of the State was held at Wheeling, which assembled May 11, 1861, and on the 17th unanimously deposed the then State officers and organized a Provisional Government. On the 26th of November, 1861, a Convention representing the western counties assembled in Wheeling and framed a Constitution for West Virginia, which was submitted to the people on the 3d of May, 1862, and adopted by them by a nearly unanimous vote. The division of the State was sanctioned by the Legislature May 13, 1862, and ratified by Congress by an act approved December 31, 1862, conditioned on the adoption of an amendment to the Constitution providing for the gradual abolition of slavery, which was done on the 24th of March, 1863, by a vote of the qualified electors of the proposed State, 28,318 voting in favor of the amendment, and 572 against it.. In pursuance of the act of Congress, the President issued a Proclamation, April 20, 1863, admitting the State sixty days from the date thereof, and on the 20th of June the new State Government was formally inaugurated. 24,000 square miles. Population in 1860, 350,599, of whom 12,754 were It is a large corn producing State, and abounds in coal and other The Alexandria Legislature adopted the United States Constitutional Amendment February 9, 1865.

WISCONSIN was settled at Green Bay, in 1669, by the French; was a part of the territory ceded by Virginia, and was set off from Michigan December 24, 1834, and was organized into a Territory April 30, 1836. Iowa was set off from it June 12, 1838, and acts were passed at various times setting its boundaries. March 3, 1847, an act for its admission into the Union was passed, to take effect on the issuing of a Proclamation by the President, and by act of May 29, 1848, it was admitted into the Union. Area 53,924 square miles, or 34,511,360 acres. Population in 1860, 775,881. It is an agricultural State, chiefly engaged in grain raising and wool growing. Both white and colored citizens of the United States, or white foreigners who have declared their intention to become citizens, are entitled to vote. Colored citizens were admitted to the franchise, by a decision of the Supreme Court, rendered the 27th day of March, 1866, holding that, whereas an election was held in 1849, under the provisions of chapter 137, of that year, at which election 5,265 votes were cast in favor of the extension of the right of suffrage to colored men, and 4,075 against such extension, therefore, the section of said law conferring such right had been constitutionally adopted and is the law of the land.

THE TERRITORIES,

THEIR BOUNDARIES, AREA, PHYSICAL FEATURES, ETC.

ALASKA, our new territory, recently purchased of Russia, comprehends all the north-west coast on the Pacific, and the adjacentislands north of the parallel of 50 degrees 40 minutes north, and the portion of the mainland west of the meridian (about 140° west) of Mount St. Elias. The area is computed at 481,276 square miles. The climate, although warmer than in the same latitude on the eastern coast, is too rigorous to admit of successful agricultural operations, and the chief value of the country and adjacent seas is derived from their fisheries and hunting grounds. The southern and central portions are mountainous; the northern portion along the Arctic ocean is quite flat, nowhere rising more than fifteen or twenty feet above the sea. The population is estimated at about 80,000, mostly Esquimeaux.

ARIZONA was organized by the Thirty-Seventh Congress, in the winter of 1863, out of the western half of New Mexico, the boundary between the two Territories being the 109th meridian (32d west from Washington,) and includes the greater portions of the valleys of Colorado and Gila, which two rivers drain its entire surface, with parts of Utah, New Mexico and Nevada, and yet convey, it is reported, a less volume of water to the sea than the Hudson at Albany. The fertile Messilla Valley was left with New Mexico. The Territory forms a block nearly square, and eontains 126,141 square miles, or 80,730,240 acres. Its white population is probably considerably less than 10,000. For agricultural purposes it is probably the most worthless on the Continent, owing to the absence of rains, but it is reputed to abound in silver mines.

COLORADO was organized March 2, 1861, from parts of Kansas, Nebraska and Utah, and is situated on each side of the Rocky Mountains, between latitude 37° and 41°, and longitude 25° and 32° west from Washington. Area 104,500 square miles, or 66,880,000 acres. Population 50,000, besides numerous tribes of Indians. By an enabling act passed March 21, 1864, the people of the Territory were authorized to frame a State Constitution and organize a State Government, and a Convention accordingly met in 1865, and on the 12th of August adopted a Constitution, which was submitted to and adopted by the people September 5, and State officers elected November 14. A bill to admit the Territory as a State passed Congress, but was vetoed May 25, 1866. It is said to be a superior grazing and cattle producing region, with a healthy climate and rich soil. An extensive coal bed, and also gold, iron and other minerals abound.

DAKOTA was first settled by emyloyees of the Hudson Bay Company, but is now being peopled by emigrants from the Northern and Western States. It was set off from the western portion of Minnesota when that Territory became a State in 1857, and was organized March 2, 1861. Area 148,932 square miles, or 95,316,480 acres. Population 2,576 white, and 2,261 Indians, besides the roving tribes.

IDAHO was organized by the Thirty-Seventh Congress, at its second session, in the winter of 1863. Its name means 'Bead of the Mountains,' and it embraces the whole breadth of the Rocky Mountain region, and has within its bounds the head waters of nearly all the great rivers that flow down its either slope, but the greater portion lies east of the mountains. Its southern boundary is the 41st, its northern the 46th parallel of latitude. It extends from the 104th meridian on the east to the 110th on the west. Area 326,373 square miles, or 208,870,720 acres. For agricultural purposes it is comparatively worthless, but abounds in gold and other valuable mines.

MONTANA was settled by emigrants from the Northern and Western States. Organized in 1864, with the following boundaries: Commencing at a point formed by the intersection of the 27° L. W. from Wash ington with the 45° N. L.; thence due west on said 45th degree to a point. formed by its intersection with the 34th degree W. from Washington; thence due south along said 34th degree of longitude to its intersection with the 44th degree and 30 minutes of N. L.; thence due west along said 44th degree and 30 minutes of N. L. to a point formed by its intersection with the crest of the Rocky Mountains; thence following the crest of the Rocky Mountains northward till its intersection with the Bitter Root Mountains; thence northward along the crest of said Bitter Root Mountains to its intersection with the 39th degree of longitude W. from Washington; thence along said 39th degree of longitude northward to the boundary line of the British possessions; thence eastward along said boundary to the 27th degree of longitude W. from Washington; thence southward along said 27th degree to the place of beginning. This makes it the northermost Territory next the States east of the Missouri Valley. It is a good mining and agricultural region. The total population is put down at 15,822. Large accessions have been made since the census was taken.

NEBRASKA was settled by emigrants from the Northern and Western States, and was formed out of a part of the territory ceded by France, April 30, 1803. Attempts to organize it were made in 1844 and 1848, but it was not accomplished until May 30, 1854. Area 75,955 square miles, or 44,796,160 acres. Population 28,841, besides a few roving tribes of Indians. A Convention adopted a State Constitution February 9, 1866, which was submitted to the people on the 22d of June, and adopted by a vote of 3,938 for, to 3,838 against, and State officers were elected. A bill was passed by Congress, July 27th, admitting the State, but the President withheld his signature. It is an agricultural region, its prairies affording boundless pasture lands.

NEW MEXICO was formed from a part of the territory ceded to the United States by Mexico, by the treaty of Guadaloupe Hidalgo, February 2, 1848, and was organized into a Territory September 9, 1850.—Area 121,201 square miles, or 77,568,640 acres. Population 83,000, besides large tribes of warlike Indians. The principal resource of the country is its minerals.

UTAH was settled by the Mormons, and was formed from a part of the territory ceded to the United States by Mexico, by the treaty of Guadaloupe Hidalgo, February 2, 1848, and was organized into a Territory, September 9, 1850. Area, 106,382 square miles, or 68,054,480 acres. Populaton, 40,273, of whom 29 were slaves. Brine, sulphureous and chalybeate springs abound; limestone, granite, sandstone and marble are found in large quantities; iron is abundant, and gold, silver, copper, lead and zinc have been found. Not one-fiftieth part of the soil is fit for tillage, but on that which is, abundant crops of grain and considerable cotton are raised. A Convention was held at Great Salt Lake City, January 22, 1862, and a State Constitution formed, but it has not been acted on by Congress.

WASHINGTON was settled by emigrants from the Northern and Western States, and was organized into a Territory, March 2, 1853, from the northern portion of Oregon, to which was added another portion from the eastern part when the latter Territory was admitted as a State, February Area 69,994 square miles, or 48,636,800 acres. 11,168, besides numerous tribes of Indians.

STAMP DUTIES.

SCHEDULE OF DUTIES ON AND AFTER MARCH 1, 1867.

Stamp Duty. Accidental injuries to persons, tickny at sight or on demand, ets, or contracts for insurance against, exempt. exempt. Affidavits. Agreement or contract not otherwise specified:
For every sheet or piece of paper
upon which either of the same mand. Bill of exchange, (inland,) draft or order for the payment of any \$0 5 shall be written. Agreement, renewal of, same stamp as original instrument. Appraisement of value or damage or for any other purpose: For each sheet of paper on which it Б is written Assignment of a lease, same stamp as original, and additional as original, and additional stamp upon the value or con-sideration of transfer, accord-And for every additional \$100 or fractional part thereof in ex-cess of \$100, ing to the rates of stamps on deeds. (See Conveyance.)
Assignment of policy of insurance, Assignment or policy of insurance, same stamp as original instrument. (See Insurance.)
Assignment of mortgage, same stamp as that required upon a mortgage for the amount remaining unpaid. (See Mortgage)

gage.) Bank check, draft or order for any

sum of money drawn upon any

Sheriff's return on writ or other eign country, but payable in the United States, until the proper stamp has been afprocess, exempt. Trust deed, made to secure a debt, to be stamped as a mortgage. fixed thereto. A penalty of fifty dollars is imposed upon Warehouse receipts, exempt. every person who frandulently makes use Warrant of attorney accompany-ing a bond or note, if the bond of an adhesive stamp to denote the duty required by the revenue act, without effectu-ally cancelling and obliterating the same in or note is stamped, exempt. Weigher's returns, exempt. the manner required by law. Attention is particularly called to the following extract from section 155, of the act of June 30, 1864, as amended by the act of July 13, 1866:

"If any person shall wilfully remove or cause to be removed, after or cause to be acted the carcalling as deficing makes. Official documents, instruments, and papers issued by officers of the United States Government, exempt. Official instruments, documents, and papers issued by the officers of any State, county, town, tered, the cancelling or defacing marks on orother municipal corporation, in the exercise of functions atrictly belonging to them in their ordinary governmental or municipal corporation. any adhesive stamp, with intent to use the same, or to cause the use of the same, after it shall have been used once, or shall knowingly or wilfully sell or buy such washed or restored stamps, or offer the same for sale, or give or expose the same to any per municipal capacity, Papera necessary to be used for exempt.

son for use, or knowingly use the same or prepare the same with intent for the fur-ther use thereof, or if any person shall knowingly and without lawful excuse (the proof whereof shall lie on the person accused) have in his possession any washed, restored, or altered stamps, which have been removed from any vellum, parchment, paper, instrument or writing; then, and in every such case, every person so offending, and every person knowingly and wlifully aiding, abetting, or assisting in committing any such offence as aforesaid, shall, on conviction thereof, * * * be punished by a fine not exceeding one thousand dollars, or by imprisonment and confinement to hard labor not exceeding five years, or both, at the discretion of the court."

It is not lawful to record any instrument, decument, or paper required by law to be stamped, or any copy thereof, unless stamped or stamps of the proper amount have been affixed and cancelled in the manner required by law; and such instrument or copy and the record thereof are utterly null and wid, and cannot be used or admitted as and void, and cannot be used or admitted as evidence in any court until the defect has been cured as provided in section 158. All willful violations of the law should be

reported to the United States District Attorncy within and for the district where they are committed.

GENERAL REMARKS.

Revenue stamps may be used indiscriminately upon any of the matters or things enuly manufactured in Schedule B, except proprietary and playing card stamps, for which a special use has been provided.

Postage stamps cannot be used in payment of the duty chargeable on instru-

ments.

The law does not designate which of the parties to an instrument shall furnish the necessary stamp, nor does the Commission-er of Internal Revenne assume to determine that it shall be supplied by one party rather than by another; but if an instrument sub-ject to stamp duty is issued without having the necessary stamps affixed thereto, it cannot be recorded, or admitted, or nsed in evidence, in any court, until a legal stamp or stamps, denoting the amount of tax, shall have been affixed as prescribed by law, and the person who thus issues it is liable to a penalty, if he omits the stamps with an intent to evade the provisions of the internal revenue act.

The first act imposing a stamp tax upon certain specified instruments took effect, so far as said tax is concerned, October 1, 1862. The impression which seems to prevail to some extent, that no stamps are required upon any instruments issued in the States lately in insurrection, prior to the surren-der, or prior to the establishment of collection districts there, is erroneous.

Instruments issued in those States since October 1, 1862, are subject to the same taxes as similar ones issued at the same time

it admissible in evidence, or to entitle it to record

Certificates of loan in which there shall appear any written or printed evidence of an amount of money to be paid on demand, or at a time designated, are subject to stamp duty as "promissory notes."

When two or more persons join in the execution of an instrument, the stamp to which the instrument is liable under the law, may be affixed and cancelled by either of them; and "when more than one signature is affixed to the same paper, one or more stamps may be affixed thereto, representing the whole amount of the stamp required for

such signatures."

No stamp is required on any warrant of attorney accompanying a bond or note, when such bond or note has affixed thereto the stamp or stamps denoting the duty required; and, whenever any bond or note is secured by mortgage, but one stamp duty is required on such papers—such stamp duty being the highest rate required for such instruments, or either of them. In such case a note or memorandum of the value or denomination of the stamp affixed should be made upon the margin or in the acknowledgement of the instrument which is not stamped.

Particular attention is called to change in section 1st, by striking out the words "or used;" the exemption thereunder is thus restricted to documents, &c., issued by the officers therein named. Also to the changes in sections 152 and 158, by inserting the words "and cancelled in the

manner required by law."

The acceptor or acceptors of any bill of exchange, or order for the payment of any sum of money, drawn or purporting to be drawn in any foreign country, but psyable in the United States, must, before paying or accepting the same, place thereupon a stamp indicating the duty.

It is only upon conveyances of realty sold that conveyance stamps are necessary. deed of real estate made without valuable consideration need not be stamped as a conveyance; but if it contains covenants, such, for instance, as a covenant to warrant and defend the title, it should be stamped

as an agreement or contract.

When a deed purporting to be a convey-ance of realty sold, and stamped accordingly, is inoperative, a deed of confirmation, made simply to cure the defect, requires no stamp. In such case, the second deed should contain a recital of the facts, and should show the reasons for its execution.

Partition deeds between tenants in common, need not be stamped as conveyances, inasmuch as there is no sale of realty, but merely a marking out, or a defining, of the boundaries of the part belonging to each; but where money or other valuable consid-eration is paid by one co-tenant to another for equality of partition, there is a sale to the extent of such consideration, and the conveyance, by the party receiving it, should be stamped accordingly.

in the other States.

No stamp is necessary upon an instrument executed prior to October 1, 1862, to make of fixers of any county, town, or other mu-

uicipal corporation in the discharge of their strictly official duties, is exempt from

atamp tax.

A conveyance of realty sold, subject to a mortgage, should be etamped according to mortage, should be stamped according to the consideration, or the value of the property mencumbered. The consideration in structure to the found by adding the amount paid for the equity of redemption to the mortgage debt. The fact that one part of the consideration is paid to the mortgagor and the other part to the mort-gagee does not change the liability of the

conveyance.

The stamp tax upon a mortgage is based upon the amount it is given to secure. The fact that the value of the property mortgaged is less than that amount, and that cousequently the security is only partial, does not change the liability of the justrument. When, therefore, a aecond mortgage is given to secure the payment of a sum of mon-cy partially accured by a prior mortgage upon other property, or when two mortgages upon aeparate property are given at the same time to secure the payment of the same sum, each should be stamped as though it were the only one.

A mortgage given to secure a surety from loss, or given for any purpose whatever, other than as accurity for the payment of a definite and certain sum of money, is taxaable only as an agreement or contract

The stamp duty upon a lease, agreement, memorandum, or contract for the hire, use, or rent of any land, tenement, or portion thereof, is based upon the annual rent or rental value of the property leased, and the duty is the same whether the lease be for one year, for a term of yeara, or for the fractional part of a year only,

Upon every assignment or transfer of a mortgage, a stamp tax is required equal to that imposed upon a mortgage for the amount remaining unpaid; this tax is required upon every auch transfer in writing, whether there is a sale of the mortgage or not; but no stamp is necessary upon the endorsement of a negotiable instrument. even though the legal effect of such indorsement is to transfer a mortgage by which

the instrument is secured.

An assignment of a lease within the meaning and intent of Schedule B, is an assignment of the leasehold, or of some portion thereof, by the lessee, or by some person claiming by, from, or under him; auch an assignment as subrogates the assignee to the rights, or some portion of the rights, of the lessee, or of the person standing in his place. A transfer by the lessor of his part of a lease, neither giving nor purporting to give a claim to the leasehold, or to any pant thereof, but simply a right to the rents, &c., is subject to stamp tax as a contract or agreement only.

The atamp tax upon a fire insurance policy is based upon the premium

Deposit notes taken by a mutual fire insurance company, not as payment of pre-mium nor as evidence of indebtedness therefor, but to be used simply as a basis upon which to make ratable assessments to meet the losses incurred by the company.

should not be reckoued as premium in determining the amount of stamp taxes upon

the policies.

Where a policy of insurance properly stamped has been issued and lost, no stamp is necessary upon another issued by the same company to the same party, covering the same property, time, &c., and designed aimply to supply the loss. The second aimply to supply the loss. The secon policy should recite the loss of the first.

An instrument which operates as the renewal of a policy of insurance, ie aubject to

when a policy of insurance is issued for a certain time, whether it be for one year ouly or for a term of years, a receipt for premium, or any other inetrument which has the legal effect to continue the contract and extend its operation beyond that time, requires the same amount of revenue stamps as the policy itself; but such a receipt as is usually given for the payment of the monthly, quarterly, or annual premium, is not a renewal within the meaning of the statute. The payment simply prevente the policy from expiring, by reason of non-per-formance of its conditions; a receipt given for such a payment requires a two-cent stamp, if the amount received exceeds twenty dollars, and a two-cent stamp only. When, however, the time of payment has passed, and a tender of the premium is not sufficient to bind the company, but a new policy or a new contract in some form, with the mutuality essential to every contract, becomes necessary between the insurer and the insured, the same amount of stampe should be naed as that required upon the original policy.

A permit issued by a life insurance company changing the terms of a policy as to travel, residence, occupation, &c., should be stamped as a contract or agreement.

A bill single or a bill obligatory, i. e., an instrument in the form of a promissory note, under seal, is subject to stamp duty as written or printed evidence of an amount of money to be paid on demand or at a time designated, at the rate of five cents for each one hundred dollars or fractional part thereof.

A waiver of protest, or of demand and notice, written upon negotiable paper and aigned by the indoraer, is an agreement, and requires a five-cent stamp.

A stamp duty of twenty-five ceuts is imposed upon the "protest of every note, bill of exchange, check or draft," and upon every marine protest. If several notes, bills of exchange, drafts, &c., are protest. ed at the same time and all attached to one and the same certificate, atamps should be affixed to the amount of twenty-five cents for each note, bill, draft, &c., thue protest-

When, as is generally the case, the cap-tion to a deposition contains other certification to a deposition contains other certification. cates in addition to the jurat to the affidavit of the deponent, such as a certificate that the parties were or were not notified, that they did or did not appear, that they did or did not object, &c., it is subject to a stamp duty of five cents.
When an attested copy of a writ or other

process is used by a sheriff or other person in making personal service, or in attaching property, a five-cent stamp should be affixad to the certificate of attestation.

A marriage certificate issued by the officiating clergyman or magistrate, to be returned to any officer of a State, county, city, town, or other municipal corporation, to constitute part of a public record, requires no stamp; but if it is to be retained by the parties, a five-cent stamp should be affixed.

The stamp tax npon a bill of sale, by which any ship or vessel, or any part thereof, is conveyed to or vested in any other person or persons, is at the same rate as that imposed upon conveyances of realty sold; a bill of sale of any other personal property should be stamped as a contract or agreement.

An assignment of real or personal prop-erty, or of both, for the henefit of creditors, should be stamped as an agreement or con-

Written or printed assignments of agreements, honds, notes not negotiable, and of all other instruments the assignments of which are not particularly specified in the foregoing schedule, should he stamped as agreements.

No stamp is necessary npon the registry of a judgment, even though the registry is such in its legal effect as to create a lien which operates as a mortgage upon the

which operates as a mortgage upon the property of the judgment debtor.

When a "power of attorney or proxy for voting at any election for officers of any neorporated company or society, except religious, charitable, or literary societies, or public cemeteries," is signed by several stockholders owning sometre and discontinuous constitutions. al stockholders, owning separate and dis-tinct shares, it is, in its legal effect, the separate instrument of each, and requires stamps to the amount of ten cents for each and every signature; one or more stamps may be used representing the whole amount required.

A notice from landlord to tenant to quit possession of premises requires no stamp.

tax is imposed npon every A stamp "manifest for custom-house entry or clearance of the cargo of any ship, vessel, or steamer for a foreign port." The amount of this tax in each case depends upon the registered tonnage of the vessel.

If a vessel clears in hallast and has no cargo whatever, no stamp is necessary; but if she has any-however small the amount

nut it see as any-nowever small the amount
—a stamp should be used.

A bond to convey real estate requires
stamps to the amount of twenty-five cents
The stamp duty upon the probate of a
will, or upon letters of administration, is hased npon the sworn or declared value of all the estate and effects, real, personal, and mixed, undiminished by the debts of the estate for or in respect of which such probate or letters are applied for.

When the property belonging to the estate of a person deceased, lies under different jurisdictions and it becomes necessary to take out letters in two or more places, the letters should be stamped according to the value of all the property, real, personal, and mixed, for or in respect of which the particular letters in each case are issued.

Letters de bonis non should he stamped according to the amount of property remaining to be administered upon thereumder, regardless of the stamps upon the original letters.

A mere copy of an instrument is not subject to stamp duty unless it is a certified one, in which case a five-cent stamp should one; in which case a neverth stamp stamp in the person attesting it; but when an instrument is executed and issued in duplicate, triplicate, &c., as in the case of a lease of two or more parts, each part has the same legal effect as the other, and each should be stamped as an original.

POSTAL RATES AND REGULATIONS

LETTERS.—The law requires postage on | all letters (including those to foreign countries when prepaid), excepting those written to the President or Vice President, or members of Congress, or (on official basi-ness) to the chiefs of the executive departments of the Government, and the heads of bureaux and chief clerks, and others invested with the franking privilege, to be prepaid by stamps or stamped envelopes, prepayment in money being prohibited.
All drop-letters must be prepaid.

rate of postage on drop-letters, at offices where free delivery by carrier is established, is two cents per half ounce or fraction of a half ounce; at offices where such free delivery is NOT established the rate is one

cent.

The single rate of postage on all domestic mail letters throughout the States, is three cents per half ounce, with an additional rate of three cents for each additional half ounce or fraction of a half The ten cent (Pacific) rate is abulished.

To and from Canada and New Brunswick 10 cents per half ounce, irrespective of dis-

tance.
To and from other British North American Provinces, for distance not over 3,000 miles, 10 cents. Over 3,000, 15 cents,
For every additional half ounce, or fraction of a half onnee, an additional rate is charged. Prepayment is optional on all letters for the British North American Provinces avent Nawfoundiand, to which preinces except Newfoundland, to which pre-

psyment is compalsory.

NEWSPAPERS, ETC.—Letter postage is to be charged on all handbills, circulars, or other printed matter which shall contain any manuscript writing whatever.

Daguerreotypes, when sent in the mail, are to be charged with letter postage by

weight.

Photographs on cards, paper, and other flexible material, (not in cases), can be sent at the same rate as miscellaneous printed matter, viz., two cents for each four ounces or fraction thereof.

Photograph Albums are chargeable with book postage-four cents for each four

ounces or fraction thereof.

NEWSPAPER POSTAGE.—Postage on daily papers to subscribers when prepaid quarterly or yearly in advance, either at the mailing office or office of delivery, per quarter (three months), 35 cts.; six times per week, per quarter 30 cts.; for tri-weekly, per quarter 15 cts.; for semi-weekly, per quarter 10 cts.; for weekly, per quarter 5 cents.

Weekly newspapers (one copy only) sent by the publisher to actual subscribers within the county where printed and published,

FREE.

Postage per quarter (to be paid quarterly or yearly in advance) on newspapers and periodicals issued less frequently than once a week, sent to actual subscribers in any part of the United States: Semi monthly, not over 4 oz., 6 cts.; over 4 oz. and not over 8 oz., 12 cts.; over 8 oz. and not over 12 oz., 18 cts.; monthly, not over 4 oz., 3 cts; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.

TRANSIENT MATTER .- Books not over 4 oz. in weight, to one address, 4 cts.; over 4 oz. and not over 8 oz., 8 cts.; over 8 oz. and not over 12 oz., 12 cts.; over 12 oz. and not

over 16 oz., 16 cts. Circulars not exceeding three in number to one address, 2 cts.; over 3 and not over 6, 4 cts.; over 6 and not over 9, 6 cts.; over 9 and not exceeding 12, 8 cts.

On miscellaneons mailable matter, bracing all pamphlets, occasional publica-tions, transient newspapers, hand-bills and posters, book mannscripts and proof-sheets, whether corrected or not, maps, prints, engravings, sheet music, blanks, flexible patgravings, sneet music, bianks, neature parterns, samples, and sample cards, phonographic paper, letter envelopes, poetal envelopes or wrappers, cards, paper, plain or ornamental, photographic representations of different types, seeds, cuttings, bulbs, roots and scious,) the poetage to be pre-paid by stamps, is on one package, to one address, not over 4 oz. in weight, 2 cts.; over 4 oz. and not over 8 oz., 4 cts.; over 8 oz. and not over 12 oz., 6 cts.; over 12 oz. and not over 16 oz., 8 cts. The weight of pack-ages of seeds, cuttings, roots and scions, to be franked, is limited to thirty-two ounces.

[ALL printed matter (except single cop ies of newspapers, magazines, and periodi-cals to regular subscribers) sent via overland mail, is to be charged at LETTER POST-

AGE rates.]

Any word or communication, whether by printing, writing, marks or signs, upon the cover or wrapper of a newspaper, pampblet, magazine, or other printed matter, other than the name or address of the person to whom it is to be sent, and the date when the subscription expires, subjects the package to letter postage

LETTER POSTAGE TO FOREIGN COUNTRIES. -For each half ounce: To England, Ireland and Scotland, 24 cts.; to France and Algeria, by French mails, 15 cts., quarter ounce. By the Bremen or Hamburg mails, the postage to Bremen and Hamburg is 10 cts.; to Frankfort and Wurtemburg, 15cts.; to the German States, Prussia, Austria, and ita States, and Lombardy, 15 cts.; to the Serdinian States, 23 cta.; to Papal States, 28 cts.; to the Two Sicilies, 22 cts.; to Denmark, 20 cts.; to Sweden, 33 cts.; to Norway, 38 cts.; to Russia, 29 cts. By the Prussian closed mails, or by French mail, the postage to these countries is higher. the postage to these countries is higher.—
The prepayment of letters to them, excepting to the Two Sicilies, is optional; as also
to Canada and the British North American
States, where the postage is 10 cts. under
3,000 miles, and 15 cts. over. To the follow-

ing, postage must be prepaid: To British West Indies, Aspinwall, Panama, and Mexico, 10 cts. under 2,500 miles, 20 cts. over; to New Granada, 18 cts; to Peru, 22 cts; to Ecnador, Bolivia, and Chili, 34 cts; to Sandwich Islands, New South Wales, and China, by mail to San Francisco, thence by private ship, 10 cts; to China and Australia via England, 33 and 45 cts., via Marseilles, 35 and 37 cents 35 and 57 cents.

Infallible Rules for Detecting Counterfeit or Spurious Bank Notes.

RULE 1st.—Examine the shading of the letters in title of Bank called LATHEWORK, which in genuine notes presents an even, straight, light and silky appearance, generally so fine and smooth as to appear to be all in one solid, pale body. In the counterfeit the lines are coarse and irregular, and in many of the longer lines breaks will be perceived, thus presenting a very inferior finish in comparison to genuine work.

2d.—Observe the dies, circles and ovals

in the gennine; they are composed of a network of lines, which, by crossing each other at certain angles, produce an endless variety offigures; see the one cent stamp attached. The fine line aloue is the unit which enables you to detect spurious work. In the counterfeit, the REPRESENTED white lines are coarse, irregular, and cross each other in a confused, irregular manner, blurred and imperfect producing

figures.
3d.—Examine the form and features of all human figures on the note. Iu the genuine, the texture of the skin is represented by fine dots and lines intermixed. In the eyes, the pupil is distinctly visible, and the white clearly seen; the nose, mouth and chin, well formed, natural and expressive; the lips are slightly ponting, and the chin well thrown out; and the delicate shading of the neck perfectly harmonizes with the rest of the figure. Observe the fingers and toes; they should be clearly and accurately defined. The hair of the head should show the fine strands and present a natural appearance. The folds of the drapery of human figures should lay natural and present man figures should lay natural and present a fine, finished appearance. In the counterfeit the female figure does not bear the natural prominence in outlines; observe, the eyes and shading surrounding does not present the lifelike appearance it should. The fingers and toes are not properly and proportionately defined; the hair does not bear that soft and finished appearance as in the genuine the genuiue.

4th.—Examine the imprint or engraver's names in the evenness and shape of the surrounding shading in altered dies was

fine letters. Counterfeits never bear the imprint perfect. This rule should be strictly observed, as it is infallible in detecting

counterfeita.

5th.—In the genuine note the landscapes are well finished; trees and shruhs are neatly drawn; the limbs well proportioned, and the foliage presenting a fine natural appearance; clear sky is formed of fine parallel lines, and when clouds or heavy skies appear, they cross each other, and bear a soft, smooth and natural appearance. The perspective, showing a view of the surrounding country, is always clear and distinct. The small figures in the background are always plainly seen, and their ontlines and general character recognized. Shipe are well defined and the canvase has a clear texture; railroad cars are very accurately delineated; in examining a train observe carefully the car most distant. In the counterfeit the landscape distant. In the counterful the haluscape is usually poorly executed; the leaves of trees poorly and unnaturally defined.—The lines representing still water are scratchy rather than parallel, the sky is represented generally in like manner, and where rolling clouds are to be seen, the unnatural effect is obvious. Domestic animals are generally poorly executed, particularly the head and limbs; the eyea are aeldom clearly defined. Shipa are poorly drawn, the texture of the canvass coarse and inferior in style of workmanship, thus giving an artificial appearance. Railroad cars are also poorly executed; the car farthest from the eye is usually the most imperfect. The perspective is always imperfect, the figures in the background can seldom be recognized.

6th.—Bills altered from a smaller to a higher denomination, can readily be de-tected by a close observer, in consequence of the striking difference between the parts which have been extracted and the rest of the note. This difference is readily perceived in the lack of color, body and finish of the dye; we have seen bills where the

too dark, but from the back or finish of the white lines yon have a sure test. Again observe particularly the words "Five" or "Ten Dollars" as the case may be, denoting the denomination of the note; the parallel ontlines and shading (if any) are coarse and imperfect. Alterations are frequently made by pasting a greater denomination over a smaller, but by holding the bill up to the light, the fraud will be perceived. Another method resorted to is to cut out the figures in the dies as well as the words one dollar, or the words two or three as the case may he, and with a sharp eraser, scrape down the ends and also the edges of the pieces to he inserted; when the pieces thus prepared are sfixed they are hardly perceivable; but by passing the note through the hand, so as to feel the die both with the finger and thumb at the same time, the fraud will be detected by the stiffness of the outer edges, "occasioned by the gum or method adopted" in affixing the parts. The letter Should always he examined, as in many alterations it is pasted or stamped at the end of the word "dollar;" and even when stamped there, the carrying out of the outlines for its shading will readily show the fraud. Bills of broken banks are frequently altered by extracting the name of bank, state and town; they may readily be de-

tected by observing first the state, accord the title or name of the bank, third the town or location.

GENERAL REMARKS IN REFERENCE TO COUNTERFEITS.—The paper on which they are printed is generally of a very inferior quality, with less body, finish and toughness than bank note paper has. The ink generally lacks the rich luster of the genuine; the red letters and figures are generally imperfect, and the ink does not present the vermillion hue as it should. The printing is generally inferior, nsally exhibiting specks of white in the most prominent letters. The date and filling up, and the President's and Cashier's names are generally written by the same person, although in many instances they present a different appearance. There are bills in circulation bearing either gennine dies or vignettes; but upon close examination you will be enabled to detect any sparions bill, whether counterfeit or altered, by the instructions here given, if persevered in for a short time. We beg to suggest, it time will admit, the learner should examine minutely every hill he receives. A powerful pocket magnifying glass, which can be purchased for from fifty cents to one dollar at any of the opticians, will greatly eashe you to see and comprehend the difference between genutne and spurions work.

HOW TO SUCCEED IN BUSINESS.

What will my readers give to know how to get rich? Now, I will not vouch that the following rules will enable every person who may read them to acquire wealth; but this I will answer for, that if ever a man does grow rich by honest means, and retains his wealth for any length of time, he must practice npon the principles laid down in the following easay. The remarks are not original with me, but I strongly commend them to the attention of every young man, at least as affording the true secret of success in attaining wealth. A single perusal of such an essay at an impressible moment, has sometimes a very wonderful effect upon the disposition and character.

Fortune, they say, is a fickle dame—full of her freaks and caprices; who blindly distributes her favore witbout the slightest discrimination. So inconstant, so wavering is she represented, that her most faithful votaries can place no relisance on her promises. Disappointment, they tell us, is the lot of those who make offerings at

her shrine. Now, all this is a vile slander

upon the dear blind lady.

Although wealth often appears the result of mere accident, or a for unate concurrence of favorable circomstances without any exertion of skill or foresight, yet any man of annud health and unimpaired wind may become wealthy, if he takes the proper steps.

Foremost in the list of requisites are honesty and strict integrity in every transaction of life. Let a man have the reputation of being fair and upright in his dealings, and he will possess the confidence of all who know him. Without these qualities every other merit will prove unavailing. Ask concerning a man, "Is he active and capable?" Yes. "Industrions, temperate and regular in his habits?"—Oh yes. "Is he because the honest? Is he trustworthy?" Why, as to that, I am sorry to say that he is not to be trusted; he needs watching; he is a little tricky, and will take an undue advantage, if he can. "Then I will have nothing to do with him," will be the in-

variable reply. Why, then, is honesty the best policy? Because, without it, you will get a bad name, and everybody will shun

you.

A character for knavery will prove an in-surmountable obstacle to success in silmost every undertaking. It will be found that the straight line is, in business, as in geometry, the shortest. In a word, it is almost impossible for a dishonest man to acquire wealth by a regular process of bus-iness, because he is shunned as a depredator upon society.

Needy men are apt to deviate from the rule of integrity, under the plea that ne ceasity knows no law; they might as well add that it knows no shame. The course is suicidal, and by destroying all confidence, ever keeps them immured in poverty, although they may possess every other quality for success in the world.

Punctuality, which is said to be the soul of husiness, is another important element in the art of money getting. The man known to he acrupulously exact in the fulfillment of his engagements, gains the confidence of all, and may command all the means he can use with advantage: whereas, a man careless and regardless of his promises in money matters will have every purse closed against him. Therefore

Next, let us consider the advantages of a cantious circumspection in our intercourse with the world. Slowness of be-lief and a proper distrust are essential to success. The credulous and confiding are success. The creditions and command are ever the dupes of knaves and impostors. Ask those who have lost their property how it happened, and you will find in most cases that it has been owing to misplaced confidence. One has lost by enplaced confidence. One has lost by endoraing; another by readting, another by false representations; all of which a little more foresight and a little more discount of the aftrust would have prevented. In the affairs of this world men are not saved by

faith, but by the want of it.

Judge of men by what they do, not by hat they say. Believe in looks rather what they say. Believe in looks rather than words. Observe all their movements. Ascertain their motives and their ends. Notice what they say or do in their un-guarded momenta, when under the influ-ence of excitement. The passiona have ence of excitement. The passiona have been compared to tortures which force men to reveal their secrets. Before trusting a man, before putting it in his power to cause you a loss, possess yourself of every available information relative to him. Learn his history, his habits, inclinations and propensities; his reputation for honor, industry, frugality and punctuality; his prospecta, resources, aupports, advantages and disadvantages; bis intentions and mo-tives of action; who are his friends and enemies, and what are his good or bad qualities. You may learn a man's good qualities and advantages from his friends—his had qualities and disadvantages from his enemies. Make due silowance for exaggeration in both. Finally, examine carefully before engaging in anything, and act with energy afterwards. Have the hundred eyes of

Argus beforehand, and the hundred hands of Briarius afterwards.

Order and system in the management of business must not be neglected. Nothing contributes more to dispatch. Huve a place for everything and everything in its place; a time for everything, and everything in its time. Do first what presses most, and having determined what is to be done, and how it is to he done, lose no time in doing it. Without this method all is hurry and confusion, little or nothing is accomplished, and business is attended to with neither pleasure nor profit.

A polite, affahle deportment is recommended. Agreeable manners contribute powerfully to a man's success. Take two men, possessing equal advantages in every other respect, but let one be gentlemanly, kind, obliging and conciliating in his man-ners; the other harsh, rude and disobliging; ners; the other harsh, rude and disobliging; and the one will become rich, while the

other will sturve.

We are now to consider a very important principle in the business of money-getting, namely—Industry — persevering, indefatinamely—Industry — persevering, indefati-gable attention to husiness. Persevering diligence is the Philosopher's stone, which turns everything to gold. Constant, regu-lar, habitual and systematic application to hnainesa, must in time, it properly directed, produce great results. It must lead to wealth, with the same certainty that pov-erty follows in the train of idleness and inattention. It has been truly remarked that he who follows his amusements inatead of his business, will, in a short time, have no husiness to follow.

The art of money-asving is an insportant part of the art of money-getting. Without frugality no one can become rich; with it, few would be poor. Those who consume as fast as they produce, are on the road to ruin. As most of the poverty we meet with grows out of idleness and extrava-gunce, so most large fortunes have been the result of habitual industry and frugalitry. The practice of economy is an necessary in the expenditure of time as of money. They say if "we take care of the pence the pounds will take care of themiutes, the days will take care of themiuntes, the days will take care of them-

selves.

The acquisition of wealth demands as much self-denial, and as many sacrifices of present gratification, as the practice of virtue itself. Vice and poverty proceed, in some degree, from the same sources, namely—the disposition to sacrifice the future to the present; the inability to forego a small present pleasure for great future advantages. Men fail of fortune in this world, as they fail of happiness in the world to come, simply because they are un-willing to deny themselves momentary en-joyments for the sake of permanent future happinesa.

Every large city is filled with persons, who, in order to apport the appearance of wealth, constantly live beyond their income, and make up the deficiency by contracting debts which are never paid. Others, there are, the mere drones of so-

ciety, who pass their days in idleness, and subsist by pirating on the hives of the industrious. Many who run a short-lived career of splendid beggary, could they be but persuaded to adopt a system of rigid economy for a few years, might pass the remainder of their days in affluence. But no! They must keep up appearances, they must live like other folks.

Their debte accumulate; their credit fails; they are haraseed by duns, and besieged by couetables and sheriff. In this extremity, as a last reaort, they submit to a shameful dependence, or engage in criminal practices which entail hopeless wretch. edness and infamy on themselves and

families.

Stick to the business in which you are regularly employed. Let speculators make thousands in a year or a day; mind your own regular trade, never turning from it to the right hand or to the left. If you are a merchant, a professional man, or a me-chanic, never buy lots or stocks, unless you have surplus money which you wish to inveet. Your own business you understand as well as other men; but other people's business you do not understand. Let your business be some one which is useful to the community. All such occupations possess the elements of profit in themselves.

How to Secure the Public Lands,

OR THE ENTRY OF THE SAME UNDER THE PRE-EMPTION AND HOMESTEAD LAWS.

The following circular gives all necessary information as to the procedure necessary in purchasing and securing the public lands:

DEPARTMENT OF THE INTERIOR, GEN'L LAND OFFICE, July 19, 1865.

Numerous questions having arisen as to the mode of procedure to purchase public lands, or acquire title to the same by bounty land locations, by pre-emptions or by homestead, this circular is communicated for the information of all concerned.

In order to acquire title to public lands the following steps must be taken:

1. Application must be made to the Register of the district land office in which the

land desired may be situated.

A list of all the land offices in the United States is furnished by the Department, with the seats of the different offices, where it is the duty of the Register and Receiver to be in attendance, and give proper facilities and information to persons

desirone of obtaining lands.

The minimum price of ordinary public lands is \$1,25 per acre. The even or reserved sections falling within railroad grants are increased to double the minimum

price, being \$2,50 per acre.

Lands once offered at public sale, and not afterwards kept out of market by reservation, or otherwise, so as to prevent free competition, may be entered or located.

2. By the applicant filing with the Regis-

ter his written application describing the

tract, with its area; the Register will then certify to the receiver whether the land is vacant, with its price; and when found to be so, the applicant must pay that price per acre, or may locate the same with land warrant, and thereafter the Receiver will warrant, and mercanter me neceiver wingive him a "duplicate receipt," which he is required to surrender previous to the delivery to him of the patent, which may be had either by application for it to the Register or to the General Land Office.

3. If the tract has not been offered at public sale it is not liable to ordinary private entry, but may be secured by a party legally qualified, upon his compliance with the requirements of the pre-emption laws of 4th September, 1841, and 3d March, 1843, and after such party shall have made actual settlement for such a length of time as will show he designe it for his permanent home, and is acting in good faith, building a house and residing therein, he may proceed to the district land office, establish his pre-emption claim according to law, by proving his actual residence and cultivation, and showing that he is otherwise within the purview of these acts.— Then he can enter the land at \$1,25, either in cash or with bounty land warrant, unless the premises should be \$2,50 acre lande. In that case the whole purchase-money can he paid in cash, or one-half in cash, the residue with a bounty land warrant.

4. But if parties legally qualified desire to obtain title under the Homestead Act of 20th May, 1862, they can do so on com-

olving with the Department Circular, dated 1

30th October, 1862.

5. The law confines Homestead entries to surveyed lands; and although, in cer-tain States and Territories noted in the subjoined list, pre-emptors may go on land he-fore survey, yet they can only establish their claim after return of survey, but must file their pre-emption declaration within three their pre-emption declaration when three mouths after receipt of official plat, at the local land-office where the settlement was made hefore survey. Where, however, it was made after survey, the claimant must file within three months after date of settlemeut; and where actual residence and cultivation have been long enough to show

that the claimant has made the land his permanent home, he can establish his claim and pay for the same at any time hefore the date of the public sale of lands within the range in which his settlement may fall.

6. All nnoffered surveyed lands not ac quired under pre-emption, homestead, or otherwise, under express legal sauction, must he offered at public sale under the President's Proclamation, and struck off to the highest bidder, as required by act of April 24, 1820.

J. M. EDMUNDS Commissioner General Land Office.

LAW MAXIMS.

- 1. A promise of a dehtor to give "satisfactory security" for the payment of a por-tion of his debt, is a sufficient considera-tion for a release of the residue by his creditor.
- 2. Administrators are liable to account for interest on funds in their hands, al-though no profit shall have been made upon them, unless the exigencies of the estate rendered it prudent that they should hold the funds thus uninvested.
- 3. Any person who voluntarily becomes an agent for another, and in that capacity obtains information to which as a stranger he could have had no access, is bound in subsequent dealing with his principal, as purchaser of the property that formed the subject of his agency, to communicate such information.
- 4. When a house is rendered untenantable in consequence of improvements made on the adjoining lot, the owner of such cannot recover damages, hecause it is presumed that he had knowledge of the approaching danger in time to protect himself from it.
- 5. When a merchant ship is ahandoned by order of the master, for the purpose of saving life, and a part of the crew subse-quently meet the vessel so ahandoned and hring her safe into port, they will be entitled to salvage.
- 6. A person who has been led to sell goods by means of false pretenses, cannot recover them from one who has purchased them in good faith from the fraudulent vendor.

- 7. An agreement hy the holder of a note to give the principal debtor time for payment, without depriving himself of the right to sue, does not discharge the surety.
- A seller of goods who accepts, at the time of sale, the note of a third party, not endorsed by the buyer, in payment, can not in case the note is not paid, hold the buyer responsible for the value of the goods.
- 9. A day-book copied from a "hlotter" in which charges are first made, will not be received in evidence as a book of original entries.
- 10. Common carriers are not liable for extraordinary results of negligence that could not have been foreseen by ordinary skill and foresight.
- 11. A bidder at a Sheriff's sale may retract his hid at any time before the property is knocked down to him, whatever may be the conditions of the sale.
- 12. Acknowledgment of debt to a stranger does not preclude the operation of the statnte.
- 13. The fruits and grass on the farm or garden of an intestate descend to the heir.
- 14. Agents are solely liable to their principals.
- 15. A deposit of money in bank by a husband, in the name of his wife, survives to her.

- 16. Money paid on Sunday contracts may be recovered.
- 17. A debtor may give preference to one creditor over another, unless frand or special legislation can be proved.
- 18. A court caunot give judgment for a larger sum than that specified in the verdict.
- 19. Imbecility on the part of either husband or wife, invalidates the marriage.
- 20. An action for malicious prosecution will lie, though nothing further was done than suing out warrants.
- 21. An agreement not to continue the practice of a profession or business in any specified town, in the party so agreeing has received a consideration for the same, is valid.
- 22. When A consigns goods to B to sell on commission, and B delivers them to C, in payment of his own antecedent debts, A can recover their value.
- 23. A finder of property is compelled to make diligent inquiry for the owner thereof, and to restore the same. If, on finding such property, he attempts to conceal such fact, he may be prosecuted for larceny.
- 24. A private person may obtain an injunction to prevent a public mischief by which he is affected in common with others.
- 25. Any person interested may obtain an injunction to restrain the State or a municipal corporation from maintaining a nuisance on its landa.
- 26. A discharge under the insolvent laws of one State will not discharge the insolvent from a contract made with a citizen of another State.
- 27. To prosecute a party with any other motive than to bring him to justice, is malicious prosecution, and actionable as such.
- 28. Ministers of the gospel, residing in any incorporated town, are not exempt from jury, military, or are service.
- 29. When a person contracts to build a house, and is prevented by sickness from finishing it, he can recover for the part performed, if such part is beneficial to the other party.
- 30. In a suit for enticing away a man'a wife, actual proof of the marriage is not necessary. Cohabitation, reputation, and the admission of marriage by the parties, are sufficient.
- 31. Permanent erections and fixtures, made by a mortgagor after the execution of the mortgage npon land conveyed by it, become a part of the mortgaged premises.
- 32. When a marriage is denied, and plaintiff has given sufficient evidence to establish it, the defendant cannot examine the wife to disprove the marriage.

- The amount of an express debt cannot be enlarged by application.
- 34. Contracts for advertisements in Sunday newspapers cannot be enforced.
- 35. A seller of goods, chattels, or other property, commits no frand, in law, when he neglects to tell the purchaser of any flaws, defects, or unsoundness in the same.
- 36. The opinions of witnesses, as to the value of a dog that has been killed, are not admissible in evidence. The value of the animal is to be decided by the jury.
- 37. If any person puts a fence on or plows the land of another, he is liable for trespass whether the owner has snatained injury or not.
- 38. If a person, who is unable from illness to sign his will, has his hand guided in making his mark, the signature is valid.
- 39. When land trespassed upon is occupied by a tenant, he alone can bring the action.
- 40. To say of a person, "If he does not come and make terms with me, I will make a bankrupt of him and ruin him," or any such threatening language, is actionable, without proof of special damage.
- 41. In an action for alander, the party making the complaint must prove the words alleged; other words of like meaning will not suffice.
- 42. In a suit of damages for aeduction, proof of pregnancy, and the birth of a child, is not essential. It is sufficient if the illness of the girl, whereby she was unable to labor, was produced by shame for the seduction; and this is such a loss of service as will snatain the action.
- 43. Addressing to a wife a letter containing matter defamatory to the character of her husband is a publication, and renders the writer amenable to damages.
- 44. A parent caunot sustain an action for any wrong done to a child, unless he has incurred aome direct pecuniary injury therefrom in consequence of some loss of service or expenses necessarily consequent thereupon.
- 45. A master is responsible for an injury resulting from the negligence of his servant, whilst driving his cart or carriage, provided the servant is at the time engaged in his master's business, even though the accident happens in a place to which his master's business does not call him; but it the journey of a servant be solely for a purpose of his own, and undertaken without the knowledge and consent of his master, the latter is not responsible.
- 46. An emigrant depot is not a nuisance in law.
- 47. A railroad track through the atreets is not a nuisance in law.

- 48. In an action for libel against a newspaper, extracts from such newspaper may be given to show its circulation, and the extent to which the libel has been published. The jury, in estimating the damages, are to look at the character of the libel, and whether the defendant is rich or poor. The plaintiff is entitled, in all cases, to his actual damages, and should be compensated for the mental sufferings endured, the public disgrace inflicted, and all actual discomfort produced.
- 49. Delivery of a husband's goods by a wife to her adulterer, he having knowledge that she has taken them without her husband's authority, is sufficient to sustain an indictment for larceny against the adulterer.
- 50. The fact that the insurer was not informed of the existence of impending litigation, affecting the premises insured, at the time the insurance was effected, does not vitiate the policy.
- 51. The liability of an innkeeper is not confined to personal haggage, but extends to all the property of the guest that he consents to receive.
- 52. When a minor executes a contract, and pays money, or delivers property on the same, he cannot afterwards disaffirm such contract and recover the money, or property, unless he restores to the other party the consideration received from him for such money or property.
- 53. When a person has, by legal inquisition been found an habitual drunkard, he cannot, even in his soher intervals, make contracts to bind himself or his property, nntil the inquisition is removed.
- 54. Any person dealing with the representative of a deceased person, is presumed, in law, to be fully apprized of the extent of such representative's authority to act in behalf of such estate.
- 55. In an action against a railroad company, by a passenger, to recover damages for injuries sustained on the road, it is not compulsory upon the plaintiff to prove actual negligence in the defendants; but it is obligatory on the part of the latter to prove that the injury was not owing to any fault or negligence of theirs.
- 56. A guest is a competent witness, in an action between himself and an inn-keeper, to prove the character and value of lost personal baggage. Money in a trunk, not exceeding the amount reasonably required by the traveler to defray the expenses of the journey which he has undertaken, is a part of his baggage; and in case of its loss, while at any inn, the plaintiff may prove its amount by his own testimony.
- 57. The deed of a minor is not absolutely void. The court is authorized to judge, from the instrument, whether it is void or not, according to its terms being favorable or unfavorable to the interests of the minor.

- 58. A married woman can neither sue nor be sued on any contract made by her during her marriage, except in an action relating to her individual property. The action must be commenced either by or against her husband. It is only when an action is brought on a contract made by her before her marriage, that she is to be joined as a co-plaintiff, or defendant, with her husband.
- 59. Any contract made with a person judicially declared a lunatic is void.
- 60. Money paid voluntarily in any transaction, with a knowledge of the facts, cannot be recovered.
- 61. In all cases of special contract for services, except in the case of a minor, the plaintiff can recover only the amount stipulated in the contract.
- 62. A wife is a competent witness with her husband, to prove the contents of a lost trunk, or when a party.
- 63. A wife cannot be convicted of receiving stolen goods when she received them of her husband.
- 64. Insurance against fire, by lightning or otherwise, does not cover loss by lightning when there is no combustion.
- 65. Failure to prove plea of justification, in a case of slander, aggravates the offence.
- 66. It is the agreement of the parties to sell by sample that constitutes a sale by sample, not the mere exhibition of a specimen of the goods.
- 67. An agent is liable to his principals for loss caused by his misstatements, tho' unintentional.
- 68. Makers of promissory notes given in advance for premiums on policies of insurance, thereafter to be taken, are liable thereon.
- 69. An agreement to pay for procuring an appointment to office is void.
- 70. An attorney may plead the statute of limitations, when sued by a client for money which he has collected and failed to pay over.
- 71. Testimony given by a deceased witness on first trial, is not required to he repeated verbatim on the second.
- 72. A person entitling himself to a reward offered for lost property, has a lien upon the property for the reward; but only when a definite reward is offered.
- 73. Confession by a prisoner must be voluntarily made, to constitute evidence against him.
- 74. The defendant in a suit must he served with process; but service of such process upon his wife, even in his absence from the State, is not, in the absence of statutory provisions, sufficient.

- 75. The measure of damages in trespass for cutting timber, is its value as a chattel on the land where it was felled, and not the market price of the lumber manufactured.
- 76. To support an indictment for malicious mischief in killing an animal, malice towards its owner must be shown, not merely passion excited against the animal itself.
- 77. No action can be maintained against a sheriff for omitting to account for money obtained upou an execution within a reasonable time. He has till the return day to render such account.
- 78. An interest in the profits of an enterprise, as profits, renders the party holding it a partner in the enterprise, and makes him presumptively liable to share any loss.
- 79. Males can marry at fourteen, and females at twelve years of age.
- 80. All cattle found at large upon sny public road, can be driven by any person to the public pound.
- 81. Any dog chasing, barking, or otherwise threatening a passer-by in any street, lane, road, or other public thoroughfare, may be lawfully killed for the same.
- 82. A written promise for the payment of such amount as may come into the hands of the promisor, is held to be an instrument in writing for the payment of money.
- 83. The declaration of an agent is not admissible to establish the fact of agency.—
 But when other proper evidence is given, tending to establish the fact of agency, it is not error to admit the declarations of the agent, secompanying sets, though tending to show the capacity in which he acted. When evidence is competent in one respect and incompetent in another, it is the duty of the court to admit it, and control its effects by suitable instructions to the inrv.
- 84. The court has a general power to remove or suspend an attorney for such immoral conduct as rendered him unworthy of confidence in his official capacity.
- 85. Bankruptcy is pleadable in bar to all actions and in all courts, and this bar may be svoided whenever it is interposed, by showing fraud in the procurement of the discharge, or a violation of any of the provisions of the bankrupt act.
- 86. An instrument in the form of a deed, but limited to take effect at the termination of the grantor's natural life, is held to be a deed, not a will.
- 87. A sale will not be set aside as fraudulent, simply because the buyer was at the time unable to make the payment agreed npon, and knew his inability, and did not intend to pay.
- 88. No man is under an obligation to make known his circumstances when he is buying goods.

- 89. Contracting parties are bound to disclose material facts known to each, but of which either snpposes the other to be ignorant, only when they stand in some special relation of trust and confidence in relation to the subject matter of the contract. But neither will be protected if he does anything, however slight, to mislead or deceive the other.
- 90. A contract negotiated by mail is formed when notice of acceptance of the offer is duly deposited in the post-office, properly addressed. This rule applies, sithough the party making the offer expressly requires that if it is accepted, speedy notice of acceptance shall be given him.
- 91. The date of an instrument is so far a material part of it, that an alteration of the the date by the holder after execution, makes the instrument void.
- 92. A corporation may maintain an action for libel, for words published of them and relating to its trade or business, by which it has incurred special damages.
- 93. It is unprofessional for a lawyer who has abandoned his case without trying it, a term or two before trial, to claim a fee conditional upon the success of his client, although his client was successful.
- 94. Although a party obtaining damages for injuries received through the default of another, was himself guilty of negligence, yet that will not defeat his recovery, unless his negligence contributed to cause the injury.
- 95. A person may contract to labor for suother during life, in consideration of receiving his support; but his creditors have the right to inquire into the intention with which such arrangement is made, and it will be set aside if entered into to deprive them of his future earnings.
- 96. A grantor may by express terms exclude the bed of a river, or a highway, mentioned as boundary; but if without language of exclusion a line is described as 'along,' or 'npon,' or as 'running to' the highway or river, or as 'by,' or 'running to the bank of' the river; these expressions carry the grantee to the center of the highway or river.
- 97. The court will take pains to construe the words used in a deed in such a way as to effect the intention of the parties, however unskillfully the instrument may be drawn. But a court of law cannot exchange an intelligible word plainly employed in a deed for another, however evident it may be that the word used was used by mistake for another.
- 98. One who has lost his memory aud understanding is entitled to legal protection, whether such loss is occasioned by his own misconduct or by an act of Providence.

- 99. When a wife leaves her husband voluntarily, it must be shown, in order to make him liable for necessaries furnished to her, that she could not stay with safety. Personal violence, either threatened or in-flicted, will be sufficient cause for such sep-
- 100. Necessaries of dress furnished to a discarded wife must correspond with the pecuniary circumstances of the husband, and be such articles as the wife, if prudent, would expect, and the husband should furnish, if the parties lived harmoniously together.
- 101. A fugitive from justice from one of the United States to another, may be arrested and detained in order to his surrender by authority of the latter, without a previous demand for his surrender by the executive of the State whence he fied.
- 102. A watch will not pass under a bequest of "wearing apparet," nor or household furniture and articles for family use."
- 103. Money paid for the purpose of settling or compounding a prosecution for a supposed felony, cannot be recovered back by a party paying it.
- 104. An iunkeeper is liable for the death of an animal in his possession, but may free himself from liability by showing that the death was not occasioned by negligence on his part.
- 105. Notice to the agent of a company is notice to the company.
- 106. An employer is not liable to one of his employees for an injury sustained by the latter in consequence of the neglect of others of his employees engaged in the same general business.
- 107. Where a purchaser at a Sheriff's sale has bid the full price of property under the erroneous belief that the sale would divest the property of all llens, it is the duty of the court to give relief by setting aside the sale.
- 108. When notice of protest is properly sent by mail, it may be sent by the mail of the dishonor; if not, it must be mailed for the mail of the next day; except that if there is none, or it closes at an unseasonably early hour, then notice must be mailed in season for the next possible mail.
- 109. A powder-honse located in a populons part of a city, and containing large quantities of gunpowder, is a nuisance.
- 110. When the seller of goods accepts at the time of the sale, the note of a third person, unindersed by the purchaser, in payment, the presumption is that the payment was intended to be absolute; and though the note should be dishonored, the purchaser will not be liable for the value of the goods.

- 111. A man charged with crime before a committing magistrate, but discharged on his own recognizance, is not privileged from arrest on civil process while returning from the magistrate's office.
- 112. When one has been induced to sell goods by means of false pretences, he cannot recover them from one who has bona fide purchased and obtained possession of them from the fraudulent vendor.
- 113. If the circumstances attendant upon a sale and delivery of personal property are such as usually and naturally accompany such a transaction, it cannot be declared a legal fraud upon creditors.

114. A stamp impressed upon an instru-ment by way of seal, is good as a seal, if it creates a durable impression in the texture

of the paper.

115. If a party bound to make a payment use due diligence to make a tender, but through the payee's absence from home is unable to find him or any agent authorized to take payment for him, no forfeiture will be incurred through his failure to make a tender.

Government Land Measure.

A township, 36 sections, each a mile square.

A section, 640 acres.

A quarter section, half a mile square, 160 acres. An eighth section, half a mile long, north

and south, and a quarter of a mile wide, 80 acres

A sixteenth section, a quarter of a mile

square, 40 acres.

The sections are numbered from one to thirty-six, commencing at the northeast corner, thus:

6	5	4	3	2	n w n e
7	8	9	10	11	12
18	17	16	15	14	13
19	20	21	22	23	24
30	29	28	27	26	25
31	32	33	34	35	36

The sections are all divided in quarters, the sections are an divided in quarters, which are named by the cardinal points, as in section one. The quarters are divided in the same way. The description of a 40 acre lot would read: The south half of the west half of the southwest quarter of section 1 in township 24, north of range 7 west, or as the case might be; and some-times will fall short, and sometimes overrun the number of acres it is supposed to contain.

THE DECIMAL SYSTEM

OF

WEIGHTS AND MEASURES.

As Authorized by Act of Congress--Approved July 28, 1866.

STANDARDS:

In every system of Weights and Measures it is necessary to have what are called "Standards," as the pound, yard, gallon, &c., to be divided and multiplied into smaller and larger parts and denominations. The definition and construction of these Standards involve philosophical and eclentific principles of a somewhat abstruse character, and are made and procured by the legislative depentment of the government. The nominal Standards in the new system are the Metter, the Are, the Litter, and the Gram. The only real Standard, the one by which all the other standards are measured, and from which the system derives its name of "Metric," is the Metter.

THE METER

Is used for all measures of length, distance, breadth, depth, heighth, &c., and was intended to be, and is very nearly, one tenmillionth of the distance on the earth's surface from the equator to the pole. It is about 39% inches, or 3 feet, 3 inches and 3 eighths, and is to be substituted for the yard.

THE ARE

Is a surface whose side is ten Meters, and is equal to 100 square Meters or about 4 square rods.

THE LITER

Is the unit for measuring solids and capaity, and is equal to the contents of a cube whose edge is one-tenth of a meter. It is about equal to 1 quart, and is a standard in cubic, dry and liquid measures.

A cubic Meter (or Kiloliter) is called a stere, and is also used as a standard in certain cubic measures.

THE GRAM

Is the Unit of weight, and is the weight of a cabe of pure water, each edge of the cube being one one-hundredth of a Meter. It is about equal to 15½ grains. It is intended as the Standard in all weights, and with its divisions and multiples, to supersede the nee of what are now called Avoirdapois, Apothecaries and Troy Weights.

Each of the foregoing Standards is divided decimally, and larger units are also formed by multiples of 10, 100, &c. The successive subordinate parts are designated by the prefixes Deci, Centi and Milli; the successive multiples by Deka, Hecto, Kilo and Myria; each having its own numerical signification, as will be more clearly seen in the tables hereinafter given.

The terms used may, at first sight, have a formidable appearance, seem difficult to pronounce, and to retain in memory, and to be, therefore, objectionable; but with a lite attention and use, the apprehended dif-

The terms used may, at first sight, have a formidable appearance, seem difficult to pronounce, and to retain in memory, and to be, therefore, objectionable; but with a little attention and use, the apprehended difficulty will be found more apparent than real, as has been shundantly proved by experience. The importance, also, of conformity in the use of commercial terms, on the part of the United States, with the practice of the many nations in which the system, with its present nomenclature, has already been adopted, must greatly overbalance the comparatively slight objection alluded to.

PUBLIC - No. 183.

AN ACT to anthorize the use of the metric system of weights and measures.

Be it enacted by the Senate and House of Representatives of the United States of Ameri-ca in Congress assembled, That from and after the passage of this act, it shall be lawful throughout the United States of America to employ the weights and mensures of the metric system; and no contract or dealing, or pleading in any court, shall be deemed invalid or liable to objection, be-

Acts and Resolutions of Congress. cause the weights or measures expressed or referred to therein are weights or measures of the metric system.
SEC. 2. And be it further enacted. That

the tables in the schedule hereto annexed, shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system; and said tables may be lawfully used for computing, determining and expressing, in customary weights and measnres, the weights and measures of the metric system.

Discount and Premium.

When a person buys an article for \$1.00—20 per cent off, (or discount,) and sells it again for \$1.00, he makes a profit of 25 per cent. on his investment. Thus: He pays 80 cents and sells for \$1.00—a gain of 20 cents, or 25 per cent of 80 cents. And for any transaction where the sale or purchase of gold, silver, or currency is concerned, the following rules will apply in all cases.

any transaction where the same or purchase of gold, silver, or currency is concerned, the following rules will apply in all cases.

RULE ist.—To find premium when discount is given: Multiply 100 by rate of discount and divide by 100, less rate of dis-

count.

Rule 2d.—To find discount when premium is given. Multiply the rate of interest by 100, and divide by 100, plus the rate of premium.

Suppose A has \$140 in currency, which he wishes to exchange for gold, when gold is 77 per cent. premium, how much gold should he receive? In this case the premium is given, conequently we must find the discount on A's currency and subtract it from the \$140, as per rule 2d, showing the discount to be a trifte more than 21 per cent. and that he should receive \$110,60 in gold.

Facts on Advertising.

The sdvertisements in an ordinary number of the London Times exceed 2,500. The annual advertising bills of one London firm are said to amount to \$200,000; and three others are mentioned who each annually expend for the purpose \$50,000. The expense for advertising the eight editions of the "Encyclopedia Britannia" is said to have been \$15,000.

In large cities nothing is more common than to see large business establishments, which seem to have an immense advantage over all competitors, by the wealth, experience, and prestige they have acquired, drop gradually out of public view, and be succeeded by firms of a smaller capital, more energy, and more determined to have the fact that they sell such and such commodities known from one end of the land to the other. In other words, the establishments advertise; the old die of dignity.—The former are ravenous to pass out of obscurity into publicity; the latter believe that their publicity is so obvious that it cannot be obscured. The first understand that they must thrust themselves upon public attention, or be disregarded; the second, having once obtained public attention, suppose they have arrested it permanently; while, in fact, nothing is more characteristic of the world than the ease with which it forgets.

Stephen Girard, than whom no shrewder business man ever lived, used to say: I have always considered advertising liberally and long to be the great medium of success in business, and the prelude to wealth. And I have made it an invariable rule too, to advertise in the dullest times as well as the busiest; long experience having taught me that money thus spent is well laid out; as by keeping my business continually hefore the public it has secured me many sales that I would otherwise have lost.

Capacity of Cisterns or Weils.

Brilliant Whitewash.

Many have heard of the brilliant stucco whitewash on the east end of the President's house at Washington. The following is a recipe for it; it is gleaned from the National Intelligencer, with some additional improvements learned by experiments: Take half a bushel of nice unments: Take nan a businer of account of the state of the sieve or strainer, and add to it a peck of salt, previously well dissolved in warm wa-ter; three pounds of ground rice, boiled to a thin paste, and stirred in boiling hot; half a pound of powdered Spanish whiting, and a pound of clean glue, which has been pre-viously dissolved by soaking it well, and violasy dissolved by socking it wen, and then hanging it over a slow fire, in a small kettle within a large one filled with water. Add five gallons of hot water to the mixture, stir it well, and let it stand a few days covered from the dirt.

It should be put on right hot; for this purpose it can be kept in a kettle on a portable furnace. It is said that about a pint of this mixture will cover a square yard upon the outside of a house if properly applied. Brushes more or less small may be used according to the neatness of the job required. It answers as well as oil paint for wood, brick or stone, and is cheaper. It retains its brilliancy for many years. There is nothing of the kind that will compare with it, either for inside or outside

walls. Coloring matter may be put in and made of any shade you like. Spanish brown stirred in will make red pink, more or less deep according to the quantity. A delicate tinge of this is very pretty, for inside walls. Finely pulverized common clay, well mixed with Spanish brown, makes a reddish stone color. Yellow-ochre stirred in makes yellow wash, but chrome goes further, and makes a color generally esteemed prettier. In all these cases the darkness of the shades of course is determined by the quantity of coloring used. It is difficult to make rules, because tastes are different. It would be It would be best to try experiments on a shingle and let it dry. We have been told that green must it dry. We have been told that green must not be mixed with lime. The lime de-stroys the color, and the color has an effect on the whitewash, which makes it crack and peel. When walls have been badly smoked, and you wish to have them a clean white, it is well to squeeze indigo plentifully through a bag into the water you use, before it is stirred in the whole mixture. If a larger quantity than five gallons be wanted, the same proportion should be observed.

How to get a Horse out of a Fire.

The great difficulty of getting horses from a stable where surrounding buildings are in a state of conflagation, is well known. The plan of covering their eyes with a blanket will not always succeed.

A gentleman whose horses have been in

great peril from such a cause, having tried

in vain to save them, hit upon the expedient of having them harnessed as though going to their usual work; when, to his astonishment, they were led from the stable without difficulty.

The Chemical Barometer.

Take a long narrow bottle, such as an old-fashioned Eau-de-Cologne bottle, and put into it two and a half drachms of camphor, and eleven drachms of spirits of wine; when the camphor is dissolved, which it will readily do by slight agitation, add the following mixture: Take water, nine drachms; nitrate of potash (saltpetre) thirty-eight grains; and muriate of smmonis (sal ammoniac) thirty-eight grains. Dissolve these salts in the water prior to Dissolve these saus in the water prior to mixing with the camphorated spirit; then shake the whole well together. Cork the bottle well, and wax the top, but afterwards make a very small aperture in the cork with a red-hot needle. The bottle may then be hung up, or placed in any stationary position. By observing the different appearances which the materials assume, as the weather changes, it becomes an excellent prognosticator of a coming storm or of a sunny sky.

Leech Barometer.

Take an eight ounce phisl, and put in it three gills of water, and place in it a healthy leech, changing the water in summer once a week, and in winter once in a fortnight, and it will most accurately prognosticate the weather. If the weather is to be fine, the leech lies motionless at the bottom of the glass and coiled together in a spiral form; if rain may be expected, it will creep up to the top of its lodgings and remain there till the weather is settled; if we are to have wind, it will move through its habitation with amazing swiftness, and seldom goes to rest till it begins to blow hard; if a remarkable storm of thunder and rain is to succeed, it will lodge for some days before almost continually out of the water, and discover great uneasiness in violent throes and convulsive-like motions; in frost as in clear summer-like weather it lies constantly at the bottom; and in snow as in rainy weather it pitches its dwelling in the very mouth of the phial. The top should be covered over with a piece of muslin.

To MEASURE GRAIN IN A BIN.—Find the number of cubic feet, from which deduct one-fifth. The remainder is the number of one-fifth. The remainder is the number of bushels—allowing, however, one bushel extra to every 224. Thus in a remainder of 224 there would be 225 bushels. In a remainder of 448 there would be 450 bushels,

A LIST

OF THE

PRINCIPAL OFFICERS IN SENECA COUNTY,

SINCE ITS ORGANIZATION IN 1804,

COMPILED FROM OFFICIAL SOURCES

By Hon. Samuel R. Welles, Member of Assembly.

DELEGATES TO CONSTITUTIONAL CONVENTIONS.

Sacret Commissioners,	Helim Sntton, Nathan B. Wheeler,	Covert

How to Judge a Horse.

A correspondent, contrary to old maxims, undertakes to indge the character of a horse by ontward sppearances, and offers the following anggestions, the result of his close observation and long experience:

If the color be light sorrell, or chestnnt, his feet, legs and face white, these are marks of kindness. If he is broad and full between the eyes, he may be depended on as a horse of good sense, and capable of heing trained to anything.

As respects such horses, the more kindly you treat them the better you will be treated in return. Nor will a horse of this description stand a whip, if well fed.

If you want a safe horse, avoid one that is dish-faced. He may be so far gentle as not to scare; but he will have too much goahead in him to be safe with everybody.

If you want a fool, but a horse of great bottom, get a deep bay, with not a white hair about him. If his face is a little dished, so much the worse. Let no man ride such a horse that is not an adept in riding—they are always tricky and unsafe.

If you want one that will never give out, never buy a large, overgrown one.

A black horse cannot stand heat, nor a white one cold.

If you want a gentle horse, get one with more or less white about the head; the more the better. Many persons suppose the parti-colored horses belonging to the circuses, shows, &c., are selected for their oddity. But the selections thus made are on account of their great docility and gentleness.

SENECA COUNTY BUSINESS DIRECTORY.

EXPLANATION TO DIRECTORY.

Directory is arranged as follows: 1st, Name of individual or firm. 2d, Town in which the parties reside, in parentheses. 3d, Post Office address. 4th, Business or occupation-

A Star (*) placed before a name, indicates an advertiser in this work. For such advertisement see Index.

Figures placed after the occupation of farmers, indicate the number of acres of land owned or leased by the parties.

Names set in capitals, indicate subscribers to the work.

The word Street is implied, as regards directory for Seneca Falls and Waterloo.

For additions and corrections, see Errata, following the Introduction.

Lupius' Merinoes and Alpacae;

Hilgers' Celebrated Broadcloths and Doeskins.

Our stock of the following goods is always full and complete:

Cloaks, Sacques and Mautillas; English, French and American Cassimerea; Genesee Falls Cassimeres, "our own make;" Mohair and Cashmere Dress Goods;

Shaker and Ebenezer Flanuels; White, Scarlet and Opers Wool Flanuels; Damask Table Cloths and Towelings; Napkins, Doylies and Wine Cloths:

Linen Sheetings and Pillow Casings; 3-4, 4-4, 5-4, 6-4, 7-4, 8-4, 9-4. 10-4, and 11-4 Cotton Sheetings; French, American & Scotch Ginghams; English, French & American Calicoes

Woolen and Cotton Yarus; Blankets, Quilta and Counterpanes; Real Laces and Embroideries; Swiss Naineook and Victoria Muslins;

Fancy Goods and Ysukee Notions; Ribbons and Trimmings; Hosiery, Wrappers and Drawers; Balmoral and Hoop Skirts; &c., &c., &c., &c., &c.

Our Jobbing business, which now extends from the Eastern portion of the State to the "Far West," offers inducements to city and country Merchants equal to any house in the United States. In addition to our advantages as Manufacturers and direct Importers, we have the sale of several makes of Brown Cottons and Woolen Mills in this

Price Lists and Samplea furnished on application, and orders sent by mail or entrusted to our agents, will receive prompt attention, and Dealers can rely upon purchasing of us the year round

At New York Jobbers' Prices.

PRICE LIST OF PLANTS

FOR SALE BY

DOOLITTLE & WIGHT,

Waterloo and Oaks Corners, N. Y.

The Doolittle, or Improved Black Raspberry.

Twenty, sent Post Paid, by Mail,\$1	00
One Hundred, by Express, charges unpaid, 3	00
One Thousand,	00
Ten thousand for	00

The Seneca Black Cap.

A larger Berry, and sweeter than the Doolittle, and seven or eight days later, marked, when sent in package with other plants, by white twine, and the

Garden Raspberry.

A seedling of the Doolittle, as large and prolific, but softer, like the Red Raspberry, but stands in hill like the black, less seedy and better for all culinary uses. This will be marked, when sent with other plants, by red twine.

One of each of these two last kinds, or two of either kind, sent postage paid, \$1 00
Twelve by mail, postage paid, 5 00
One Hundred, by Express, 25 00
One Thousand, by Express, 200 00

True and Selected Plants can always be had.

Twelve Years' Experience in BLACK RASPBERRY CULTURE.

BY H. H. DOOLITTLE, Oaks Corners, N. Y.

A Pamphlet of 24 pages, sent by mail for 20 cents; or FREE to all who order \$2.00 worth of plants.

MOTHERS! READ THIS.

Are your children reatless, Irritable, wakeful, feverish? Are they cutting teeth? Are the gume red and painful? Have they diarrhea? Have they fits or spaams? If so,

USE THE ORIENTAL SYRUP.

It is the only Syrup or Cordial, or CHILD MEDICINE in market free from Opium, Morphine, or Paragoric. These you can't give; or, at least, you ought not to. They destroy the functions of the BRAIN; the child grows pale; its eyes grow wild; its flees becomes anoft; it loses its mind; it becomes an Idiot. Mothera, these are facts I To be convinced, try it. The Oriental Syrup contains NONE of those poisons. It is perfectly harmless. It is soothing—quieting. The child sleeps aweetly, and awakes refreshed and lively. The teeth penetrate the gums without pain. It is good for aged and nervous people. TRY IT.

DR. G. T. TAFT & CO., Proprietora, Seneca Falls, N. Y.

THE BALM OF GILEAD!

SIR ASHLEY COOPER, in one of his lectures to his class, eays:—I have used the Balm of Gilead in my practice, in one form or other, for more than forty years; and for Old Sores or Ulcers, Eruptions, Rheumatism, Burns, Chilblains, Scalds, Piles, Chafes, &c., it anrpasses every other known remedy.

Rosenberger's Balm of Gilead Ointment

The composed of Olls and Balsams from trees and shrubs, and for all the diseases referred to by Dr. Cooper, we warrant it almost a specific. For Gall, Grease and Wounds of Horses, it has no equal. We warrant it; therefore do not hesitate to try it for every kind of Wound, Bruise or Sore.

DR. G. T. TAFT & CO., Proprietora, Seneca Falla, N. Y.

HOWE'S MEVER-FAILING AGUE CURE AND TONIC

Œ

Warranted to cure, permanently, Chills, Ague & Fever, and all Periodic Diseases. It cures Sciatic Rhenmatism, Nenralgia, Paralysis, and all Weaknesses, &c., heing wonderfully adapted to CURING Disease, restoring health and strength.

This Preparation is purely Vegetable, and entirely free from Quinlne or Mineral Poison. N. B. Persons using this Medicine can commence working immediately, and without fear of the disease returning.

Howe's Concentrated Syrup.

FOR THE BLOOD, LIVER, SKIN, DIGESTIVE & UTERINE ORGANS, AND THE SYSTEM GENERALLY.

It Restores Health by Purifying

the Blood, Correcting the Liver, Cleansing the Skin, Strengthening and Restoring the Digestive and Uterine Organs, Regulating and Renovating the System.

It cures Scrofula or Kings Evil, Cancers, Tumors, Goiter, all Swellings of the Throst or Glands, Salt Rheum, Scald Head, Camp Itch, Erysipelas, Carbuncles, Bolls, Blotches, Pimples, Sores, Mercurial and Syphilitic diseases, Ulceration of the Mouth and Throst, Liver, Kidneys; also Catarrh, Rheumettem, Piles, Gravel, Jaundice, Uterine and Female difficulties.

PRESERVE YOUR FRUIT. Spencer Patent Self-Sealing Fruit Jar.

This Jar has been thoroughly tested in the market for the last four years, and has proved to be nnsurpassed by anything of the kind in the market. There is no danger of breaking this Jar while applying the self-sealing cover—thus effecting a great saving over all screw and lever covered Jars.

The easiest to open and close. Will produce the greatest and most perfect vacuum, without which fruit will not keep.

Consult your interest and bny no other. COLEMAN & BARNES,
Prop'rs & Mannfacturers, 23 Exchange st., Rochester. Sold at retail by all first class dealers.

J. FRASER & CO.

NDRE. GALLERY. PHOTOGRAP

No. 83 ½ FALL St., SENECA FALLS, N. Y.

Positively the Finest and Most Complete Gallery in this Part of the Country.

Photographs, Ambrotypes, Ferotypes,

And the Beautiful Ivorytype, or Porcelain Picture, for which I challenge an equal. Stereoscopic Views splendidly taken. Life Size and Cabinet Photographs, plain or coscopic Views splendidly taken. Life Size and Cabinet Photographs, plair colored, all made at this Gallery under my own supervision, which are equaled by few and surpassed by none. I am one of the Pioneer Photographers, having commenced the business in the

year 1854, and now stand at the head of all im-

year 1854, and now stand at the nead of an improvements in the Photographic Art.

Came to Seneca Falls in 1861, and introduced the first Photographs here made. Remember, ANDREWS' GALLERY,

E. C. ANDREWS, Artist.

N. B.—Picture Frames in great variety always on hand.

HAYDEN BRO'S RETA

One Mile South of Port Byron, N. Y.

Established 1824, as a custom mill, and as a Retail Woolen Manufactory in 1844, and is the most successful establishment of the kind in the State.

EVERY YARD IS WARRANTED

To be wrought from PURE WOOL. This mill never worked an ounce of Shoddy, Shearings, or Waste. **Every Yard is Retailed** at the Mill. Buy direct from their Factory and save all Commissions.

VARIETIES UNEQUALED!

Heavy and Light Cassimeres, Black, Brown, Sheep's Gray, Miller's Gray, Plaid, Check, Donble and Twist and Mixes. Also, Cloths for Ladies' Sacques, Cloaks and Dresses.

Flannels for Men's $\mathbf{Wear.}$

Of many beautiful patterns. For Sheeting, and other household purposes, Fine White, All Wool and Cotton Warp Flannels.

STOCKING ${ t YARN}$

Of all Colors, and always in abundance, made from the choicest wool, for Men's, Women's and Children's wear.

Our Great Object is to Manufacture for the Farmers,

Mechanics, business and laboring men, Cloths unequaled for durability and cheapness.

Remember that it costs no more to trim and make a good garment than a poor one.

20 per cent. saved in cost, and 50 in wear. WOOL, light and clean, is as desirable as cash in exchange for Cloth, which we are able at all times to supply. Custom Carding and Cloth Dressing promptly done. We take pleasure in sending samples to those living at a distance, and fill orders promptly by express.

Primary Department.

The East Cenesee Conference Seminary,

Long known as the Ovid Academy—has one of the finest locations in the country. It is situated upon an elevated plateau, between the Seneca and Cayuga Lakes, and commands one of the most

MAGNIFICENT AND EXTENSIVE VIEWS

to be found anywhere. It is easy of access, being connected by steamboat with the N. Y. Central and Erie Railroads. The Seminary building is a fine brick edifice, four stories high, and one hundred and fifty feet long.

FARMERS! MECHANICS!

AND BUSINESS MEN,

There is something new in Auburn in wnich you are interested.

WM. HAYDEN & CO.,

Are now offering their Goods for sale in this City, having opened a store at

NO. 7 STATE STREET, AUBURN, N. Y.,

For the sale of their

EXTRA DURABLE CLOTHS!

Cassimeres, Flannels, Woolen Yarns, Socks, &c.

Our senior partner, Mr. William Hayden, has been engaged some TWENTY YEARS, with his father (now deceased,) in the manufacture of these desirable goods. In addition to his own experience, we have employed the best skill in the country, in all the different branches, and have

New and Perfect Machinery,

And cannot fail to please all who will give us a call.

NO SHODDY OR WASTE

Is used in any goods manufactured by us,

EVERY YARD IS WARRANTED.

50 Per Cent. Saved

IN WEAR, AND

Twenty-Five Per Cent. in Prices,

By making your purchases direct from the manufacturers. No better evidence is wanting of the value and estimation in which these goods are held by the public, than the ready sale with which they meet.

CASH AND WOOL

Received in exchange for any of our goods. All exchanges for wool will be made at the Factory, ½ mile west State Prison, on Wall St.

WM. HAYDEN & CO.

The Seneca County Courier

Was established in 1836. It is one of the largest and best County Papers in the State, and has a circulation nearly double that of any other paper published in the County.

Hence, as an Advertising Medium it has no equal in the County. The proprietors also aim to make it

A FIRST CLASS FAMILY NEWSPAPER,

by keeping its readers thoroughly informed on local and general news, and by making instructive and appropriate selections for miscellaneous reading.

"SECURE THE SHADOW ERETHE SUB-STANCE FADES,"

AND GO TO CARSON'S PHOTOGRAPH GALLERY,

PHŒNIX BUILDING, Waterloo, N. Y.

I offer superfor inducements in the Style and finish of Pictures. The new style of Pictures, called the

IMPERIAL,

Which are becoming so popular in New York, are made at my Gallery, with all the etceteras. In fact, all the latest styles and improvements in the Photographic Art, will be found at my Gallery. All kinds of

Photographs, Porcelain Paintings, Ambrotypes, Views of Buildings, &c.,

Finished in the latest and hest style known to the Art. Particular attention paid to Childwen's Fictures, and Copying trom Old Pictures. Photographe finished in India Ink; Oil and Water Colors, in the best style, by one of the best Artists in this country.

Gilt, Rosewood and Black Walnut Frames. Cord, Tassels, &c., Constantly on hand at the lowest prices, Cheaper than the Cheapest.

I have all the facilities for producing first class work in the way of large and small instruments, fine skyfight, and splendld rooms; so all who wish can get large Pictures here without being obliged to go to a city. Solar Pictures of all sizes made at my Gallery equal to any made in this country. Also, Pictures and Engravings framed in all kinds of Moulding, and of any size. All are invited to visit my Gallery, and examine styles and finish of work, and be convinced.

PUBLISHER'S NOTICES.

The Seneca Falls Reveille, Henry Stowell, Editor and Proprietor, was commenced as "The American Reveille," in 1855, by Wilcoxen, Sherman & Baker. It has since undergone several changes in proprietors, Mr. Stowell becoming sole owner in 1860. It is a large, first class family newspaper, and an able advocate of the local interests of the village and surrounding country. Its columns are deservedly well patronized by advertisers, who donbt-less have found its large circulation a valu-able medium through which to communicate with their neighbors in the surrounding country. Its jobbing department is well and liberally supplied with type, presses, etc., and is capable of turning out superior work in that line. Mr. Stowell is an able writer, and we think fully meeta the expectations of his constituency. May he live long to cater to the intellectual appetites of the citizens of Seneca. vertisement, page 132.

Howe's Never-Failing Ague Cure and Tonic Bitters, manufactured by Dr. C. B. Howe, at Seneca Fallahave cured thousands of Ague and Fever, Rheumatism, Neuralgia, &c., &c. The Doctor also manufactures "Howe's Concentrated Syrup," a valuable remedy for purifying the blood, correcting the liver, cleansing the skin and for other purposes too numerous to mention

For further particulars we refer the reader to the following testimonials:

"I have been familiar with the use of Howe's Never-Failing Ague Cure and Tonic Bitters for several years past, and can bear testimony to its value as a remedial agent in the care of intermittent discases.
G. W. Davis, M. D.,

Seneca Falls, N. Y.

"DR. C. B. Howe-Sir:-I desire to any to you that I have been taking your Ague and Tonic medicine, and find it one of the best Tonic medicines I have ever taken, and would most cheerfully recommend it to all persons troubled with billions disenses or general debility.
H. Henion, Seneca Falls, N. Y.

June 3, 1867."

"DR. Howe-Sir :-Your Syrup cared me of a large Cancer of the Breast, of about one year standing. Physicians said my cancer ought to be taken out immediately, but your Syrup cared me.

MRS. LEWIS DE MOTT,
Seneca Falls, N. Y."
"Dr. Howe:—The Cancerous wound of my breast would not heal until I used your Syrup. It cleansed my blood and cured my cancer, stopped my cough and cured my sore eyes.

Mrs. ESTHER BUCK,
Seneca Falls, N. Y."

See the Doctor's card, page 140.

J. Frazer & Co., Patent Agenta at Rochester and Buffalo, publish a card on page 142. They offer nuusual inducementa to inventors.

S. B. Peterson, manufacturer and dealer in Furniture, at Seneca Falls, publishes a card on page 133. At his rooms may be found elegant furniture, made from the best materials, by expert workmen. He is also well satisfied that what are the interests of his costomers are also his interests. He has therefore determined to sell good goods at prices so reasonable as to seenre their trade. We cordially recommend him to favorable notice.

Roth, Holleran & Miles, mannfacturers of National Melodeons and Organs, at Waterloo, publish a card on page 130. These gentlemen, being experienced workmen, saperintend every department of their manufacture, and thereby insure perfection in every instrument. They have invented an improved organ awell, so arranged as to be under the complete and easy control of the performer, thus enaeasy control of the performer, thus ena-bling him to graduate from the softest whisper to the full power of the instru-ment. Their cases are made strong, dura-ble, and with excellent taste, and are con-siderably larger than those of a similar price made by other manufacturers. We certainly think that those desirous of getting a first class instrument at a reasona-ble price, can be accommodated here. Their instruments are in great demand, and although they keep a large force of workmen constantly employed, their orders are quite up to their capacity for mannfacture.

Coleman & Barnes, Proprietors and Manufacturers of Spencer's Patent Self-Scaling Fruit Jar, at Rocheater, are build-ing up au extensive trade in this neeful commodity. We recommend the attention of consumers, and those of the trade, who are not already supplied, to examine their goods. See card, page 142.

The Globe Hotel, Lambert Good-man, proprietor, is pleasantly and centrally located in the business part of the village at Seneca Falla. Mr. Goodman has leased the whole upper stories of the Jones Block, adjoining the hotel building, to which an entrance has been made from the main hall. The whole premises have recently been The whole premises have recently usen thoroughly cleaned, papered, painted and re-farnished thronghout. The office and bar have been fitted up in superior style, and the dining room is supplied with the delicacies as well as the substantials of the season. Mr. Goodman, for a number of years clerk of the Hoag Honse, has won many friends who will follow him to his new home. We recommend all who lave good meals, clean and tidy rooms, and an attentive landlord, to visit this first class house when atopping at Seneca Falls. See card on page 138.

HIRAML. SWIFT, Proprietor.

A bert I... hilds, Attorney and Connscior, and Sarveyor, at Waterloo, has recently hung out his "shingle" as a candidate for legal honors. He was horn and reared in Seneca county; graduated at Hamilton College in 1861, and has since had some reputation as a public speaker. He also writes for several newspapers. As surveyor he was in the State employ for several months. See card, page 176.

The Seneca Black Cap, and Doolittle Improved Raspberry—Grown by Doolittle & Wight, at Waterloo and Oaks' Corners, have, during a few years past, grown in great favor with gardeners and growers in small fruits. They are hardy, fruitful, and of delicate flavor. The Seneca Black Cap is from one to two weeks later than the Doolittle in ripening, so that parties who are supplied with both may be insured with a bountiful anpply of fruit for a much longer time than with any one variety alone. For further particulars see card, page 136.

Dr. J. L. Clark, Dentist and Life Insurance Agent, in Gay's Commercial Building, Main street, Watcrloo, publishes a card on page 174. The Doctor claims to have the oldest established dental office in Seneca County, and "his good works are in the months" of a large portion of ite inhabitants. For over twenty years he has manufactured a superior article of tooth soap, a liheral use of which would tend to preserve the teeth. The Doctor also makes Life Insurance a specialty, and as his heart is in his work, he icels it his dnty to serve the Company he deems the safest and most economical for his patrons. "The Mutual Life Insurance Co. of New York," the oldest and wealthiest company in America, has a capital of over \$22,000,000, and, during the current year of 1867, has distributed among its policy holders, as dividends, \$2,124,000.75; more than the entire capital of many other companies. Call on Mr. Clark, and learn all about the workings of the company.

PUBLISHER'S NOTICES.

T. E. Smith, Manufacturer and dealer in Furniture and Upholstering goods, at No. 32 Seneca Street, Geneva, Ootario county, is justly known as one of the largest dealers in his class of goods in Central or Western New York. It is almost worth a trip to Geneva, to inspect his rooms. The main building has four floors, 40 feet front by 200 feet deep. This is connected with the manufactory in the rear, which is 35 by 100 feet, and yet back of this is a large lumber yurd, and two extensive storehouses for the reception of duplicate goods.

Mr. Smith is noted as being constantly supplied with good goods of all styles and descriptions, and which he offers at prices so low, that his enstomers live in many counties; the per-centage saved to them being enough to richly pay them the expense of a trip to his store. See advertise-

ment, page 3.

Pontius & Armstrong, Dealera in Hardware, Stoves, Tin Ware. Agricultural Tools, &c., at 65 Fall street. Seneca Falls, publish a card on page 4. Their stock is always full, selected with great care for this market. Amung their extensive assortment of stoves may be found the justly celebrated "Olive Branch" Hot Air Cook stove, which was awarded the first preninm at the State Fair at Buffalo, in October last. They are also agents for the "Ventilator" base burning parlor stove. Patrons or visitors will always be waited upon with pleasure and attention. It is no trouble tor this firm to show goods, and their prices are "marked down." Call and see them.

H. P. Westcott's Adjustable Dash Churn is advertised on page 2. The success of this Churn has been so great as to warrant the organization of a Company, under the "General Manufacturing Law of the State of New York," styled "The Seneca Falls Churn Manufacturing Co," with a capital of \$100,000. The works are capable of turning out 20,000 churns annually, and we learn they are meeting with a very rapid sale. They are made from the best quality of white cak. Farmers and dealers everywhere should satisfy themselves of its merits.

Alex. M. Dean. Attorney and Connsclor, Justice of the Peace, and Insurance Agent, at Seneca Falls, will attend promptive to all business entrusted in his hands. See card, page 134.

I. L. Huff manufacturea Carriages, Buggies, Lumber Wagons, Sleighs, Cutters, &c., at South Waterloo. His busineas has increased to such an extent as to render an eulargement of his shops necessary. This be has completed, and hy the aid of first-class workmen in every department is enabled to turn out first-class work. His prices are as low as anybody's. Call and see him. See card, page 150.

Chamberlain Bros., Merchant Millers, Grain Dealers and Malsters, at the Red Mills, Seneca Falla, are a deservedly popular firm. They manufacture excellent Flour and Malt, and are always in the market for Grain, for which they pay the highest cash price. See card, page 114.

Ira H. Coleman, "proprietor of the "Lake View Stock Farms," at Sheldrake, is a breeder and dealer in fine blooded Horses, Gentlemen wishing apperior animals should not fail of seeing his stock. See card, page 116.

The Banking House of LeRoy C. Partridge, at Ovid. J. B. Thomas, castier, does a general banking business. The managers are skillful financiers, and supply a want long felt in that section of the County. See card, page 116.

Rumsey & Co., of the Seneca Palls Pump and Fire Engine Works, publish a card on page 112. Although of recent organization, this firm are doing a very extensive and lucrative business. Their buildings are unmerous and substantial, and their business gives employment to a large force of operatives. Their manufactures, consisting of iron and brass lift and force Pumps. Garden and Fire Engines, Steel Amalgam Bells, Hydranlic Rams, &c., find a ready market in all parts of the country, and are considered equal to any manufactured.

M. C. Blodgett, dealer in Foreign and Domestic Dry Goods, Carpetings. Oil Cloths, &c., at Seneca Falla, keepa supplied with full lines in all departments, carefully selected from the best wholesale stocks in New York. His sales, already averaging about \$100.000 yearly, are likely to materially increase. He is about putting a carpet room in the basement, to be 80 feet deep. Customers from adjoining towns and elsewhere will find him and his attentive, gentlemanly clerks ever ready to attend to their calls. What can't be found at "Blodgett's" in the dry goods line, is bardly worth having. He is also agent for the "Great American Tea Co." See hie card on page 20.

Hayden Brothers, manufacturers of Woolen Goods, at Port Byron, publish a card on page 148. Their mill was established as long ago as 1824, as a custom mill, and as a manufacturers price 1844. Their goods are all sold at retail from the mill, and the manufacturers pride themselves on the purity and excellent quality of all their goods. They make all the various grades, from beavy and light cassimeres to flannels and ladies cloths. Call and see them in order to more fully appreciate the bargaina they offer.

Burton & Ten Eyck, Attorneys and Connselors at Law, have their office on Main street, at Waterloo. See card page 124.

Wm. Hayden & Co., Msnufacturers of Woolen goods, at Auburn, publish s card ou page 164, which we advise all to read carefully. Their machinery is all new and perfect, and their workmen old experienced hauds, and as they intend to sell their goods at home, great care is exercised in their manufacture. No shoddy or waste is employed. They manufacture extra durable Cloths, Cassimeres, Flannels, Woolen Yarns, Socks, &c. Wool is as good as cash at their factory. Don't fail to call at cash at their factory. Don't fail to call at their store, No. 7 State street, and ex-amine the quality and prices of their goods, when you go to Auburn.

DeGraff Brothers, Grocers and Provision Dealers, at No. 97 Fall street, Seneca Falls, publish a card on page 150. remers rams, punner a card on page 150. Their stock is large, and has the advantage of being fresh and new. Although they have but recently opened their store, they are meeting with a very liberal patronage from both town and country. We most certainly advise all to call in and examine their stock and prices when in town.

The Seneca Observer, Edward W. Sentell, publisher, is a large and influential family journal. It was started in 1829, as the Waterloo Observer, by Charles Sentell, father of the present publisher. It afterreact ancerwent several changes in proprietorship, the elder Sentell resuming charge of the office in 1853, by whom the paper was published till 1866, when it passed into the hands of his son. It is recognized as one of the leading jourwards underweut several changes in pronals of the County, and is the only paper published at Waterloo. Mr. Sentell's facilities for executing fine book, card and job printing, is equal to the requirements of this vicinity, and his rates, we presume, are as cheap as any. See card, page 152.

Lewis Adler, Clothing dealer, at Seneca Falis, prints a card on page 182. We cheerfully recommend Mr. Adler to the people of Seneca County, as a workman of experience and reliability. He always keeps an extensive sasortment of Cloths, and will give his customers "fits" to order, or no pay. Please call in and see friend Adler, and judge for yourselves of the truth of our statements. His stock of ready made goods is also complete and Please call in and see chesp.

"Secure the Shadow ere the Substance Fades, " is Carson's motto. Carson is the well known Photographer in the Phœnix Building, at Waterloo. His nome are supplied with all instruments and facilities necessary for making first class pictures. Patrons will find him gentemanly and oblightg, and his terms accommodating. For further particulars of his facilities and what he recommends designed to the supplier of the his facilities, and what he promises to do, we refer the reader to a perusal of his attractive advertisement, page 170.

Fred. L. Manning, Attorney and Counselor, and District Attorney, at Wa-terloo, attends to cases in hankruptcy, and will be found prompt and energetic in all legal business. Card on page 124.

Clark & Draper, Dry Goods mer-chants at Waterloo, keep a large store well stocked with all grades of foreign and do-mestic, staple and fancy goods, full lines in all departments, from which to make se-lection. Farmers and others from adjoining towns, can here find anything in the line of dress goods, cloths, &c., at prices low enough to satisfy any reasonable person. The partners are young men who by their energy and desire to please, are des-tined to add much to the large trade they already enjoy. See card, page 162.

H. E. & H. F. Smith, Deslers in Groceries, Provisions, Crockery, Chins, Glass Ware, Silver Plated Goods, &c., at Waterloo, are well known to the citizens of Seneca County, as being straight-forward, reliable business men, and at whose store everybody, rich or poor, can buy anything in their line of trade, of good quality, and at the most reasonable prices. The part-ners are both candid men, and will represent their goods as they are, and customers sent their goods as they are, and customers may rely on getting their money's worth every time. If you are short of money, but have produce, it is just as good as the money with them. Indeed, you can probably find no better place at which to market your produce for cash. We advise our readers to call at their store on Main street when in term and corrected their extensity. when in town, and examine their extensive and varied stock, (which always looks neat and inviting,) even if they don't then want to purchase, for we are sure their visit will prove so gratifying, that, when "Wifey" wants a new set of dishes, or "Jennie" gets married, the Messre. Smith will receive an order for the outfit. See their and been 100 their card, page 180.

Downs & Co. Manufacturing Company, of Senecs Falls, reference to which may be found on page 49 of this Work, is now, and has been since 1861, under the immediate management and direction of Seabury S. Gould; and is largely and successfully engaged in the manufacture of Suction and Force Pumps, Steel Amalgam Bells, Burrall's Patent Iron Corn Sheller, Garden or Bire Engines, Thimble Skeins and Pipe Boxes, Jack Screws, Sad Irons, and many other articles of Hard-ware, all of which are made and finished in

a very superior manner.

They are also manufacturing Hewit's
Patent Excelsior Churn, which for simplicity in its arrangement and success in its
results, they claim, has nothing to equal it

in the market.

We had an opportunity of examining it while at their establishment, and were highly impressed in its favor, there heing no difficult complication attaching to its structure, and in its operation so simple, that a child can manage it as well as an adult. See advertisement, page 198.

A. Proudfoot, Rectifyer and desler in Ales and Liquors, at Seneca Falls, has had long and favorable experience in his line of business. See card, page 128.

PUBLISHER'S NOTICES.

53 Main street, Rochester, publish a card on page 135. This House was established in 1849, since which time its success has been uninterrupted, each year increasing its amount of business. Their annual sales amount to the enormous sum of near amount to the enormous sum of near \$1,500,000, their trade extending from the Eastern portions of the State to the "Far West." Occupying as they do, fully 25,000 feet of flooring in actual business departments, every portion of which is crowded with immense piles of goods from foreign countries, as well as of domestic manufac-ture, renders the facilities of this house for Jobbing, equal to any io the country. The firm are also proprietors of the "Genesee Falls Woolen Mills," where they manufacture 100,000 yards of goods annually.

Dr. G. T. Taft & Co., of Seneca Falls, are proprietors and mannfacturers of the celebrated "Oriental Syrup," "Balm of Gilead Ointment," &c. They are also extensive dealers in all kinds of drugs, medicines, toilet articles and fancy goods. We would call especial attention to their card; by so doing, many suffering ones may discover the means whereby they may he relieved from much pain. Card on page

Andrews' Photograph Gallery, at Seneca Falls, is deservedly a popular establishment. Mr. Andrews has had over thirteen years' experience at his profession, and has been at Seneca Falls about half the time. He keeps fully up with the progress of the art, and can supply anything in his line as well and as cheaply as it can be ob-tained anywhere. We advise all who wish to "see themselves as others see them," to go to Andrews', where they can cast their shadows to perfection. See card, page 148.

Moses & Segoine, Proprietors of the "Prison Furniture Warerooms," 88 Genesee St., Auburn, will at all times be pleased to show visitors their extensive stock of House, Store, Office, Church or School Furniture. We take pleasure in School Furniture. recommending this enterprising firm and extensive establishment to the favorable entire of our readers. For further particnotice of our readers. ulars see their advertisement, page 1, facing front cover.

Geo. M. Gulon sells Drugs, Medicines, Books, Fancy goods, &c., at No. 91 Fall street, Seneca Falls. He has a nice store, well filled with choice goods, which he will he pleased to sell to all who wish to purchase, at the lowest possible prices. Try him. His card may be found on page 190 120.

C. H. Weed, Attorney and Counselor at Law, Seneca Falls, practices in all the State and United States Courts. His He has a full assortiment, which he offers clients will find him prompt and ever at extremely low prices. He will sell in large or small quantities to suit purchasers. See card, page 146.

Gurke, Fitzsimmons, Hone & W. H. Hood, manufacturer and deal-co., Importers, Jobbers and Retailers of Dry Goods, Fancy Goods and Woolens, No. Stands Goods and Shoes, and Sewing Machines, at 92 Fall street, Seneca Falls, publishes attractive cards on pages 146 and lishes attractive cards on pages 130 1196. Mr. Hood is determined to be at the head of his profession in quality of goods and neatness of fits. He uses the hest of and neatness of fits. He uses the best of stock for manufacturing. His supply of ready made goods is also extensive and complete. Country shoemakers will find it to their interest to purchase leather and findings of him. Persons expecting to purchase a sewing machine, will not fail to remember that he has the agency for the celebrated Singer Family Sewing Machines.

P. Hunt & Son, Manufacture Carriages, Sleighs, Cutters, &c., &c., in any style desired, from the best eastern timber; and we are assured their work is all executed by experienced workmen, who take pride

in doing all things well.

Don't fail to drop in and examine their
styles and prices when you visit Senecs.
Falls. See card, page 120.

Covving & Co., Manufacture Pumps, Fire Engines, Hydraulic Rams, &c., at Seaeca Falls. Although this firm have met with many severe misfortunes in the shape of fires, &c., they have triumphed over all, and are now occupying splendid huildings, and are doing a fine business. The fame of their manufactures are world-wide, and like other establishments in this enter-prising village, they are known by their works, far and near. Their card may be found on page 122.

Miller & Hawley, Attorneys and Counselors at Law, at Seneca Falls, by long experience and able management have won the esteem and confidence of those who have had occasion to do husiness with them. See card, page 124.

Cornell's Photograph Gallery, at Waterloo, is turning ont some very su-perior pictures. It is supplied with everything needful for good work, and the experience of Mr. and Mrs. Cornell, warrant us in recommending them to the favorable notice of those in want of good pictures; and that means everyhody. See card, page 126.

PUBLISHER'S NOTICES.

Mahlon B. Thomas has one of "Page's Patent Perpetual Draw Lime Kilns" on his premises, just south of Waterloo village, by the use of which he is enabled to serve his customers at any time they may choose to card or order from him, with the best quality of fresh lime. As his fires are kept continually burning, his supply of lime is never exhausted. See card on page 144.

Geo. E. Sherwood, at 170 Main et, Waterloo, delights his visitors with the rich display of Watchea, Jewelry, Silver and Silver Plated Ware, &c., to be found at his store. His goods may he relied upon as being of the very best manufacture, and of the latest styles. He is also prepared to do repairing and engraving in a superior manner, and on reasonable terms. Sherwood's is the place to buy good goods in Waterloo. See advertisement, page 118.

Mrs. B. M. Allen, at Canoga, deals in fashionable Millinery Goods, and attends to dreas making, pinking, atamping, &c., for her customers, on short notice. Ladies in want of anything in the millinery line will do well to call and see her. Card on page 142.

George Kidd, Jr., proprietor of the Canoga Hotel, publishes a card on page 142. He will cater to the comfort of his gueate, to their entire eatisfaction. Give him a call.

C. Jones publishes a Grocery card on page 126. At his atore in Ovid, may be found everything good and palatable in the culinary line. Yankee Notions, Drugs, Medicines, Toys, &c., for the children, in endless variety. By all meane call and select from his stock of superior goods.

Dr. E. Carpenter, of Waterloo, advertises Dentistry on page 128. By long practice he has acquired a akill in his profession seldom equalled. His work will "apeak for itself." He also prepares an excellent tooth soap, with willow charcoal as a principal ingredient. Try it.

I. N. & D. D. Johnson, Breeders of Pure Spanish Merino Sheep, at Ovid, publish a card on page 116. We would advise all who are desirous of improving the class of stock to consult their interests by aelecting from their herd.

C.J. Martin, manufacturer of Boots and Shoes, on Ovid atreet, Senecs Falls, employ experienced workmen, and usee the best qualities of leather and materials. He keeps a general assortment of goods for Men's, Women's and Children's wesr., and warranta a fit or no sale. See card, page 130.

R. P. Kendig, of Waterloo, calla especial attention to his card on page 166. His vineyard and propagating grounds are well-stocked with all the choice varieties of vines, which he will sell at prices to aut customers.

East Genesee Conference Seminary. This is one of the oldest, and has become one of the best institutions of learning in this section of the State. It was catablished many years aince, under the name of "Ovid Academy," and exerted a great infinence in extending intelligence and sound education among the people of this and surrounding counties. The name was changed in 1855 to the "Seneca Collegiate Institute." It subsequently passed into the hands of the East Genesee Conference, and became what is now widely known as the "East Genesee Conference, and became what is now widely known as the "East Genesee Conference, and became what is now widely known as the "East Genesee Conference, and became what is now widely known as the beautiful to have been at the head of this institution, no one has been more thorough, efficient and popular than Prof. J. Easter, the present Principal. Under his guidance the school has increased in prosperity, the standard of scholsrahip savanced, and its sphere of usefulness is constantly extending. He is assisted by an able corps of popular and very successful teachers. Young men and ladies desiring good sound instruction in all branches that pertain to a thorough scademic course, will here find every facility. See cut of seminary huilding and card, pages 154 and 155.

of "Thayer' & Son, Manufacturers of "Thayer's Celebrated Seneca Falls Sausage," and "Thayer's Sugar-Cured Hams," are perhaps the most celebrated firm in the State in their peculiar line of business. In 1839, Mr. J. C. Thayer commenced the business. That year he manufactured 2,700 pounds of sausage. Year by year his asusage gained notoriety, and his business increased. In 1863, Mr. Thayer's son became a partner. This sausage is made by machinery driven by water power, superintended by quite a large force of men. At present the firm are making about two tona per week, and find a ready market in Albany, Troy, New York, and the larger cities and villages along the N. Y. Central Railroad, as far west as Bufialo, and south to the Eric Railroad; and orders have been filled to go to Michigan. 500 pounds, weekly, are shipped to the Metropolitan Hotel, New York City. That house has been supplied by this establishment for thirteen years. They are now working up at their "Union Meat Market," and Sanage Manufactory, about 12,000 pounds of pork weekly. Their Hame are much aought after, heing cured in the most perfect manner. We advise all who love good aausage to send their order to J. C. Thayer & Son. See their card on page 190.

American Hotel, Anburn, H. L. Swift, Proprietor. Who that has visited Anburn has not stopped with this "prince of landlorde"? If any there he, we say to them, "Go, sin no more;" for a sin it must aeem, to all who have enjoyed his hospitalities and good dinners, not to call when in town. We most certainly advise strangers and all our traveling friends to call on "friend Hiram" when in this goodly city, and he comforted. See card, page 214.

PUBLISHER'S NOTICES.

The Seneca County Courier Printing Establishmeut, at Senecs Falls, is supplied with fast running power presse, and job type in great variety. The pro-prietors will be pleased to axecute jobs for all who spply, and we doubt not will do it to the entire satisfaction of their patrons, is recorded to style as well as price.

in regard to style as well as price.
The Seneca County Courter newapaper, is a large thirty-two column sheet, well edited and printed. Its selections are well edited and printed. At selections are well chosen, and we are glad to notice that business men appreciate its large circulation as an advertising medium. They will no doubt reap rich rawsrds as the legitimate results of their perusal by the masses who read the "Courier." The paper was commenced under its present name in 1837, hy Iaaac Fuller & Co., and has since passed through the hands of several proprietors, (see page 26.) Messrs. Pew & Holton, the present owners, purchased the office in 1865. Both partners are well known in the Counboth partners are went and with the South-ty, and have the confidence of the people. We trust they may live long to circulate their welcome weekly visitor among the citizens of "old Seneca." See their card, page 168.

T. Hoibrook, is a Dentist of excellent reputation. His office is 91 Fall st., Senecs Falls. Why need suffering humanity plod about with aching and decayed teeth, when so skillful a dentist is willing and anxious to repair the damages for a proper suffice of the sent on page. very moderate aum. Read his card on page

Mrs. J. L. Newton, of South Waterloo, sells fashionable Millinery of all styles and prices in the market. Don't fall to call and examina her goods; she is bound to suit all customera, both as to atyle and price. See card, page 158.

Lott Cook, Desler in Marble, at South MATCH COOK, Design in Marine, at South Waterloo, prints a sard on page 180. His stock will be found complete, and comprising all the varieties usually kept in a first class shop. He employs experienced workmen, and is at all times prepared to fill orders for any exhact work in his line. fill orders for any style of work in his line desired.

Gambee's Hotel, Bearytown, B. Gambee, proprietor, has been recently enlarged and refitted, and "Mine Host" will apare no efforts to render the visits of his guests alike agreeable to all concerned.— See card, page 160.

W. F. Williams, Watch Maker and Jeweler, at 91 Fall atreet, Seneca Falls, publishes a lengthy advertisement on page pannanea a lengthy acvertagement on page 184. His store is well filled with a large and rich assortment of goods in his line, purchased by himself from some of the most celebrated manufacturers and important the country. His display of Cold. most ceterrated manufacturers and importers in the country. His display of Gold and Silver Watches, Solid Silver and Silver Plated Ware, Jewelry, &c., is especially tempting. For further particulars we refer the reader to the advertisement.

Thos. B. Sharp & Son, Druggists, and dealers in China, Crockery, Glass Ware, Silver Plated Ware, Paper Hangings, &c., at Seneca Falls, have been engaged in their present business since 1857, since which time they have justly gained a wide celeb-rity for keeping good goods at low prices, and for heing gentlemanly and obliging to trade with. Those in want of Crockery, &c., or Drugs, Madicines, &c., indeed, any-thing in their line, will do well to purchase of T. B. Sharp & Son. See carda, pages 190 and 204.

Dr. G. W. Davis & Son, Druggists and Booksellers, 75 Fall street, Seneca Falls, keep a "model store," where the purchaser may find pure Drugs and Medicines, Wines and Liquors, or anything usually kept in a first class drug store; besides which their stock in the book line is very complete, comprising standard, miscella-neous and school books, stationery, pens, ink, &c. Call and see them. Card on page 196.

James Gibson, Malster, at Waterloo, ublishes a card on page 206. Farmers can publishes a card on page 206. Farmers can probably get as much for their barley of him as of anybody. His malt is readily marketed as a superior quality.

H. Seymour, Dry Goods merchant at Seneca Falls, keeps supplied with perhaps one of the finest stocks of goods between Syrscuse and Rochester. They are carefully selected with reference to this market, and customers may be certain of getting at their store stylish goods and of good quality. The large corps of clerks are so well acquainted with their duties that, although the store is sometimes crowded, everybody seems to find what they want, and get waited upon to their entire satisfaction. See his card, page 208.

Joshua Thomas, at Ovid, is a practical Boot and Shoe maker. He pridss himself on giving his customera "perfect fita," and we think he can; at all events his patrons seem well pleased with his atyles. He also keeps ready made goods of lettile and prices hesides hers. Cans. all styles and prices, besides hats, caps, gloves, &c. Call and see him; you can't fail of being auited. Card on page 166.

John Youngs, manufactures elegant and durable Carriages, Buggies, Sleighs and Cuttere, of all styles, to order, at his shop in Bearytown. Those in want of anything in his line need run no risk in purchasing from him, as he employs only experienced and competent workmen, and uses the best quality of timher and iron. See card, page 182.

H. L. Huntington, Grocer and Provision dealer, on Main street, Waterloo, is the happy recipient of a lucrative trade. His customers may well feel gratified that they fall into so good hands. Mr. Huntington to keen tire to grow a water water water and the state of t ton strives to keep tip-top goods, and succeeds if they are to he had in the market. See card, page 214.

EXPLANATION.—Find the Year and observe the Letter above it; then look for the Month, and in a line with it find the Letter of the Year; above the Letter find the Day; and the figures on the left, in the same line, are the days of the same name in the month.

Leap Years have two letters; the first is used till the end of February, the second during the remainder of the year.

A STORY WITH A MORAL.—A Connecticut exchange tells the following story of a boy who was sent from Croton, Conn., to New London, one (day last summer, with a bag of coru. The boy was gone all day, and returned with the bag unopened, which he dumped on the floor. Said he—

"There is your corn, go and sell it, for I can't."

"Sold any?"

"No: I've been all over London with it, and nobody said a word concerning green corn. Two or three fellows asked me what I had in my bag, and I told 'em it was none of their business what it was."

The boy is not unlike hundreds of merchante who will promptly call him a fool for not telling what he had to sell, and who are actually doing the same thing on a much larger scale than did the boy, by not adver-

tising their business.

To Those who White for the Press.—
It would be a great favor to editors and printers, should those who write for the Press observe the following rules. They are reasonable, and our correspondents will regard them as such:—1. Write with hlack ink on white paper, wide ruled. 2.

Make the pages small, one-fourth that of a foolscap sheet. 3. Leave the second page of each sheet blank. 4. Give to the written page an ample margin all around. 5. Number the pages in the order of their succession. 6. Write in a plain bold hand, with less respect to beauty. 7. Use no abbreviations which are not to appear in print. 8. Punctuate the manuscript as it should be printed. 9. For italics underscore one line; for small capitals two; for capitals three. 10. Never interline without the caret to show its place. 11. Take special pains with every letter in proper names 12. Review every word to be sure that none is illegible. 13. Put directions to the printer a private letter to the editor on the printer's copy, but always on a separate sheet.

Cash and Credit.—If yon would getrich don't deal in bill books. Credit is the "tempter in a new shape." Buy goods on trust, and you will buy a thousand articles that Cash would never have dreamed of. A shilling in the hand looks larger than ten shillings seen through the perspective of a three months bill. Cash is practical, while Credit takes horribly to taste and romance. Let Cash buy a dinner, and you will have beefsteak fianked with onions. Send Credit to market, and he will return with eight pair of woodcocks and a peck of mushrooms.—Credit believes in diamond pine and champagne suppers. Cash is more easily satisfied. Give him three meals a day, and he don't care much if two of them are made up of roasted potatoes and a little dirty salt.—Cash is a good adviser, while Credit is a good fellow to be on visiting terms with. If yon want double chins and contentment, do business with cash.

Richmond & Brother, of Seneca Falls, advertise Clocks, Watches, Jewelry, Silver and Silver Plated Goods, &c., on page 192. We feel safe in recommending them as fair and honorable dealers. Their goods are of late and fashionable styles and patterns, and no doubt will be sold low as can be hought of any reliable dealer. Their experience of over twenty years fits them for accuracy in all kinds of fine watch repairing, in which branch they feel confident of giving entire satisfaction. They are also agents for a celebrated Plating Fluid, which we have tried and found valuable and convenient.

Welles & Branch, of Waterloo, are extensive dealers in Drugs, Medicines, Books, Fancy Articles, Wall Paper, &c. Their Istore is very large, and lie always crammed full. It is nest and tidy; so much so, indeed, that it is a pleasure to call there even if you don't want to purchase anything. Dr. Welles is a physician of well known exil and judgment, and Mr. Branch, as a druggist of experience, has few if any superiors. See their card and cut of store, page 212.

Dr. Walker, the celebrated Oculist and Aurist, No. 82 State street, Rochester, publishes a card on page 206. We can recommend the Doctor as a Physician of great skill at hie profession.

MI. S. Drake, M. D., Physician and Surgeon, tenders his services to the citizens of Waterloo and vicinity. He is an old Physician of much experience in this county. See card, page 206.

R. Frank Smith, Harness maker and dealer in trunks; &c., at Seneca Falis, is an expert workman. His barness are manufactured from superior oak tanned leather, and he don't care who knows it. Who could possibly find fault with a fine horse, dressed up in "Smith's best," if he travel at the fearful rate illustrated in his advertisement on page 200. Mr. Smith is also agent for the "Cbarter Oak Life Insurance Co." of Hartford, having a capital of over \$3,000,000, and is noted as being one of the most liberal and reliable companies in the country.

Auburn File Works. This establishment located at Abburn, Caynga'Co., manufacture superior files and rasps from the best English cast steel. They employ experienced workmen, noted for their accuracy in this peculiar branch of manufacture. Deslers, Mill-owners and Machinists will undoubtedly find it a great saving by purchasing their new files at this establishment, and having their old once re-cut there, and made almost if not quite as good as new. Card on page 200.

Milton Benninghoof, dealer in Lime and Stone of the best quality, publishes a card on page 206. His kilns are on the Canoga and Bearytown road, on the "Lambert Farm." Parties can have their lime delivered if they choose.

*Bearytown.

Cruso, a post office on line of Wayne Co., in Tyre, about four miles from Tyre City.

East Varick, on Cayuga Lake, about 4% miles from Romulus.

Kendaia, a post office and hamlet about 4 miles west of Romulus.

Kidder's Ferry, on Cayuga Lake, about 3 miles from Farmer Village.

Magee's Corners in south-west corner of Tyre, 4% miles from Waterloo.

Romulus Center, 3 miles north of Ovid.

Rose Hill, a post office in west part of Fayette, about 5 miles from Waterloo.

West Junius, near south-west corner, 6% miles from Waterloo.

PUBLISHER'S CARD.

Before leaving the work in which I have, for the past few months, been so earnestly engaged, I desire to return thanks to all who have so kindly aided me in the effort to produce a work, which I confidently hope will prove of great value to its possessors. Those who have furnished information, (historical or otherwise,) for its pages, have my special thanks, while those who have pecuniarily aided in the way of subscriptions for advertising, will, I trust, receive liberal cash dividends as the legitimate fruits thereof. Subscribers for the work it is hoped may find much that is new, instructive, and valuable.

As a parting word to my friends in Seneca County, I would suggest to the business men, that very many of them would find Printer's Ink a great lubricator of the wheels of business. Too many seem to have fallen into a settled apathy, as regards business matters; willing to serve such customers as come unasked to their doors, but who make no efforts to retain at home the large amount of trade annually diverted to the cities of Syracuse and Rochester. As a general thing you are not willing to admit that the merchants of those cities can afford to sell the same class of goods cheaper than you can. Their rents, taxes and clerk hire, usually cost far

more than yours-while your money will buy goods in market just as cheap as theirs. Why, then, should your citizens patronize the city merchants rather than yourselves? In penning this article I can have no selfish interest in view, as my present work with you is accomplished. It is purely for your own interest that I suggest the propriety of your advertising more liberally. extensively, and all the time-through the columns of your local newspapers, by hand-bills, by circulars, by cards, by every means you can employ. Advertise; let the people know you are alive, and that you have good goods, and full assortments, in your special lines, and that you will sell cheap, at city prices. And finally, if you keep posted as to the markets, and do as you advertise, our word for it, you will very soon be surprised at the increase of your sales. I do not mean that advertising alone will build up any business, or the want of it hinder its prosperity; but I do assert emphatically, and had I time and space to do so, could prove by large numbers of the many thousand persons with whom I have had business, that, in nine cases out of ten, advertising liberally and long is one of the best of business investments.

Do not be deceived by the too popular idea that "you are so long established, that everybody knows where you are, and what you have to sell." I tell you it is, on your part, a grave error.

How many men in your county have been there but one or two years, or, perhaps, have just made their residence with you? Of what benefit is your "long established reputation" in such a case. Your neighbor, perhaps, who has been in business but a few months, is just as well "established," in the mind of such a man, as "you," who boast of being "so long in business that everybody knows you and you know everybody." Politely speaking, you are "an old fossil."

You will say that the new man must have some customers, and you will all stand your chances. Such a course will do very well when you are not anxious to increase your trade, or when you are quite willing to diminish it; for, while you are satisfied with this state of affairs, some more enterprising tradesman will reach your

would-be customer, and perhaps withdraw his patronage from your village altogether. You should bear in mind always, that there is a dividing point between your village and those adjacent, and that the custom of citizens living near such dividing point, generally goes to that place which holds out the most favorable inducements.

A friendly rivalry in advertising, by parties engaged in the various kinds of business, is invariably noticed and commented upon by the masses who read, and tends to materially increase the business of a village. Don't be altogether selfish in your motives.— Work for the benefit of your locality, and you will surely reap your reward. In other words, build up your village, make it a center for a large strip of surrounding country.

As mediums for advertising, you have many: First of all is your Local Papers; your Editors are all good fellows, and would be pleased to advise their many readers who to deal with. Try them; they are liberal and uniformly obliging. Their local items, if you would allow it, might be the means of depositing many dollars in your till. As for other means of advertising, "their name is legion," the principal ingredient of which is Printer's Ink; the benefit to be derived from which depends more or less upon the size of doses.

With thanks to friends generally, and especially to the several thousand patrons of the "GAZETTEER AND DIRECTORY OF SENECA COUNTY," I leave my work for the present, hoping in after years to again meet and serve you in a similar undertaking.

HAMILTON CHILD.
